Brevities

—Milton Fair a week from Friday and Saturday. Plan to be there.

—Acton Boys' Band will play at the Milton Fair instead of the Lorne Scots as first announced.

—Entries now coming in for Milton Fair indicate a very fine show this year. The prize list is certainly attractive for exhibitors in all classes.

—A call has been extended to Rev. John Riddell, Milton, to accept a charge at Tillsonburg and Windham Centre according to the Presbyterian Record.

—A miscellaneous shower was held at the home of Mrs. W. Donald Barnard on Monday evening in honor of Miss Jean MacNabb. The bride to be opened her many gifts under a pretty pink and white umbrella in the presence of about thirty guests.

—At 6.15 Sunday evening Milton Fire Brigade answered a call to the home of Mr. Robert Onley on John Street. Fire had broken out on the roof of the house which apparently had been caused from a spark from a bonfire which was burning in the back yard. The firemen soon extinguished the blaze with small property damage.

POLITE POLICE TEACH 'EM TRAFFIC MANNERS

LONDON (CP)—London police are conducting a drive to make motorists "traffic conscious" after six years of war-curtailed motoring, and are very polite about it.

Motorists who park in crowded streets have been pleasantly surprised at the gentle, "Please don't do it again," from policemen. Others whose names were jotted down in a little blue book have received a written caution instead of a summons.

TRUCK GARDENS GROW ON JAP BATTLEFIELDS

DETROIT. (CP)—Pacific Islands seized from the Japanese now are being farmed with American-made equipment by soldiers and natives working under the direction of the Foreign Economics Administration. The FEA farming representative landed on Guam nine days after the island was taken.

Plows now are turning up garden furrows in the Fiji, New Hebrides, Admiralty and Marianas islands. Four thousand five hundred acres are now under cultivation on Guam, Saipan and Tinian.

"The Guam natives are by nature the most mechanically inclined people I ever saw," said A.C. Browne of Palo Alto, California, one of 15 FEA agricultural experts engaged in the promachinery," he said on a visit to Detroit.

The gardens are started by request of the military command. After the ground has been cleared of brush, trees, and the debris of battle, the farmers go to work with any material at hand.

ALMOST TOO LATE

One of the most important features of the work of the Canadian National Institute for the Blind is in connection with the prevention of blindness. Colonel L. A. Baker, managing director of the Canadian National Institute for the Blind who lost his sight in the last war, has often made the remark that sight seems to be more highly prized by those who have lost it than by those who retain it. The importance of care in the treatment of eyes beginning to show signs of defect is one of the Colonel's favorite themes.

The Canadian National Institute for the Blind does not attempt to look after everyone in the country with defective eyesight; that would be a job outside its scope and its means, but in cases where eyes are so badly affected by disease or injury, that there is danger of total loss of sight, the Institute endeavors to arrange that proper treatment is provided. There are a great many people in Ontario to-day who are able to go about their work with useful vision because of the assistance provided for them by the Canadian National Institute for the Blind.

The Institute depends for its maintenance and the extension of its activities on the support derived from the public.

In Milton on September 22, 1945, there is to be a tag day. It is under the auspices of Mr. George E. Elliott and the Milton Boy Scouts.
