## VALUES FROM SONY® BUY AND SAVE NOW AT Paul Rutledge T.V.

THE ONLY COLOR SET WITH THE REVOLUTIONARY PICTURE TUBE . . .

IT'S THE **BEST IN THE WORLD**

### SONY® "TRINITRON"

SONY 9"  
PORTABLE  
COLOR TV

Unlike the conventional color TV which uses three lenses to focus on the dot, the Trinitron uses one large lens to focus the beam on the aperture grille.

This different method of producing color is superior to ANY set you have or have seen. . . other than a Trinitron.

This is the only set with color to make "believers" out of these people who still feel color has not been perfected.

All Sony sets have automatic color saturation, hue control and fine tuning, all at one touch.

THE AMAZINGLY LOW PRICE FOR SUCH A TRUE-TO-LIFE COLOR SET IS ONLY . . .

## \$399<sup>95</sup>
