When it Comes to 'Fit' . . . this Man is a Fanatic!

He's one of the tailors we employ to make sure that your suit fits your body, not just any body. He knows that no-one else is built quite like you. That's why your suit will have you-shaped shoulders, sleeves that don't ride up. Collar that stays flat. Trousers that keep their crease. Jacket that is taped inside to reduce stress, retain its shape. And many other things you may think of as 'extras' now but, after you've worn your suit a few times, we bet you realize are essential.

# GA VAINA
