Be Sparing in Demands

On Doctors During War Of the four horsemen-war, famine, pestilence and death-loosed upon the earth and destroying everything before them as in the last war, among the most deadly is pestilence. Contagious and infectious epidemic diseases are both virulent and devastating.

In view of the shortage of doctors and nurses who are being called into service, the war participation suggestions whereby people may help their doctor:

Call the doctor to your home only ing whenever possible. Have an examination at the first sign of sickness. This helps prevent large and serious illness.

of hospitalization. Protect yourself position of a weak cause. and family against smallpox, lockjaw, etc., by immunization. Avoid overeating, overdrinking, overworking and over-exercising. Get a good diet. Follow the rules of personal aid courses, nurses' aid training and Cross. This will help to relieve the burden on the physicians and nurses in the hospital and in the home.

### Rig Army Planes With New

Military planes headed for combat

closed recently. Modification centers have been in ing opposed to conscription. I do not is a terrific expansion. I do not think wish to say anything more about that, too great a compliment could be paid Harbor, but until recently the lid because in my opinion that stand, to the director of aircraft production, PHONE 838 has been tight on every aspect of like the greater part of my hon, everyone in that branch and every their work. As the army air forces | friend's speech this afternoon, is now one in the aircraft industry for the

recently stated: "When we make modifications, we want to catch the enemy totally un-

known we were laying for them." The modification center is operated under supervision of the U.S. army air forces material command's production division. Its job on military planes which could not be incorporated on the aircraft assembly line without delays for retooling. For example, it takes production airplanes and fits them for Arctic or desert operation, increases their range or builds up their bomb loads as called for by new situa-

tions. Boxes for Ammunition

The achievement of a former can manufacturing plant in converting to the production of a container to bullets is considered remarkble even be attained, and a much more efficing out paint pails, beer trays, screw necks, caps and various other fittings and trimmings for steel cans. As the war progressed, bringing restrictions on the manufacture of general-line containers, it became a serious question whether the plant and should not be used until the accould continue to operate on the old tual need for it arises.

basis. the presses, tanks, sprayers, ovens | vanced by the last speaker. The first | than it is right here in the House ed to make ammunition containers. It took only 10 weeks from the time the product drawings were received to the time when the ammunition boxes began to roll off the production line.

Ready for Action

If Hirohito's fliers should venture over Los Angeles county they will find waiting for them-appropriately enough—a group of men who are professional insect killers. Enlisted and trained as auxiliary firemen in the Los Angeles county citizens defense corps, the crews of 350 auto tank spray rigs normally used for secticide are ready to respond instantly with their apparatus to quench fires which may be started Insurance and Real Estate in grass, crops, brush, and small buildings.

least 300 gallons of water, and most of the rigs are provided with me- our war ministers forecast the man lance of victory. chanically operated platforms which height to fight fires in trees or upper floors and roofs of houses.

Washing Walls Modern water-thinned washable lightly sponging or wiping with a soft sponge or cloth, well wet with water. If necessary, a little mild soap may be used. Adding of 2 to 3 per cent of ordinary 40 per cent formaldehyde to the washing water the first time the wall is washed after painting, in order to prevent the paint film from absorbing water and to toughen its surface to abrasion, is recommended. Washers are cautioned to always start at the bottom of the wall and work up. Otherwise the water will run down over the soiled dry wall below and cause streaks that may be very difficult to remove.

Hughes Cleaver, M.P. Answer Manpower

Commons In the House of Commons on Tuesday, June 24, Hughes Cleaver, M.P. port, as follows:-

 History of Current War The story of the part being played in this war by each of the war department's three commands-the army ground forces, army air forces and services of supply-is being recorded on a current basis separately by each of the commands.

Each command has historical officers within its units who co-ordinate their work with that of the command is ordnance department, under the services of supply, has its own historical officer, etc. The main emphasis in each history is to be laid upon administration, giving a full record of the administrative structure and operation of the major bureaus and offices of the war department-not only what the offices did,

The various historical officers, however, are not restricted to the administrative field. Provided they perform this primary duty, they are authorized to undertake such other types of history as their command-

ing generals direct. A guiding principle of all the historical sections is to obtain material while it is still fresh and available, not only in written records, but in the minds of those who have created new fighting organizations at the same time that they are turning civilians into soldiers. One of the principal reasons for the collection of historical material on a current basis is to provide an accurate and dispassionate record of events for the use of future generations. In addition to recording the things that were well done, for future imitation,

# Resow Tobacco Beds After

Cold Weather, Expert Says Tobacco growers should remove the canvas from their beds and broadcast from one-half to threequarters as much seed as was originally sown after very cold weather, E. R. Collins of North Carolina State

college advises. The canvas should be replaced as soon as the beds have been resown, continues Dr. Collins. If young plants were just coming through the ground when the heavy freezes occurred, many probably would be killed or left in such a weakened condition that they will not make healthy, fast-growing plants.

The soil was softened by the freezes and the seed sown now will become imbedded with a light covering favorable to germination. Plants from these seed will grow rapidly when weather conditions are

If the young seedlings were not killed by freezes, the newly sown seed will not interfere with the early plants. However, if the original plants were killed or severely weakened, the new plants from the present sowing will assure the grower of a good stand of vigorous plants.

Clippers See Duty

Pan American Airways' giant transatlantic Clippers, shrouded in wartime camouflage as they fill their important assignments in the United Nations air transport activities, in the first year of World War No. 2 have flown millions of miles in crossing the Atlantic many hundreds of times.

1942 passenger traffic, virtually all of which bore government priority, exceeded that of the previous year by about 140 per cent. Reflecting too, the importance of speedy and safe transport of vital cargoes were the impressive increases in the express and mail loads carried by the 84,000-pound flying boats. The poundage of express carried exceeded millions, compared with a few thousand pounds carried in 1941, the first year for north Atlantic air express. The mail load for 1942 was also in the millions of pounds and was nearly double that for 1941.

Trees Have Many Uses Western farmers and ranchers, as well as town-dwellers, are sold as to the value of trees. Tree shelter belts about ranch buildings have important long-term value. They divert air currents up and over the building area, and fuel saving for the tree-protected dwelling has been estimated as being as much as onethird. There are a score of advan-Lawns, shade, final sale value of property are to be counted.

Ladies . . please do your travelling between 9 a.m. and 4 p.m. to avoid rush hours when war workers have to be carried. Leave children at home to make room for essential travellers. Avoid Friday, Saturday and week-end travel. Do everything you can to ease war-time travel congestion and avoid inconvenience and discomfort.
