An untuned car is "won't start" trouble.

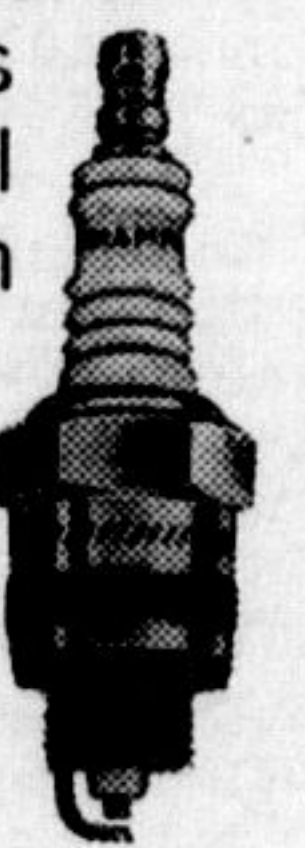

This winter, more cars won't start because of worn spark plugs than old batteries. Worn spark plugs? You'd better believe it! Especially in winter.

The colder it gets, the more your battery's output drops. So there's less voltage available to start. Worn spark plugs can easily require twice the voltage of new

plugs. Result—you have a combination that can be too much for even a brand-new battery.

You don't want starting trouble this winter. Get a Champion Tune-Up now. Champion spark plugs meet or exceed the warranty requirements of all vehicle and engine manufacturers. Remember—an untuned car is trouble!
