

THE WATERS of Campbellville Pond have been inviting to swimmers this year and Ingrid Boonhouwer and Katy McLaren are seen eyeing the inviting area. There has been no recurrence of last year's problem of swimmer's itch and children are regularly splashing around in the lake. (Staff Photo)

LETTERS TO THE EDITOR

On Rosslake Park

About a year ago, a closing order was issued to Rosslake swim area by local government officials connected with the Halton Health and Safety Unit. To date, this order has not been lifted.

I believe it to be of interest to the public to reiterate the content of the ruling.

It seems that a swim area artificially constructed is classified as an indoor swimming pool regardless of size or shape and must, therefore, come under the same rules and regulations.

Rule 1: There must be shower baths erected on the beach.
Rule 2: Water must be periodically chlorinated.

Rule 3: A lifeguard must be on duty at all times.

I consider these regulations to be impractical and impossible to comply with. As a result, to operate ignoring these rules I face possible court charge.

The Rosslake swim area was originally designed with the intention of sharing its use with the public and rather than making it a legal battleground, I have, after careful consideration, decided on offering its facilities, as well as camping, and picnicking (tables when available) to the public with no admission or parking charges for the above mentioned during this season.

For those who wish to accept this offer there will, in addition, to facilities offered for free, recreational attractions namely: hayrides, horse and pony rides, cruise on the stern-wheeler "Ponderosa" at a nominal charge. A snack bar will be in operation for public conveniences.

In consideration of the interest shown by the public concerning the progress of this swim area I hope this letter will explain some of the difficulties I have encountered regarding its operation.

In closing may I thank the services of The Canadian Champion. Elsewhere in this paper, will be placed an ad concerning facilities offered.
—Joe Ross.

FOUR WEEK OLD GEESSE on the trout pond at Ray Olan's in Campbellville make an attractive picture as the parents shepherd the young ones around. The geese were the first to be successfully hatched at the pond and while the grandmother of the new family took over the care and keeping, the parents keep a watchful eye as the birds move around too.
