## Whooping Cough Is Usual, Not Serious

Board of Health officials expressed no concern over the present number of whooping cough cases existing among young school children at the present time. It was pointed out that while a large number of children were coughing, the number that had been reported to the Board of Health as whooping cough was far from epidemic prop-

Parents were advised to have their children examined if they showed any signs of a cold in the event that they might be infected with whooping cough. Medical diagnosis would reveal the proper course of treatment that should be taken. It was pointed out that it was not unusual for whooping cough to break out at this time of year.
