Brevities -

—May we remind you again to examine the label on your paper this week.

—The snow falls get more and more regular and it looks as if this one might stick.

—There will be no election in Milton on Monday but a second nomination will be necessary.

—Mr. R. J. Hare has received word that his grandson, F.O. Charles W. Hann, now of Toronto, has been awarded the Distinguished Flying Cross.

—Mrs. MacKinnie of the Milton Beauty Parlor has kindly offered to give a \$10.00 permanent which will be drawn for at the Red Cross Christmas Tea. The quilt on exhibition in Fred Mills' window will also be drawn at the same time.

URGES FARM REFORM FOR SOUTH AFRICA

CAPE TOWN (CP) — An exhaustive survey of the present farming policy in South Africa has been published in the form of a report issued by the Social and Economic Planning Council. The report sets out urgently-needed reforms and criticizes the present tendency to keep prices above the levels in overseas countries.

The recommendations include considerable reduction of the number of people on the land, with the creation of non-farming occupations in both the European and native areas and reorganization of the department of agriculture.

The council found that most farms of Europeans were owner-occupied and that about half the owner-occupiers have cash incomes of less than 200 pounds (\$900) a year. More than half the tenant farmers earn less than 100 pounds in cash. The council's report added that the average farmer needed a higher standard of education than the average artisan, but the general standard of education was low.

50 HOURS WEEKLY SPENT ON CHORES

LONDON (CP)—Nine million British women do all their housework unpaid, averaging a 50-hour week on household chores, says a report prepared by Political and Economic Planning which recommends production of cheap, labor-saving devices as essential to raise the standard of living.

The survey entitled "Report of the market for household appliances" was begun in 1943 at the request of the Board of Trade and provides estimates of the probable demand for various types of equipment during the first 10 post-war years.

Eighty-five per cent. of the British national income is earned by families with incomes below 500 pounds (\$2,250), the report said, and those in lower income groups could not finance expensive fixtures. A family earning less than 160 pounds (\$720) a year could not spend more than one shilling a week on household equipment, whereas even at 2s 6d. it would take five years to pay for a 25 pound refrigerator.

In suggesting that homes without electrical wiring or carpets had little use for vacuum cleaners, the report showed that before the war only one in three homes of families earning less than 300 pounds a year had a piped water supply, and among families earning less than 160 pounds the ratio was one in four.

Among 3,000 seamen who came to merchant marine rest centers, 18 per cent. were alcoholic addicts; 15 per cent. stated that they do not drink at all. The overwhelming majority of all the addicts do not drink at all on board ship. A few men go to sea for a forced respite from liquor.

VITAMIN C RELIEVES SULFA DRUG ILLNESS

NEW YORK (CP) — Use of vitamin C to relieve the illness that sulfa drugs cause in some persons is reported in the Ohio State Medical Journal by Dr. Harry N. Holmes, head of the chemistry department, Oberlin College.

He quotes several physicians who said large doses of vitamin C relieved the sulfa illness and enabled their patients to take the drug.

Dr. Holmes says that probably this vitamin will remedy the cases of sensitization to sulfas that worry the medical profession. Sensitization means that after a small dose of a sulfa drug a person becomes sensitive so that afterward not even sulfas can be given even to save their lives.

Because of this risk, druggists in some places have been forbidden to sell any sulfa preparation to the public without a physician's prescription. This includes the sulfa drops used for colds and adhesive bandages containing sulfa preparations.

Weakness that lasts a long time is one discouraging after-effect of sulfas. Dr. Holmes reports a medical experiment with 10 college students which indicates this weakness is not due to the sulfas but to loss of vitamin C. The experiments showed that while the sulfas were being given to the healthy young men their excretion of vitamin C was doubled. The loss of the vitamin, Dr. Holmes said, made them weak. Giving massive doses of this vitamin while sulfas are being taken is the remedy.

Dr. Holmes reported that cases of skin trouble in workmen had been mostly cleared up in industrial plants by daily skin doses of vitamin C. These skin troubles were due to poisonous substances and the vitamin acted as a purifier in the body.

RECORD FISH SHIPMENT TO UNITED STATES

More than 1,815,000 pounds of frozen fish were shipped from the Maritimes to the United States over the Canadian National Railways lines in September, a record for any 30-day period. Ninety C.N.R. refrigerator cars went 194,040 miles, some as far as San Francisco. With meat rationing, Canadians are eating more fish too. In the same month, 302,446 pounds were carried in 14 C.N.R. refrigerators to all sections of the Dominion.
