you'll never get out of it alive.

Science has shown and proven to us that the mentally retarded can be helped. They can be taught to help themselves. This training must be carried on in special classes under special supervision. The North Halton Association for the Mentally Retarded is making use of these new methods and techniques. Support their dedicated work by planting the Flowers of Hope seeds that you will receive. And please be generous when the canvasser calls.

Here's how the Progressive Conservative program for eastern farmers will assure:

a strong, profitable family farm.

The family farm has been fighting a losing battle. The average income per farm in eastern Canada is less than \$1,600 per year. Increasing costs of feed grains, non-marketable surpluses of butter, eggs, milk, the high cost of credit, and hit-or-miss government policies have driven many farmers from their land.

The Progressive Conservative Party program is planned to give the utmost assistance to family farm operations; to establish a program to convert marginal farms into paying farms. Here are the first steps that must be taken:

1. A permanent Eastern Agricultural Bureau — This permanent bureau for Eastern Agriculture would co-ordinate agricultural policies and conduct overall assessment of the most economic utilization of the great Eastern agricultural resources.

2. Feed grain — Transportation assistance to provide feed grains at reasonable prices for beef, dairy, hog and poultry farming. Assistance for forage and grain crops. Low interest rates to encourage extension of feed grain acreage. Increase emphasis on feeder lots and community pasturage. Better fertilizer subsidies.

3. Surpluses — Step up sale of agricultural surpluses to foreign countries. Initiate effective anti-dumping measures. Assistance to industries utilizing dairy products to eliminate non-marketable surpluses of butter, eggs, milk, skim milk powder and industrial milk.

4. Reactivate ARDA Program -Better co-ordinated and regionalized making it possible to deal more effectively with provincial agricultural agencies.

5. Livestock insurance — Through extension of crop insurance.

6. Review tax load on farmer -With a view to accelerating rate of depreciation on farm storage facilities, additional production buildi. gs and future land development.

Loans Act and Farm Credit Loans Act — To be tied in with province farm improvement funds. This would include extension of terms of repay-

7. Amend Farm Improvement

8. Seasonal duties — Review and up-date methods of protecting markets through a whole new approach to tariff, subsidy, quota, acreage control and license to produce in cooperation with provinces and pro-
