PUBLIC SCHOOL ARTWORK occupied a large display space in the agricultural hall, during the weekend fair. Directors Mrs. J. H. Robertson and Mrs. G. McGibbon put the last of dozens of entries in place on a display wall. Crowds filled the display buildings many times during the two-day fair, despite windy and cool weather that cut the attendance.

THE "FUDGE JUDGE" at Milton Fair, Mrs. H. A. Dickenson of Mount Hope, just shrugged her shoulders and waded into the task, when directors confronted her with a record-breaking 73 entries in the children's chocolate fudge competition. Double prizes had to be awarded because of the number of entries and high quality. "And right after breakfast," wailed the judge, as she began sampling the first of 73 entries.

Heat System Causes 13% of Canada's Fires

Fires caused by Canadians are losing more than \$120,000,000 in fire damage each year and faulty heating systems cause more than 13 per cent of these fires, according to the All Canada Insurance Federation.

With winter approaching, the Federation recommends that the following precautions be taken to insure that your home is not needlessly destroyed during the cold months to come.

1. Choose only recognized and approved home heating equipment.
2. Have qualified workmen install the equipment.
3. Keep stoves and furnaces clean and in good repair.
5. Install metal flashing at

points where pipes and chimneys pass through walls or partitions.

6. Use only clean, first-quality fuel.
7. Store spare kerosene and similar fuels in a safe place, preferably away from your home.
8. Use fireplace screens to prevent sparks.
9. Have chimneys cleaned and checked.
10. If you doubt the safety of your heating equipment, ask your local fire department for advice regarding inspection.

4. Fireplaces, stoves and furnaces should be insulated to prevent combustion of surrounding walls.

Through the Homemakers Service of the Canadian Red Cross, trained workers in 35 communities visit homes where the mother is ill, feed and care for the children perform the household tasks.

Neglect of Children Can Bring Two Years

For a compassionate community, there can be no sadder news than the death by fire of children in the home. The shadow deepens when the headlines read, "We left them alone only for a few minutes . . ."

For the stricken family, the shadow lasts a lifetime.

No child (and for that matter, no very old or dependent person) should ever be left alone. This is a vital message from Canada's fire services, not just for Fire Prevention Week but throughout the year.

There are various provincial penalties for callous neglect of children. And section 189 of the Criminal Code of Canada reads, "Everyone who unlawfully abandons or exposes a child who is under the age of 10 years, so that its life is or is likely to be endangered, or its health is or is likely to be permanently injured, is guilty of an indictable offence and is liable to imprisonment for two years."

Dick Group Plans Planetarium Tour

Plans for an interesting year were revealed at the recent opening meeting of the W. I. Dick Home and School Association. E. W. Foster, supervising principal, discussed the modern trends in education. D. Stinson, representing the school board, told of future plans regarding the purchase of the Martin St. high school.

The social convener Mrs. G. Pitman outlined the plans for the forthcoming year and announced a tour of the Planetarium at McMaster University would be held October 22.

Teach French? Mrs. E. Clutton on behalf of the University Women's Club, asked for the support of the Association for the proposal that conversational French be taught in the Milton Public Schools. R. Long, principal of the school, introduced the members of the staff and an enjoyable lunch followed the meeting.

The award for present attendance went to Mrs. Galloway's room.
