

**RESTYLED AND BUILT** on a 121-inch wheelbase, the 1965 Dodge from Chrysler Canada Ltd. represents an entirely new conception in motoring beauty and function. Engine and suspension system refinements enhance the operation and riding qualities of the new Dodge for 1965. Pictured is the Dodge Monaco two-door hardtop.

## New Beauty in Beauty, Dimension In Improved, Restyled 1965 Dodge

Longer, wider, lower, the 1965 Dodge introduced today by Chrysler Canada Ltd. presents an entirely new concept in automobile beauty and dimension. It's on display this week at Bell Bros. Ltd., Milton dealer.

Completely restyled, and built on a 121-inch wheelbase, the new Dodge provides large door openings and the maximum in interior comfort, with noticeable increases in leg and seating room, while engine and suspension refinements enhance the traditional Dodge reputation for outstanding performance and ride.

### Curved Side Windows

The new exterior impression created by the 1965 Dodge is dominated by a full-length contour body line and curved glass windows. Simplicity of design is emphasized by the discreet application of chrome and the crisp, functional front and rear end treatments.

The combination of expansive grille and massive bumper shape gives the front end of the car a broad, solid mark of quality. The bumper is deep-skirted, and its top surface follows the contour of the lower grille opening, presenting a smooth and even flow of lines.

Roof panels are all new and appear thin in silhouette, yet they provide firmer support due to a new roof support construction pattern. The curved side glass in the windows, a new fea-

ture with the 1965 Dodge, lends a graceful air to the upper structure of the vehicle. Power windows are optional.

### Contour Line

Clean body contours characterize the new Dodge profile. Especially attractive is the distinctive contour line that circles the rear wheel line.

Viewed from the rear quarter, the 1965 Dodge is particularly impressive. The large, delta-shaped tail lights angle inward towards the deck surface, giving the vehicle an exclusive identification.

Top quality vinyls and nylons are used for all interior upholstery to complement the exterior decor of the vehicle.

An all-new instrument panel, lowered to give increased road visibility, is a highlight of the interior appointments in the 1965 Dodge. It is featured by a square-shaped speedometer with exceptionally large figures to provide immediate mileage and speed readings. All other gauges are clustered to the left of the speedometer, with the illuminated slide-type heater controls to the right.

### Passenger Comfort

The entire new body of the 1965 Dodge provides additional passenger comfort. All leg, hip and head-room measurements have been increased. Additional corrosion protection

for the front end sheet metal is provided by full front wheel-houses. These shield the inner surfaces of the fenders from water, mud, salt and other corrosive elements.

A new fresh air, cooling and heating system operates quietly and effectively to provide a right degree of comfort for occupants, in both front and back seats, in all types of weather. Separately controlled fresh air ventilators are situated in the right and left sidewalls of the front seat area, with push-pull knobs to control the flow of air.

New, parallel-operating windshield wipers are another advanced feature with Dodge this year. The longer, 18-inch blades pro-

**RESERVE CHAMPION**  
At the All-American Dairy Show last week at Harrisburg, Pa., Ontario cattle took many of the top awards. Among local winners was A. H. McKane of Georgetown, whose "Emeraldale Citation Comet", owned jointly by Mr. McKane and Forest Lee Farms of Springfield, was first junior yearling bull and reserve Junior Champion at Western Fair and the C.N.E. The Ontario entry won the State Herd Class. Ebydale Farm, Kitchener, won the Senior and Grand Champion female award.

vide increased coverage, and airfoil design plus a higher-capacity electric motor assure maximum operation at all speeds.  
The 1965 Dodge provides a selection of engine powers to meet every motoring requirement.
