DOWN SHE GOES!

With a Wood's Electric Milk Cooler you get Fast, Dependable Service at all times, the type of cooling that up-to-date dairy farms have to have. Thousands of Canadian Dairy Farmers use the Wood's Cooler for this reason.

FAST

Rapid circulation of the water is the reason for the high efficiency and fast work of the Wood's Milk Cooler. This rapid circulation of the water carries the heat away from the milk as fast as it comes through the can—and carries it to the coils quickly, preventing ice formation which would slow up the cooling process. This principle makes Woods the fastest and most economical cooler.
