

BIMBO THE ELEPHANT was the main attraction when the circus came to Milton for performances Wednesday afternoon and evening of last week. More than 500 excited youngsters jammed the tent for the afternoon performances that started over an hour late. The circus was brought to town by the Milton Lions Club. Two youngsters are shown here as they try to get up enough courage to feed the Elephant.

Figures in Annual Report

631 Prisoners in County Jail

The Halton County Jail in Milton played host to 631 prisoners during the year ending March 31, 1964, according to a report on jail activities submitted this month to Halton County Council and the Deputy Minister of Reform Institutions.

Of these, 587 were committed during the year. They included 598 men and 33 women.

55 Cents a Day
Jail expenditures for the year totalled \$63,228.36, for an average per-prisoner cost of \$100.20. Food cost per day per prisoner ran to 55.36 cents.

Food cost \$2,987.82; clothing, fuel and maintenance \$2,520.85; officers' salaries and surgeon's fees \$55,327.88; and alterations and additions and repairs to buildings \$2,391.81.

Figures show the jail has accommodations for 28 men and three women. The prisoner occupancy ranged from a low of two to a high of 26, with never more than four women in custody at the same time. Average daily population was 14.48 and there were 226 days with no female inmates.

Liquor Offences
The majority of prisoners were committed for liquor and traffic offences. In all, 270 were placed there on charges of drunk or impaired driving, intoxication

or drunkenness, and other liquor offences (of which 250 were sentenced); and 74 were committed for careless driving, criminal negligence, driving while under suspension or without a licence, leaving the scene of an accident, and other traffic offences.

There were 39 admitted for breaking, entering and theft; 57 for theft and attempted theft, 25 for breach of the deserted wives and children's maintenance act, 22 for common assault and 13 for causing a disturbance.

5,397 Days
Among the prisoners were 86 "lock-ups" placed there overnight only. Prisoners spent a total of 5,397 days in the jail.

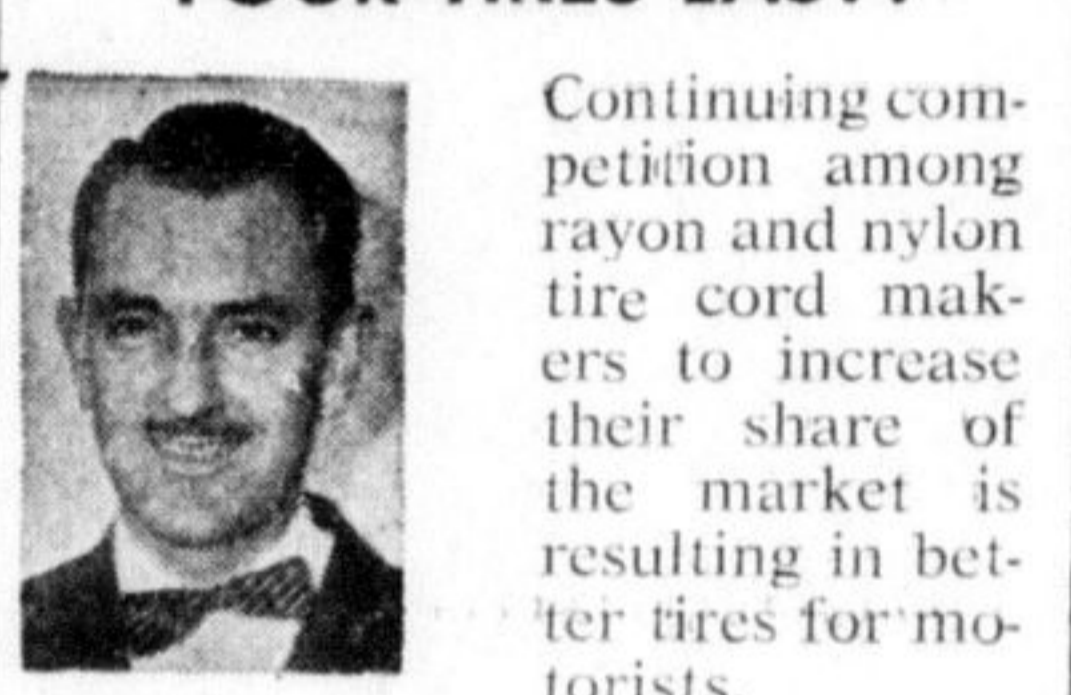

The largest age group was 205 in the 16 to 20 year group. There were 147 in the 21-29 age group; 117 were 30 to 39 years; 104 were 40 to 59 years; and 14 were 60 and over. Of the total, 341 admitted elementary education while 246 indicated advanced education (high school or better). Only eight were abstainers while 487 were listed as temperate and 92 intemperate. And 501 were Canadian-born compared to 19 English, Irish and Scotch, seven United States and 60 born in other countries.

Workers, Drivers
The majority held laborer and transportation occupations. On-

ly one prisoner was sentenced to penitentiary while seven ended up on industrial farms and 62 went to reformatory. Eleven were confined to the Ontario Hospital or other place of confinement.

Most prisoners left jail by paying a fine (258) but 33 went out on probation and 60 left on suspended sentence. The rest received sentences with most of these under one year terms.

HOW LONG SHOULD YOUR TIRES LAST?

Continuing competition among rayon and nylon tire cord makers to increase their share of the market is resulting in better tires for motorists.

Rayon today holds about 80 percent of the tire market due mainly to lower price, though its lead has been challenged in recent years by the stronger nylon cords. The competition has caused rayon cord makers to bring out stronger threads that come close to matching nylon in strength.

Nylon tire makers are working hard to reduce prices, but their big advantages are still greater strength and adaptability to recapping.

Your tires can wear out in less than 10,000 miles or last for 40,000, depending on inflation and speed. Underinflation of 30 percent, for instance, a fairly common occurrence, reduces tire life to 60 percent of normal.

By creating high tire temperatures, especially on under-inflated tires, high speed can cut tire life drastically. Taking "normal" speed at 50 MPH, a continuous speed of 80 MPH would increase tread wear fourfold. Reducing continuous speed to 40 MPH will produce a bonus of 41 percent increase over normal.

To protect your tire investment, check your inflation each 500 miles with the tire cold. It is a serious mistake made by many motorists to deflate their tires during a long trip when they will be driving at high speeds. A warm tire naturally registers greater inflation poundage due to heat expansion which dissipates as the tire cools.

LET'S CLEAR THIS UP!
We hate to keep pestering, but the Swimming Pool Fund is still a little short of its "Drown the Mortgage" goal. If you haven't mailed in your contribution, please do it today. We'd all like to be able to point with pride to Milton's new pool and say "It's all ours and it's all paid for." Won't you help clear up the debt?

Record \$1 Per Share Earnings For Union Gas Co. Shareholders

Record earnings of \$1.00 per share were reported today by Union Gas Company of Canada, Limited, for the fiscal year ended March 31, 1964. Previous high was 93 cents per share, earned during the 1962-63 fiscal year.

In its annual report to shareholders, the Company notes volume of gas sales was up 5.9 per cent, to 52.9 billion cubic feet, and revenue from such sales rose 4.6 per cent, to \$50.8 million, up \$324,000 from the previous year.

Increase Customers
Consolidating the operations of Union Gas with those of its subsidiaries — Ontario Natural Gas Storage and Pipelines Limited, United Fuel Investments, Limited and United Gas Limited — the report shows a 4.8 per cent increase in total customers, to 261,154, as of March 31, 1964.

Because this past winter was about 7 per cent milder than the previous winter, residential gas consumption was down slightly (1.3 per cent) and the increase in commercial usage was less than the average annual rise over the previous five years. In contrast, industrial consumption was up 16 per cent.
