DECEPTIVE BAG

There's a plastic shopping bag which looks like a purse but expands to a 16-inch square bag, notes The Financial Post. It's made of 12gauge, heavy plastic and sewn throughout with nylon thread.

One of nature's best conservationists is the beaver. Their ponds form natural reservoirs, holding water in time of flood and providing water for emergencies. stock yards of Canada literally de-

BOOM OR BUST?

With a new year ushered in and now underway, predictions for the 12 months ahead are numerous. One noted economist, famous for business predictions, stresses the importance of the "get out and sell" theme for the businessman who wants to keep "above water." The importance of advertising--good advertising -- is important to everyone. Advertisements in the home town paper enjoy readership much greater than similar ads in larger mediums at much greater cost.

The progressive merchant of today can not afford to miss visiting his customers through consistent advertising in the local paper.

In advertising, it's the steady pull that counts.
