Prefabrication Firm To Build Factory
Brampton council indicated willingness to accept an offer from Lawrence Building Specialties, Toronto, of \$4,250 per acre for a parcel of land in the town's industrial area on Queen St. East. The parcel, lying next to that sold to Chr. Hansen's Ltd. comprises about four and a half acres fronting on the highway.

Finlay Munro, company representative, accompanied by Max Rice, of Rice Construction, waited on council with a proposition which appeared to meet with favor provided certain requirements were met.

Gray Coach Lines

Some farmers in the picturesque, low-lying Suffolk Broads district of England bring in the hay by water. So it was logical for a British boat builder to use light-weight aluminum to produce a 650-pound punt capable of carrying a load of hay more than six times its own weight.

In Canada aluminum is better known among farmers as a non-rusting, heat-reflecting, easily handled material for barns and roofs and silos... though of course it has many other farm uses, from milk cans to windmill blades. No hay-boats, though.

ALUMINUM COMPANY OF CANADA, LTD. (ALCAN)
