

# Sing "O Canada" in French At Commonwealth Day Meeting

By Mrs. William Watson  
Grades three and four at Kilbride school presented a Commonwealth Day assembly on Friday morning, May 21 with Joan Grisdold acting as chairman.

The children dramatized the Biblical story of the Good Samaritan. While the class marched into the auditorium carrying Canadian flags and a picture of Queen Elizabeth the senior students sang "God Save the Queen" in four parts.

"O Canada" Sung in French  
Short explanations concerning paintings done by the students were given to represent a trip across Canada. The entire school then sang "O Canada" with grade three and four singing one verse in French.

Four boys sang and dramatized a song called "Good Advice". Soloists for this number were Eric Veibl and Richard Willsher.

Katharine Newell and Mildred McKinnon played very enjoyable piano solos and David Sault entertained with his accordion.

The children worked very hard to present an impressive program on Canadian Citizenship.

## COUNTY OF HALTON WEED CONTROL NEWS

BY V. E. McARTHUR  
WEED INSPECTOR

### CHEMICAL WEED SPRAYING POPULAR

These are the days when we are apt to smell 2, 4-D in the air. Each year, more and more people are turning to chemicals to control their weeds. This is a very good trend, since it saves much time and labor down on your knees weeding, pulling or what have you.

For example, the spring dandelions are easily controlled with 2, 4-D Amine. Chickweed, Black Medic and other lawn weeds that are resistant to 2, 4-D can be controlled satisfactorily with products such as Silvex, Mecoprop (M.C.P.P.). For crabgrass, in the spring, several chemicals are recommended, e.g. Dacthal, Zytrol, Trifluralin and Bandane.

Any of the above weed sprays are available at hardware stores, feed stores etc.

### Watch New Lawns

One word of caution, though. If you have a newly seeded lawn, do not use anything stronger than 2, 4-D Amine. In the case any of these products, you may expect good results if you follow the manufacturer's directions. An inexpensive knapsack sprayer is a very good tool for the application of lawn weed killers.

Farmers are also weed spraying this time of year. Fence bottoms, meadows, spring grain etc., are among the areas of attack. However, perhaps the corn planting operation is re-

ceiving the most attention on the farm these days.

### Three Recommended

Atfazine, Simazine and Linuron are the three herbicides recommended and quite widely used to prevent perennial and annual weeds from reducing the grain corn yields. They may be applied as pre-emergence or post-emergence sprays and are in reality miracle chemicals for weed control in any kind of corn crop. They will kill all weeds with absolutely no harm to the corn.

Roadside weed spraying will also soon be in operation. Residents growing 2, 4-D susceptible crops such as tomatoes, turnips,

grapes, beans, tree fruits etc., in fields adjacent to roadways, are invited to post "2, 4-D Susceptible Crop" warning signs. This will aid municipal road authorities in spotting these susceptible crops.

These red and white signs are available free of charge from the Ontario Department of Agriculture Office, Milton, and from the Weed Inspector.

Smokey the Bear, forest fire prevention symbol in Canada and the United States, was rescued from a forest fire in New Mexico in 1950. He now resides in the Washington Zoo.
