

HOW BOUT THAT

SPECIALLY PREPARED FOR THE CANADIAN CHAMPION

P.C. Candidate Dinner Speaker At Gathering

A Progressive Conservative Government will make more opportunities for young Canadians, according to Alexander "Sandy" Best who addressed a large group of Halton young P.C.'s at Hawthorne Lodge, Milton, last Saturday night.

Those attending were guests of Stanley Hall, M.L.A., who introduced Mr. Best, Halton County Progressive Conservative candidate, and John Pallett, PC Member of Parliament for Peel County.

"Hundreds of young Canadians now go to the United States where better opportunities await them," said Mr. Best. "The Progressive Conservative National Development Plan would stop this export of brains. By lowering taxation the Progressive Conservatives would encourage greater industrial development and increased manufacture of Canadian raw materials in Canada," concluded Mr. Best.

Milton's Community Art Club

Last summer Mrs. Elizabeth Roberts, 424 Mountain View, and Miss Mary Macrae, 71 John St., attended the Leaders' Institute held at the O.A.C. in Guelph.

This was a course to train amateur artists to teach in night schools.

What a week! Mornings we attended lectures by Mr. Gordon Couling and Mr. L. Minshall. Afternoons we went dashing around the countryside sketching.

The first afternoon, I paid my first and last—hope!—visit to the Guelph Reformatory. The grounds are simply beautiful. But I didn't stay long as a man with a rifle invited me to leave!

Anyone who is interested in art, or teaching it, who would like an informative and interesting week, attend the Leaders' Institute in Guelph, July 22-26, by all means.

United Church Club Hold April Meeting

The Helen Blair Auxiliary of St. Paul's United Church held its April meeting in the form of a pot luck supper in the Sunday school, with 31 members and guests present. Lillian Smith presided for the business meeting after the supper. She opened with a poem followed by the singing of an Easter hymn.

Irene Gilbert presented the devotional, the theme of which was an Easter message. Thelma Bousfield drew attention to an article in the Missionary Monthly on Christian Stewardship. Completed work for the Supply project was turned in, and it was decided to hold a work meeting May 4 at the home of Mary McEachern to finish it up.

Lillian Smith gave a report on the Halton Presbyterian meeting in Georgetown which several members had attended. Wilk Gillin introduced Mrs. George Brownridge, Christian Stewardship Secretary of the Halton Presbyterian, who gave an inspiring talk on God's transforming Light. She compared Christians to a traffic light directing people in the way to go, and illustrated her talk with various references to Biblical passages concerning light. Lily Houston expressed the appreciation of the group to Mrs. Brownridge.

The meeting closed with the Benediction.

Milton Motor Sales

SPECIAL SPRING TUNE-UP FOR ONE WEEK

Spark plugs cleaned and tested	
Distributor points cleaned and spaced	
Check and set timing

Residents Urged To Have X-Ray

Dr. Archie F. Bull, Medical Officer of Health for Halton County, urges all residents to get free chest X-rays in the T.B. clinics which will be surveying the entire Milton area next week.

Dr. Bull made this statement, "Tuberculosis plays no favorites. In its early stages, T.B. usually has no outside symptoms. Only an X-ray tells you the inside story. You'll feel a whole lot better if you know your chest is okay, that neither you nor your family has T. B. Spend the little time it takes to be sure. It's the best investment you'll ever make. Visit the T.B. clinic in your locality."

Clinic sessions will be held in the Agricultural Hall in Milton on May 2nd and 3rd. Hours are from 2 to 5 p.m. and 7 to 10 p.m. daily. All adults and children of 12 and over receive chest examinations free of charge.

NO REFERENDUM

GIFFARD, Que. (CP)—Municipal council of this Quebec City suburb rejected requests for a referendum on the question of ending prohibition in the municipality.

LONG AND SHORT

WINDSOR, Ont. (CP)—Bakus Boutros, reporting he was assaulted and robbed of \$10 while walking along the street, described his assailants as a Mutt and Jeff team—one tall, the other short and fat.

Fire Chief Has Hints For Spring Clean-up

Keep in mind as you get ready for spring and summer around your home that now is also a good time to correct many of the worst fire hazards in and about your house.

This spring clean-up reminder comes from Fire Chief A. E. Clement, who says also that the clean-up habit is one of the surest ways to keep fire from harming your house and family. Here are some of the clean-up chores he recommends as most important:

(1) Throw out and completely get rid of all old magazines, newspapers, clothing, rags, mattresses, and broken and unused furniture and other junk from attics, closets and basements.

(2) Clean up winter rubbish in the yard and get rid of dried weeds and dead underbrush from around the house and from nearby vacant lots and area ways.

(3) Clean up your home workshop and the basement work bench—get rid of shavings, oily rags and old paints and oils.

(4) Clean up and have a competent service man oil and repair all electrical appliances and motors.

(5) Inspect and clean up your furnace, chimney and stoves.

Some Queries About Freezers

These are the most commonly asked questions about home freezing, according to a survey of leading freezer manufacturers.

Q—How cold should a freezer be kept?

A—Science has established that near-zero temperatures are adequate. "Way below zero" cold unnecessarily increases costs.

Q—What wrappers and containers are necessary for home freezing?

A—Any container with a tight-fitting lid and materials like cellophane or polyethylene will keep frozen foods moisture and vapor proof.

Q—How long does it take to freeze foods?

A—A good rule of thumb: leave the foods in contact with the freezing surface overnight.

Q—Can cooked foods be frozen?

A—Yes. It's a time-saver to make combination dishes like stew, spaghetti and meat balls in quantity, and freeze for future meals. But cool the food thoroughly before placing in the freezer. The meals will keep for about a month.

Q—What about frozen sandwiches?

A—They keep very well. But make certain each is wrapped separately in moisture-proof material.

Q—Can dairy products be frozen?

A—Good butter, properly wrapped, will keep more than six months. So will most cheeses, excepting cream, or cottage cheese.

Q—How long will poultry keep and how should it be stored?

A—Poultry will keep for about one year. It should be dressed, and can be disjointed. Make certain it's cool before placing it in the box. Once cooked, it will keep for several weeks.

Q—How do meats compare for freezerability?

A—Beef will keep for a year or more. So will lamb and veal. But pork, bacon and ground beef should be used up much more quickly.

Q—Is it necessary to thaw meat before cooking?

A—Acceptable results are obtained by either thawing or cooking in the frozen state. If you thaw, do it slowly to prevent the loss of meat juices.

Q—What vegetables do not freeze satisfactorily?

A—Those which are usually eaten raw—lettuce, cabbage, celery, tomatoes, cucumbers, onions and radishes.

Q—Is there a trick to freezing vegetables?

A—For preserving flavor best, you should scald the vegetables either in boiling water or over steam. Cool quickly and freeze.

Q—Is it necessary to blanch fruit?

A—No. Blanching fruit merely protects the color. However, experts say that packing fruit for the freezer in syrup is far better than packing it in sugar alone.

Q—Who can answer further questions about freezing?

A—Your Provincial Agricultural Experiment Station will answer your questions, or direct you to the answers.

If you could
WOULD YOU SAVE YOUR FAMILY—
... from a fire ... from
a killer ... from TB?

Of course your answer is YES to all three! For you know TB is a killer ... it can spread like a fire.

If you've got TB your family can get it from you. Make sure you don't have Tuberculosis.

If you do have TB you'll be told how to get well and protect your family from it.

Traffic Jams Obstruct Flying

The big obstacle to flying progress today is not weather, not economics, not accidents, but traffic problems! This is the view of an article, which states: "Air traffic control has become the bottleneck of aviation."

Airline pilots report an average of four "near misses" a day, and in one out of four of these cases, the clearance is 100 feet or less, the article claims. Civil air authorities govern only blind flying traffic—airplanes in clouds—and the traffic near airports. In blind flying, this control provides a protective "box of air space" around each pilot in flight. This space is ten miles broad, 1,000 feet high and 25 to 100 miles long, depending on the plane's speed. No other plane is allowed to enter it.

The pilot "blesses" the moment when he is swallowed up by clouds," says the article, "for then he can dismiss traffic worries."

To avoid the most serious traffic hazard—collision in visual flight—the pilot must "look where he's going." But since the modern plane is flown mostly by instrument, the pilot cannot look outside more than half the time. Between looks, a fast-moving plane may hit him from above or below.

At airports, traffic-control officials face the complex problem of bringing in and sending out scores of planes a day. When several planes converge on an airport, the protective "air box" of each must be sharply reduced. Safety then depends partly on the fallible factors of human sight and judgment. Jet airliners will vastly increase the airport-traffic problem.

In January, 1957, construction was started on 1,710 new homes in Canada, compared to 4,183 in the same month of the previous year.

"THE MARTINS AND THE 'COYS

they were reckless mountain boys ..."

Feudin' - fightin' - fussin' - shootin' each other up — and what did they get for it?

There's a new feud in the "north forty" these days. But there is a difference ... In this feud everybody gets shot ... everybody wins ... and NOBODY gets hurt — (except those who don't play!)

The feud? ... against TB! The shooting ... with x-rays! The winners? ... those who get "shot" with x-ray and prove to themselves they haven't TB.

Join the feud ... be a winner ... get all shot to Health.

High single for the day, Elinor McKerr 267; high triple for the day, Jean McDuffee 694.

CAMPBELLVILLE

Easter Service Held At Blair Auxiliary

Mrs. D. Inglis was hostess to the Blair Evening Auxiliary for the Easter meeting. Mrs. Hambly opened the meeting with the poem, The Stone is Rolled Away. The Easter service in the Glad Tidings was used with Mrs. S. Cramp leading in the scripture lesson found in Matthew 28 and Mrs. R. Mahon offered prayer.

Mrs. Greenlees was the guest speaker and based her thoughts on the second chapter of Solomon, giving a pen picture of spring in Palestine. "The winter is past, the rain is over and gone, the flowers appear on the earth, the time of the singing of birds is come", etc. This is something everyone is looking forward to. Spring is a time of hope. The great promise of Easter is the Resurrection. To believe in the unseen demands our faith.

The roll call was answered using the word Crucify. The offering was received and dedicated by the president, who also closed the meeting with prayer.

NEW SLANT

WINDSOR, Ont. (CP)—David Armstrong and his family intend to sell the remarkable four room house they bought last August, because a fourth child makes it too crowded. The house, one of the oldest in Windsor, slants on a 20-degree angle.

RUSE FAILED

SUDBURY, Ont. (CP)—A police constable testified in court that a car driver painted his 1956 licence plates white and black to make them resemble the 1957 plates. The driver, who said he couldn't afford new ones, was fined.
