Socialism Doesn't Solve Our Problem
 By R. J. DEACHMAN

Socialism has its uncomfortable moments. It hugs the delusion that everything which now vexes the spirit of man can be remedied by controls. Controls have been tried and what have we? Much trouble and vexation of spirit. The problems of this world are rarely settled in the light of fullsome fashion our Socialist friends imagine.

NESTING TIME

The weeks now coming on are a time of great interest to lovers of nature, as these are the days when the birds are building the little nests which will be the homes of their young. There is a thought of romance about these nests and the affection of the birds for their mates and their children is charming to see. The patient labors of parent birds as they dig up worms and bugs to fill the mouths of their offsprings, are one of the most beautiful pictures in nature.

Good Seed Pays Good Dividends

Every bushel of seed that is put into the soil may be considered as an investment. The crop returns will determine the soundness of such an investment. The use of good seed is a factor entirely in the hands of the farmer and as strong, vigorous plants are naturally better able to withstand the possibility of a poor season, the use of any seed but the best is a gamble.

There is a vociferous demand for a return of price ceilings, without, of course, any ceilings on wages. If there is difference of opinion between two points of view most people are quite willing to settle it their way believing, devoutly, that their wish is the common wish of all.

LONGER LIFE FOR ROOFS

Here's how to make your roof last longer. Keep gutters, spouts, and the roof itself clear of leaves, stones, twigs or other litter so that water will not back up under the shingles. Trim tree branches to prevent them from scraping the roof in a windstorm. And, stay off the roof as much as possible. When necessary to go roof climbing wear sneakers or rubber-soled shoes.

With modern seed cleaning equipment there is little excuse for using seed that is ungraded or contains weed seeds. Seed that does not germinate well may also be considered a hazard in crop production and should be looked upon with suspicion.

Mr. Mosher, President of the Canadian Congress of Labor, an affiliate of the C.C.F. has put his seal upon this point of view. He is also President of the Canadian Brotherhood of Railway Employees. When the news came out about the 21% increase in freight rates Mr. Mosher was right on the job: "21% was not enough the railways should have had more than 30%."

The American Government took over the railways in the first Great War and raised wages. Freight rates followed up. Then in time came a depression, volume of traffic declined, business fell off. Railway wage rates were at the top-most peak, real earnings of railway workers reached new heights.

ESSOTANE GIVES THE HOTTEST FLAME!

Now all these things are to be settled by Boards. It's quite impossible. Politicians cannot determine prices, there is always a dispute between the buyer and the seller. Only the open market can render justice to all.

The market records the price as it is. If it is wrong for a time it moves into line with consumptive demands but Boards and Governments must fix prices in accord with what the sellers think they ought to get. The views of powerful groups is not always a safe guide on broad national issues. The right solution is the one which functions in the general rather than in the particular interest.

But that's not all—we do not want one thing in Canada, we want two or more but we don't want to pay for any of them. There is wide spread indignation over the banning of "oleo", even though the farmer can't or won't supply us with butter. There was a storm of protest in our cities when the Milk Board raised the retail price of milk to something approaching half the price of beer. There are a good many people who want to put the nation into a straight-jacket—their job being to tighten the strings.

But that is not all, our farmers resent the order forbidding them to ship their cattle to the profitable American market. Under Socialism prices are to be fixed and regulated by Government fiat and as one section of the country wants prices reduced and the other wants prices raised the "Boards" which fix prices will not have their troubles to seek! We, who have known liberty may never realize its true value till we lose it.

MAPLE PRODUCTS SWEETEN CANADIAN-U.S. RELATIONS

Our neighbours south of the border like Canada's maple products. To prove it they bought nearly all of our maple syrup and maple sugar export in 1947, according to a resume in Canadian Grocer of DBS figures.

Maple sugar exports to U.S. totaled 397,497 gallons, costing \$1,320,000, while 4,352,143 lb. of maple sugar valued at \$1,822,654 went to the States. Small amounts went to Newfoundland, France and the Bahamas.

FRIDAY, MAY 21st
 Commencing at 2 o'clock, D.S.T. the following:

CATTLE—6 Shorthorn Heifers—Red Heifer, bred Feb. 20th; Red Heifer, bred Feb. 22nd; Red Heifer, bred Feb. 26th; White Heifer, bred Mar. 25th; Red Heifer, bred April 11th; Red Heifer, bred April 30th. These Heifers are bred to a pure bred Shorthorn Bull and should make good milk cows for next winter.
