

CLOSE YOUR EYES and hit is the formula used by this batter to hopefully get a home run. He is playing in the Milton minor softball league and some of the enthusiastic crowd seen in the background, is (Photo)

OUR READERS WRITE:

ARE WE INVOLVED?

Dear Sir:
It was suggested Miss Donna Cameron's report on our municipality's recreational facilities do not suit the needs of our youth of today. Miss Waldie's letter to Youth Front goes on to cite we provide only facilities such as baseball, hockey, tennis, bowling, curling, playground programs etc. for the very young and middle-aged citizens. However, our adolescents, in her words, are left aside.

I can agree this statement appears to be true, BUT, in fairness to all parties concerned, young and old alike should ask themselves the following question - 'why is this myth so?' In the home, do we have that togetherness? Or are we only thinking of our own selfish interests? Have you ever attended one of the following functions? A baseball, fastball, pro-am hockey or tennis match, bowling or curling match? How about a church organization summer camp or track and field meet? Or perhaps a Milton Youth Power meeting? You haven't? Well, I have.

Do you know, the strangest thoughts raced through my mind. Why do we not have more adolescent participation in these sports? The name of the game is active participation. In other words, become involved. No business or other organization, be what it may, will be successful without the above ingredients. Now comes the clincher. Ask yourself "what have I done recently to help correct the situation that exists in my Community? Am I involved?"

It is a simple matter to criticise the lack of facilities in any community but, have you ever attempted to play any of the aforementioned games by yourself? I agree, it is most frustrating.

Mention has been made of

coffee houses, drop-in centres, etc. Have these centres been established in other municipalities? If so, have they improved the image of our youth and our communities?

By the way, what happened to our local teen dance?

Could it be the very young are eager to become involved in many activities? Then comes those precious all-too-few adolescent years where we are never quite sure just what we want to do. Suddenly, one day we realize we are married with a family to think of and precious time is passing us by. We then begin to accept our responsibilities as a citizen and a few of us again become involved to make our society a better place in which to live.

Co-ordinating our local organizations and facilities is an excellent idea and would be most economical.

As to Milton being a dull, uninteresting, backward town, waiting to be shown the light, I would only make this comment. Usually, the end result of any project is governed by the effort put into it. By turning on this so-called light in our backward community, we may inherit

some of the see each Perhaps we dark.

The youth deserve to past endeavor them your f. Keep up Marsha. Per some involv

Tips to Help Anglers With Outboards

If you're a fisherman, you'll particularly want a smooth idling outboard for trolling. If your engine is not as smooth as it should be, here are some conditions that may cause the roughness:

- Improperly mixed, or stale fuel
- Carburetor setting too rich or too lean
- Pinched or kinked fuel line
- Fouled or improperly gapped spark plugs
- Defective fuel pump
- Carburetor or magnetto out of sync

These are some of the more common causes of rough idling. If after you've checked these items and the engine continues to act rough, look deeper into the causes, checking the following items:

- Bent gear or exhaust housing
- Points and tuning
- Reeds and reed plate—contact should be flat
- Oil drain screen in reed plate base
- Carb needle and seat, and float valve
- Coil—check for dirt

Good maintenance always pays off in trouble-free operation of your outboard. Look after it properly and you'll have years of service from it.

IN A HURRY

Like to do things in a hurry? There's a forced draft charcoal stove available which is so efficient that a quart of water boils in seven minutes.

Magic Tickets to U.S. Parks On Way Out; Better Act Fast

That magical entrance ticket to Uncle Sam's parks, forests, and other Federal Recreation areas — the \$7 Annual Golden Eagle Passport — will be with us only until March 31, 1970.

Congress voted to end the program after the 1969-70 recreation year. That means the 1969 Passport is the last you can buy. Beginning April 1, 1970, the National Park Service, Forest Service, and other Federal land managing agencies will set recreation entrance and user fees on an area-by-area basis.

The nationwide permit system was established in 1965. The first annual permit was issued as an automobile bumper sticker. To make the permit more flexible, the wallet-size Golden Eagle Passport was adopted in 1966 and has been used each year since.

What has the nationwide annual permit accomplished since 1965? Plenty, in the eyes of conservationists and other observers.

From January 1965 through December 1968, 15 million dollars' worth of the \$7 permit were sold. Other entrance and user fees at Federal recreation areas, which also are a part of Operation Golden Eagle, brought in another \$23 million during the same period.

Money raised from these sources was deposited in the Land and Water Conservation Fund. It has helped the States plan, acquire, and develop many needed recreation areas and facilities; it has provided considerable financial aid to help Federal agencies acquire needed National recreation lands and waters.

If you want a 1969-70 Golden Eagle Passport, better make out a check for \$7 to the Bureau of Outdoor Recreation and send it now to Operation Golden Eagle, Box 7763, Washington, D. C. 20044.
