

"New look" night school offers dozens of courses

An expanded program this fall will see literally dozens of courses offered to adults of Milton and district in the "new look" Milton Night School to be operated by the Halton County Board of Education.

In addition to the usual "interest" courses designed for hobbyists, a full range of academic, commercial and technical courses will be offered to help adults brush up on any schooling they may have missed. William Tom, vice-principal of Milton District High School, has been named principal of the night school program this year. He reports planning is well underway for that should be the most extensive and interesting night school on record. "We are offering considerably more subjects than in previous years, but it will depend on registrations."

The night schools in Milton and Georgetown will work in co-operation with one another, so that some courses may be merged to carry on if there are not sufficient registrations in each town to warrant opening of a class.

Academic courses will include English, history, mathematics and science, everything from the

grade nine through grade 13 levels. There will also be a wide range of commercial courses (typing, bookkeeping, filing, business machines, etc.) and a full complement of technical courses (auto mechanics, drafting, etc.)

Among the interest courses is a new one in antiques—recognizing, collecting, and appreciating antiques. Law for the layman is another interest course, and even instrumental music will be opened if there are sufficient registrations. There is also an advanced automotive course that would suit men already engaged in automotive repair work.

Most of the courses will run 20 weeks—10 before Christmas and 10 after, on Tuesday and Wednesday evenings. The night school will be adequately advertised in early September with a Sept. 22 registration night, and courses should start in early October Mr. Tom reports.

Instructional staff will include some present high school teachers and others who specialize in certain fields. Most of the courses will qualify the successful student for a certificate from the Ontario Department of Education.

Boy bruised in accident

A 10-year-old boy was struck but only slightly injured by a car Wednesday, at the corner of Woodward and Martin Streets. Alex Riddell, son of W. G. Riddell, of 219 Martin St. was struck by a car driven by Frank Marcantonio of 396 Highside Dr. The boy received only slight bruises in the mishap and his bicycle received \$15 damage.

In other accidents investigated by Milton police, a car driven by James Watt of Burlington and a parked car owned by George Saunders of Dundas collided on Elmwood Cresc. Tuesday afternoon of last week. \$125 damage was done to the Watt car and \$300 damage was done to the Saunders car.

Another accident on the same day, this time in the early evening involved a camper trailer and an automobile at the corner of Main and Commercial St. The trailer was being pulled by a car driven by Norman Klodt of Dundas when its axle broke and it hit the side of a car driven by William Hilson of 117 Commercial Street. \$175 damage was done to the Hilson car and \$75 damage was done to the camper.

Police report a minor accident on July 25 with \$125 damage and another minor accident on July 26 resulted in \$40 damage.

Footloose in Europe . . .

Black Sea cruise begins

Our footloose and fancy free vagabonds, the 42 M.D.H.S. students and three teacher-chaperones off touring Europe, have boarded the ship Asonia for their 15-day cruise around the Black Sea. It sounds like fun, as you'll find out when you read student Alex McLaren's second instalment of the story.

July 18, Aboard the Asonia.

Wondering Parents:

I hope my last letter wasn't late but I fear it was. It was hard to find time between tours and parties, etc. and I was very tired so I found it hard to translate this spectacular experience into writing.

Anyway, after the smooth and enjoyable but tiring plane ride we embarked on several fascinating tours of Austria and Germany. We found the Alps breathtaking. After the slides in the salt mine and touring Innsbruck we visited the castle of Ludwig II of Bavaria. This was the richest building I have seen. Gold was plated on everything and there were many

paintings. You can only believe it when you see it.

On Monday we visited a village in Northern Italy where many of us got good buys on fine leather goods. Tuesday we spent quietly in Innsbruck, shopping and wondering what the Asonia ship would be like. After a 12 hour trip by train we started walking, just praying it wouldn't be far to walk from the Trieste station.

Just around the corner, many of the kids cried out or stood spellbound. The ship was the most beautiful thing we had seen. The group was on this ship so fast it would make your head spin. The meals are really great. It's like eating in a big restaurant.

We stopped in Venice on Thursday and not many of us enjoyed the smell or the dirty back alleys, but we couldn't see much of it in three or four hours. Personally, I was disappointed with St. Mark's Square.

Right now we are a few minutes out of the Brindisi port so I must get ready to go ashore.

Sincerely yours,
Alex McLaren

Five major accidents

The Milton detachment of the Ontario Provincial Police report five major accidents occurred in their coverage region during the past week.

On July 21, an afternoon accident on Highway 401, east of the Campbellville Sideroad saw a car driven by Martin Cote of River Canard, Ontario, collide with a car driven by Fern Ranger of Nassagaweya Township. Damage to the Cote car was listed at \$250 while Ranger's car received \$350 damage.

On the same day, another accident on 401 near Kelso saw a car driven by John Braendle of Windsor collide with a car driven by Arthur Hewins of East Flamboro Township. Braendle's car sustained \$200 damage and Hewins' car received \$250 damage.

A Thursday accident in the early morning saw a car driven by Clare Ford of R.R. 1 Milton collide with a car driven by Herbert DeHaan of Rockwood. \$350 damage was done to the Ford car while \$650 damage was done to the DeHaan car. Mr. DeHaan received a bruised chest and elbow in the mishap.

A truck carrying worm pickers went off 401 Friday near the eastbound truck scales, causing \$400 damage and sending three pickers and the driver of the truck to hospital. According to police the van, driven by Sandor Virag of Toronto, went off the road, down into the median and flipped over onto its side. Virag received forehead lacerations in the mishap.

Truck complex nearing completion

The complex of buildings being built just north of Highway 401 on Highway 25 will soon become the new main offices and truck depot for McKinley Transport Limited.

Construction work, being done by Gibb Construction of Guelph, is soon to be completed, and job superintendent Mel Gibb says his crew of 25 men is working a bit ahead of schedule.

What they are building is a complex of offices and truck repair garages. The main office is a two and a half storey structure which will not only house the main McKinley offices, but will also have rooms for truckers to sleep in while they are on long cross-country hauls. The basement houses a cafeteria while the first floor is comprised of administrative offices and the main dispatcher's office. The top floor houses the truckers' bedrooms.

Adjoining the offices is a set of loading docks where larger trucks can unload their cargo and it can then be unloaded onto smaller trucks for shorter trips. The total space for the offices and docks, according to Mr. Gibb, is approximately 15,000 square feet.

A separate 330,000 square foot building will be used to house complete repair facilities for trucks and their trailers. Drivers will pull right in to the bays, have the trucks checked, and if they need repair work it can all be done in the total of six bays. Also located here will be smaller offices and a parts

storage area.

The McKinley firm will be prepared to handle all types of repair work on their trucks from tire changes to major body work. They will be equipped with frame straighteners, winches and steam cleaning units for truck cleaning. They have a sand blasting building which is where preliminary painting work will be done.

Another separate building houses a water filtration unit which collects all the water used for truck cleaning and maintenance. Going through several processes, the water leaves the plant in an absolutely pure state.

There will be a total of 30 acres available for parking the trucks and their trailers and the tractor parking lot includes a 500-foot long stretch of block heating facilities for wintertime parking.

Gibb Construction will have the structure ready for McKinley by October and the firm plans to start operations here in the same month. They are presently located in Dixie. Murray McKinley, general manager of McKinley Transport said he expects to have between 200 and 300 people employed at the new complex which will service 600 of the McKinley trucks. Many of the staff will move with the company but Mr. McKinley said if they can't recruit enough of their regular staff, the company would be in some difficulty.

Urge highway skirt Milton

If and when the Department of Highways builds a new bridge on Highway 25 south of town, Milton Planning Board would like to see it designed to allow for eventually changing the highway from its present Second Line (Ontario St.) route to the Third Line.

At a meeting of the Board on

Thursday, members reviewed a news report the D.H.O. was doing tests on the ground in the area of the bridge. Deputy-Reeve Ron Harris said it would be a good time to remind the Department the town would like to see Highway 25 skirt the town via the Third Line, rather than run through it.

Others on the board agreed and said if the highway ever heads up the Third Line, it would have to start heading eastward about that bridge.

Parents asked to handle crosswalks on Ontario St.

A unique parents' association should be formed to handle safety requirements of children in the four apartment buildings on Ontario St., Milton Council agreed this week.

Council had been asked to provide a crossing guard and better crosswalk markings to help children from the apartments get to and from schools across the busy Ontario St. But a survey of children showed there are only 20 youngsters of public school age living in the four apartments. Council had earlier turned down a crossing guard to serve 39 children living west of Bronte St.

After consultation with the police department, a parents' association was suggested. Through the association, mothers would take turns guiding the children across the highway. Letters are going to the apartment owners this week, explaining the proposal.

Meanwhile council promised to repaint the crosswalk markings along the street. The police have been asked to watch for traffic violations on Ontario St. N. and a report at Monday's meeting indicated 45 charges have been laid there since the first of June.

Church Services

KNOX PRESBYTERIAN CHURCH

A Church You Can Make Your Home
A Warm Welcome to Everyone

Because we don't have to spend a lot of time on this every year,

we can spend a lot more time on this.

Underneath the Volkswagen you think never changes is something quite surprising: A Volkswagen that does. Over the years, we've made more than 4,500 improvements to it. Each one a quiet tribute to the Volkswagen theory of evolution: We don't change the Volkswagen just to make it look different, only to make it work better.
