Plan Physical Fitness Class

Physical fitness classes will be included in the Milton Recreation Committee's summer playground program for the first time this year, recreation director Bob Small reports.

The summer playground programs, to be held at the J. M. Denyes and W. I. Dick schools and Rotary park, will get underway on July 5 and the 7 to 14-year-old youngsters attending will be tested daily in a standardized physical fitness program.

Events in the program will include dashes, standing broad

jumps, running broad jumps, pushups for boys and deep knee bends for girls, utility ball throw and softball throw. As the children improve they will earn red, blue and gold ratings.

LADIES' AWARDS in Lowville Bowling League this year were won by Shirley Davies (seated), high single at 308; Linda King, high triple at 685; and Marlene Morton, high average at 190. They received trophies Saturday at the group's wind-up banquet in the Union Hall, catered to by Scotch Block Women's Institute. New officers elected during the dinner were president Mel Davies, secretary Cec King and treasurer Linda King.

THE "B" CHAMPIONS of the Lowville bowlers received trophies Saturday at the banquet and dance in the Union Hall. In the front row are Marina King, Nellie Wilson and Meloris Hood. Standing behind are Bill Pegg and Bill DeForest. Serge Bertasson was absent for the photo.

NOTICE TO PROPERTY OWNERS Destroy Weeds

Notice is hereby given to all persons in possession of land, in accordance with the Weed Control Act 1960, Section 3, 13 and 19 - That unless noxious weeds growing on their lands, within the

Municipality of Esquesing

are destroyed by date of June 15, 1965 and throughout the season, the municipality may enter upon said lands and have the weeds destroyed, charging the costs against the land in taxes, as set out in the Act.

The co-operation of all citizens is earnestly solicited.

V. E. McARTHUR,
Weed Inspector,
County of Halton.

HARLEY...to HALTON

By DR. HARRY HARLEY, M.P.

One of the matters for discussion and adoption has been the proposed program of the World Health Organization for the five year period of 1967 to 1971.

This is a proposed program suggested by the W.H.O. to the member countries, on which they will give assistance, in varying amounts of technical and financial assistance. To give some idea of the scope of their activities, I shall briefly outline the program. The following have been under discussion.

Under Discussion

1. National Health Planning. This is used in a general sense and in Canada we would refer to this as Public Health. It does not specifically refer to medicare.

2. Communicable Diseases. None of these diseases, apart from tuberculosis, exist in Canada except rarely. These were mainly malaria, smallpox and many non-Canadian diseases.

3. Non-Communicable Diseases. These diseases exist in Canada as they do elsewhere. These were cancer, mental illness and cardiovascular diseases. Malnutrition is a severe problem in some areas but is rare in Canada to any extent.

List Topics

4. Environmental Health. This deals with measures of sanitation and in particular with the training of qualified personnel in this field.

5. Education and Training. The problem of training personnel in some health fields is extremely difficult. These include: health staff doctors and training in post-graduate fields such as public health.

6. General Interest Topics. General matters concerning the World Health Organization are international quarantine (such as smallpox and yellow fever) and statistics of disease in the world. One of the matters in which I am greatly interested is the procedures for evaluating drugs and promoting the exchange of information on drug safety and drug reactions.

Drug Safety

In the field of quality control or safety of drugs, it was brought out that two-thirds of the world population had no guarantee of any kind on their drug purchases that they were safe for use.

It was natural, therefore, that these countries would like to have a certificate of quality, not only from the drug manufacturer, but that the drugs passed international standards that would be set up by the World Health Organization. Laboratory checks by the World Health Organization were discussed but it was felt these were not practical.

Drug Reactions

The matter of adverse drug reactions was discussed. This is a reaction to a drug other than the expected reaction for which the drug is given. The United States and Canada now have both set up a system where the doctor notifies the Food and Drug Directorate of any unexpected reaction to a drug.

The United States has offered to take these reports from any country in the world, correlate all the reports together from anywhere in the world and give the information on drugs to the World Health Organization. They, in turn, would feed this information back to all the members, so that adverse reactions to a drug could be widely distributed over the world.

To me, this is one of the most

"Water Safety" Poster Contest

"Water Safety Week" in Milton, June 6-12, will be marked by a special poster contest sponsored by the Milton Red Cross Society. Students from Milton's four elementary schools who submit the best posters on water safety will receive free passes for the whole year to the Milton Community Swimming Pool in Rotary Park.

Red Cross officials will pick up the entries on June 7 and the names of the winners of the contest will be published in the June 9 issue of The Canadian Champion. Students from the three public schools, J. M. Denyes, W. I. Dick and Bruce St. and from Holy Rosary Separate School will be participating in the contest.

vital services the World Health Organization can perform - that of collecting, assessing and distributing information on reactions to drugs, so that episodes such as the thalidomide tragedy can be minimized, if not completely prevented.

PAYS DIVIDENDS

Straight thinking is good for us because of the many dividends it pays. So think straight and collect the dividends by preventing forest fires.

NOTICE TO PROPERTY OWNERS Destroy Weeds

Notice is hereby given to all persons in possession of land, in accordance with the Weed Control Act 1960, Section 3, 13 and 19 - That unless noxious weeds growing on their lands, within the

Municipality of Nassagaweya

are destroyed by date of June 15, 1965 and throughout the season, the municipality may enter upon said lands and have the weeds destroyed, charging the costs against the land in taxes, as set out in the Act.

The co-operation of all citizens is earnestly solicited.
