No region until 1973

TECO report ready on June 3 Warden predicts Halton unit

A report dealing with the future of the Halton area in a regional government setup will be made public June 3 when all the minicipal councillors in the county will be invited to attend a meeting at Halton Centennial Manor in Milton to hear members of the county's Technical Coordinating Committee present their interim report. The gathering is expected to last all

The report deals with basically three areas, including the of responsibility, boundaries and government structure. A subsequent report will deal with finances, current capital budgets, projected budget forecasts and mill rates, Warden

The Warden attended a meeting in Toronto Monday May 15, and met with government officials. Commenting on that meeting, Swanborough said his submission was along the lines of a Halton-only unit.

Both Halton and Peel have been working towards separate regions ever since municipal affairs minister Darcy McKeough abandoned earlier plans to have the two counties merged in one region.

The Warden said he was encouraged to get an interim report into the province. He said he anticipated no implementation of regional government elections for a regional council this year so it was not expected regionalization would take effect in 1973. "We want to be fully aware of

the financial implications before

we go into a regional setup," he

The Warden did indicate, however, that there "is every indication that a policy decision on regional government for that area between Toronto and

Hamilton would be made. We fully expect two regions and that Burlington won't go with Hamilton-Wentworth. Outside of the council

chambers speculation among county councillors would indicate the Halton region will likely

consist of five municipalities rather than seven as currently constituted. Last week one councillor predicted Esquesing and Nassagaweya Townships would be split up among Acton, Georgetown and Milton.

The TECO report slated for presentation in June has been three months in the making TECO is made up of members from municipal and county staff. Their report was earlier slated encouragement from province, the work was accelerated.

Ride-a-cruiser plan will educate public Wants berms, not fences to problems of police

Making the public more aware of police problems is the principle behind the Milton Police Department's new program allowing the public to ride with officers on patrol.

"We're hoping members of the an opinion. The board had public who go out with an officer participated in the earlier on patrol duty will see how police are quite often caught in the middle," says Police Chief Ray

The program of permitting individuals to ride in a police cruiser has been in effect in other communities but is an innovation in Milton. Ground work and discussion on the plan has been in the works for about a year and a half, notes Andress.

Certain restrictions will be placed on the program. Females must be accompanied by a friend, and participants under 21 need their parent's or guardian's signature. People under 16 are not permitted.

Passengers may also be required to leave the car if the patrol officer is forced to make a high speed chase. Riders are not covered by insurance in most

Applications for the program are available at the Milton Police Office on Main St. Interested parties can ride in vehicles during most of the police shifts. "It will be a continuous program," suggests Andress.

"only a guess" at this point, Whiting told The Champion. "Strong possibility"

However, "The Department of Public Works has allocated \$300,000 for it, so there is a strong possibility of a new Post Office, Whiting said he has been pushing for better postal

completed by the end of July and it will then be possible to proceed facilities in Milton for over a year with providing the community now. Federal works minister with improved post office ac-Jean-Eudes Dube informed him commodation during the fiscal late last week that authority has finally been given to do the Whether the study will feasibility study. recommend a completely new Asked if a new Post Office in

Milton might include Canada Customs facilities, Whiting said he doubted it very much. Customs officials met with local businessmen a year ago, after requests for a local customs office, but told them the town doesn't handle enough customs shipments to make an office here worthwhile.

Milton's present Post Office building houses both the postal facilities and a Canada Manpower office. It was built in 1915-16 at a cost of approximately \$5,000. A large addition was added on the east and south sides

This week's announcement also included news of a new \$33,000 Post Office to be constructed in Hillsburgh, near Erin. Once a site has been decided upon and the property is acquired, tenders will be called and the work should be underway during the present fiscal year, Whiting reported.

Authority, councillors will explain channel project

week's meeting has changed to Wednesday, May 31. An advertisement on Page B9 of today's Champion carries the earlier proposed date (Tuesday).

The engineer, representatives of Halton Region Conservation Authority and Milton Council will attend a public meeting on Wed evening of next week at the J. M. Denyes Public School, to explain the flood control project planned for the Sixteen Mile Creek through Milton.

Mrs. A. Ptolemy, chairman of a group of citizens concerned about the project, said acceptances had been received from the groups involved in the proposal for cement lining of the stream.

Seek answers

She emphasized the engineer who designed the project, M.A. MacKrell, would be reviewing the plan in detail and explaining the proposals for the stream. 'We're not going there mad, we're just concerned and we want to obtain the fullest possible explanations before we decide whether further protest justified," the chairman noted.

Mrs. Ptolemy reviewed there had been considerable interest and concern about the project

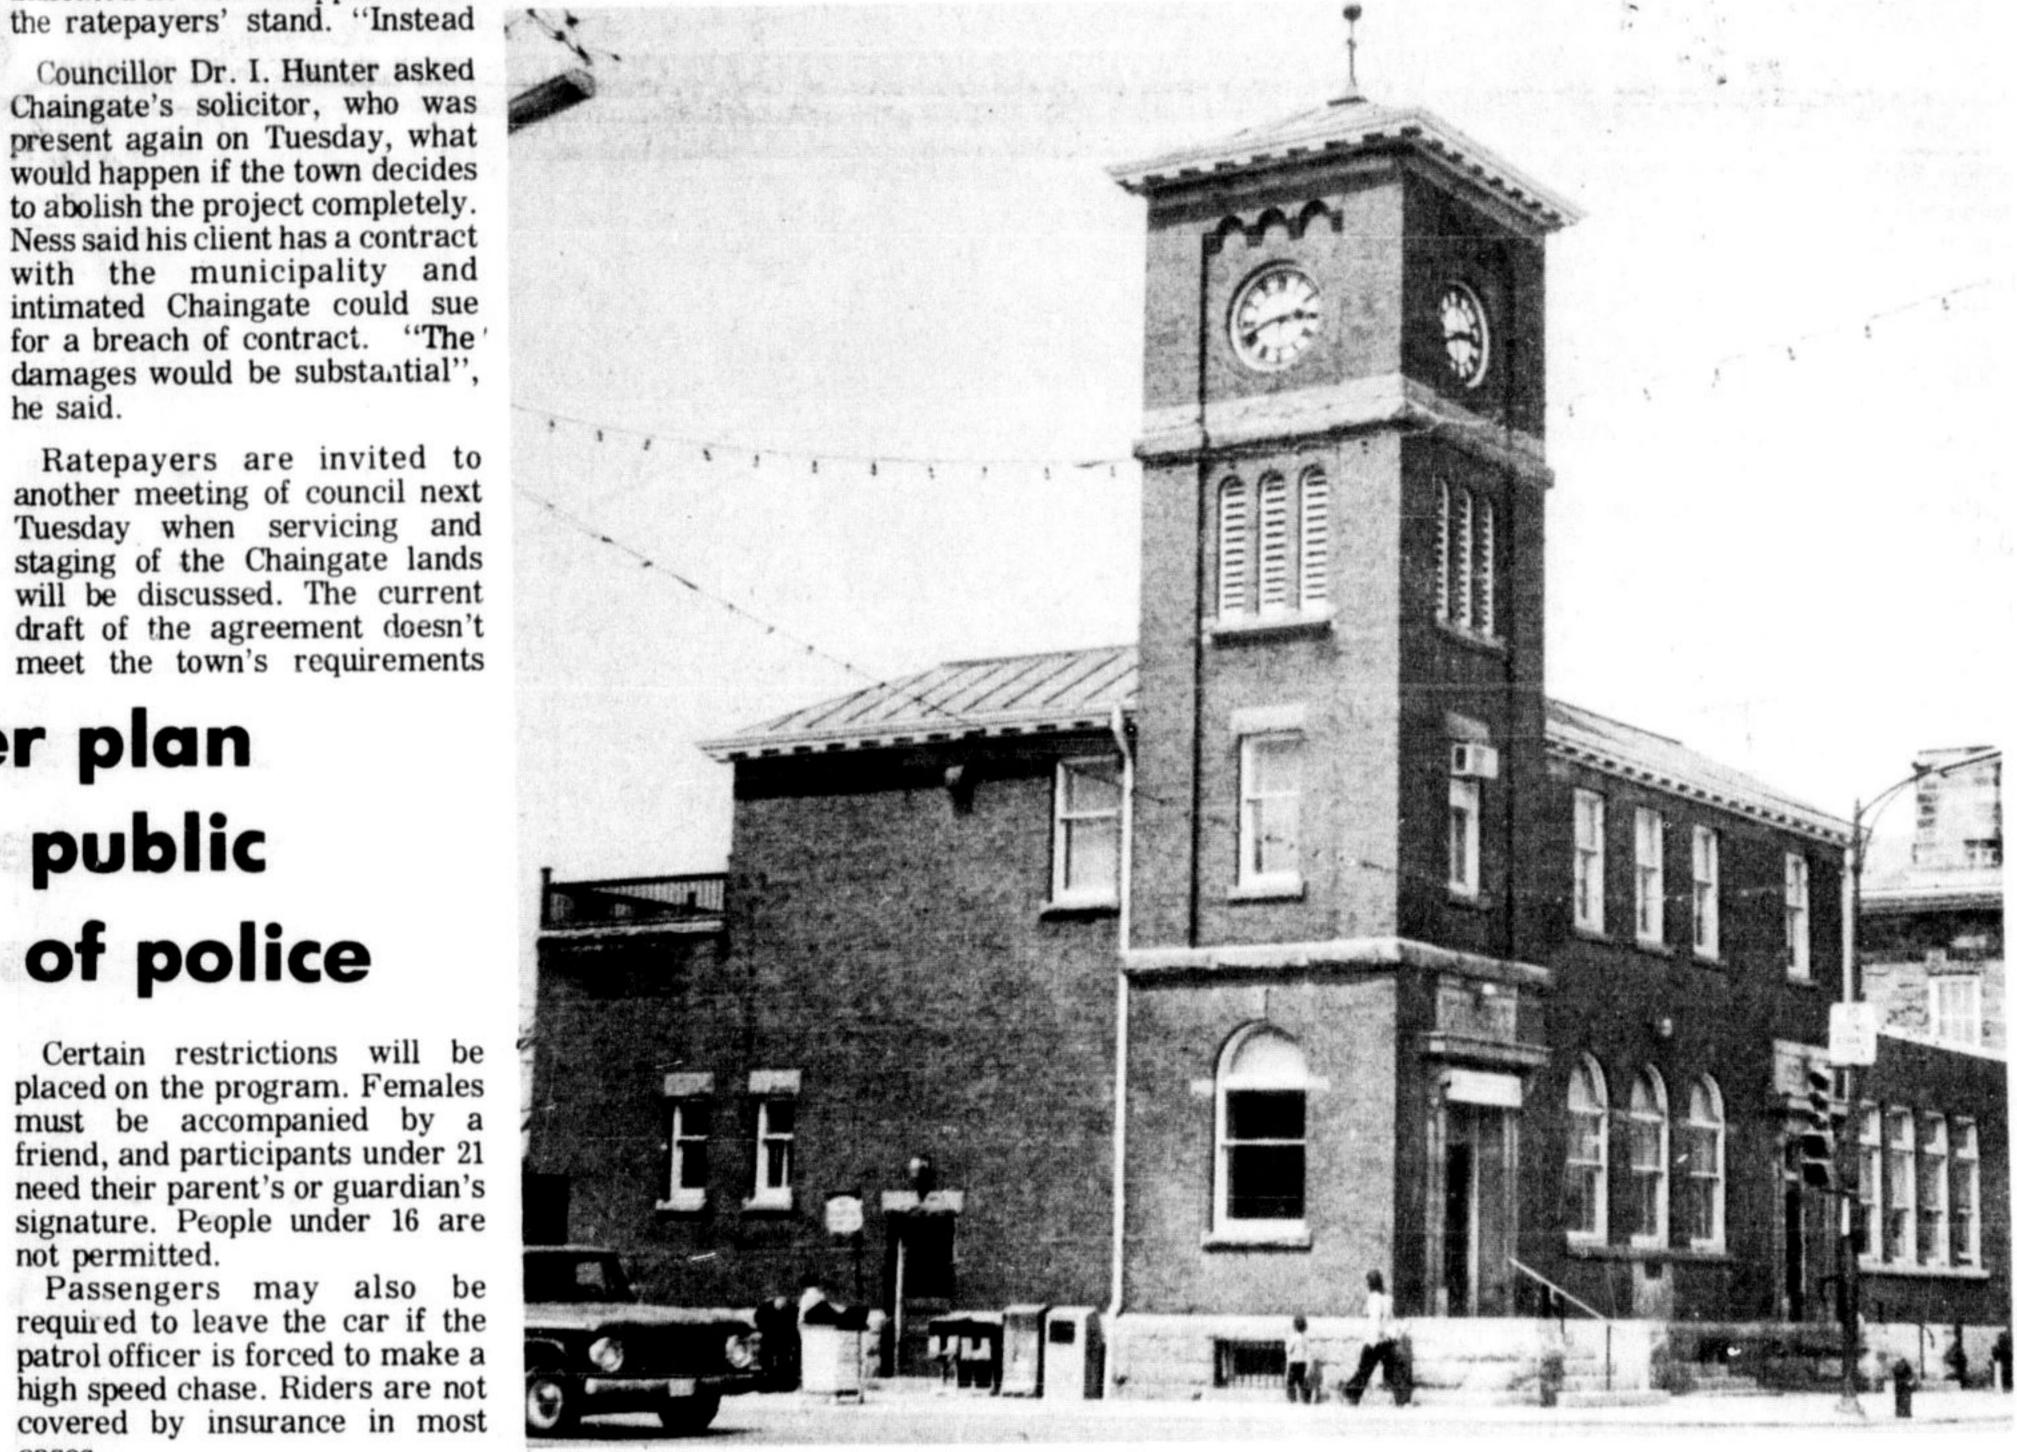

which will affect the stream throughout almost all its entire course through Milton. She said she hoped all those who are interested in obtaining all the information and answers to their questions on the proposal, would plan to attend.

Start this year

The channelization project in phase one involves the stream north of Main St. to the CPR and to Martin St. This phase is planned for this year and council and the conservation authority authorized expropriations to accommodate this part of the project.

Further phases involve the stream south of Main St. to approximately Parkway Dr. for straightening, deepening and cement lining. The section of north of the CPR to Woodward St. would also be cement-lined and the Riverplace Cresc. section would be gabion-lined. A control gate is planned for the mill pond as well as lining of the stream which passes Rotary Park. A diversion is also planned from Ontario St. to carry that water down the main course of the Sixteen, through the central part

of Milton. The meeting is called for 8 p.m.

MILTON'S POST OFFICE, which has occupied a place of prominence on the corner of Main and Martin Sts. since 1916, may not be Post Office may be built next year. The future there much longer. in north-east subdivision give a final decision in two weeks. Halton Land Group, one of the earth) along the rear of each lot, Meanwhile Milton Planning three landowners in Milton's for privacy and an aesthetic Board is also to be consulted for

north-east quadrant, is breaking ground today (Wednesday) to install services for the first 127 of the 343 homes the firm is building south of Steeles Ave. near the Third Line.

Murray Goldman of Toronto, president of the firm, appeared before Tuesday's meeting of Milton Council prepared to formally sign the official subdivider's agreement with the town, with one exception. He asked council to forego its request for a four foot high, plastic coated chain link fence which the town wants erected to separate the reverse frontage lots along Steeles Ave. and Third Line from the roadways.

The developer told council his firm is building berms (four foot high, landscaped mounds of

effect. He felt the fences would

not be necessary. Fences deteriorate quickly and the sight of half a mile of chain link fencing "will be very bad for our sales," he added. Fences will destroy part of the beauty of the mounds, Goldman said.

Councillors argued individual homeowners might erect a variety of fences which would look just as bad. Instead of both berms and

fences, Goldman recommended he be allowed to install the berms now and post a bond on promise to erect the fences at a later date if council feels they are necessary. Council agreed to allow the subdivder's agreement to be signed, incorporating both berms and fences, but agreeed to review their policy on fences and

discussions.

Bronte protest may hurt rural north Ward One eyes rep-by-pop demand

that the voting power on Oakville Council is out of balance, may have far-reaching effects on the current status of council representation in the north ward of the town—the lands south and east of Milton.

Ward One Councillors Donald Gordon and Richard Day aren't too worried at this point about losing one or both of their seats on the 11-man council, but the current protest could have some bearing on the future political strength of Ward One.

Seek "rep-by-pop"

Bronte area residents, who live Oakville's Ward Two, are upset because the rural north of the town was exempted from taxation to subsidize the town bus "representation by population"

Rep-by-pop could mean one of two things, Day and Gordon said. It could wipe out all representation from the rural northern ward, or convert the 11man council to a council of 27.

be the biggest challenge the rural area of Oakville has ever faced,'

not yet been named.

They said Ward One certainly has a voting advantage if only the population of Oakville's four wards is taken into consideration Each ward has two council representatives and the mayor, reeve and deputy reeve are elected at large. Ward One has 2,493 eligible voters or 8.58 per cent of the voters in Oakville; Ward Two 9,374 voters or 32.27 per cent; Ward Three 9,588 or 33 per cent; and Ward Four 7,591 or 26.13 per cent, according to 1970

But the vast acreage of the northern rural ward—about 110 square miles of land north of Upper Middle Road-certainly

Protests from Southwest Oak- service, Councillor Day told The councillors to look into the rep- Gordon pointed out. "It's a pretty "Mr. Kennedy (OMB chairman) ward councillors. "You would

table was based on assessment Development soon

The northern councillors also point out large housing developments are scheduled for the lower portion of their ward the Home Smith and River Oaks developments will be like satel-

the rural area would not be overpowered at the council level," claims Gordon. Only a ruling of the OMB can change the voting system as it now stands. "Nine to two are still pretty good odds," he

Day accuses the Bronte ratepayers mandering-trying to re-arrange the political units to better their own area." He added, "I think it

is all much ado about nothing."

Need 27 Day said if Oakville went for representation population, the council would have to have 27 councillors and it would be too unweildy, as well as too expensive at the current

\$4,000 per annum salary paid to

The rural ward would need two councillors to serve the widespread area it covers. If the other wards were given representation based on population, as it is related to Ward One, Ward Four would have to have six councillors and Wards Two and Three would need eight apiece. Add to this the three top officials who are elected at large (but always come from the built-up area of southern Oakville) and you would end up with an unweildy, 27-member council, he

Oakville's population is 60,000 this year and there are 60,000 acres in the whole town. Of those, 50,000 are in Ward One.

Construction project starts on Main St. parking and one lane of traffic-Construction work on Milton's Main St. rebuilding project got

underway Tuesday morning when workmen from RBC Construction Ltd., Downsview, started watermain and sewer main work on Montgomery Lane.

Work continues this week as they install mains up the north side of Main St., between Martin St. and Bronte St.

The firm expects to complete about 300 to 400 feet of mains a day. While the north side of the street is being ripped up, the south side will be open for

eastbound only-Police Chief Ray Andress reports. Parking will also be allowed along the north side of the street in areas where the crews are not working. Asks co-operation

Areas where no parking is allowed will be posted daily, Chief Andress reports. He asked for co-operation from motorists during the reconstruction period. The project is expected to last

\$377,000 project.

all summer. The whole of Main St. between Martin and Bronte Sts. is being reconstructed, in a

a petition bearing 214 names, asking town council to look into redistribution of voting strengths in the town and try to obtain throughout Oakville.

"We are concerned. This could

Councillor Day told The Champion. But for now, all the rural reapresentatives can do is wait and see what shapes up. Oakville Council last week received the petition and agreed name a committee

2,493 voters

needs two councillors to serve it,

ville (Bronte area) ratepayers Champion. As a result they got up by-pop issue. The committee has big area to cover for even two put safeguards in the system so end up with an impossible If representation at the council

you would end up with a different picture, they pointed out. Ward Four (southeast area) has the Ford plant while Ward Two (Bronte area) has two refineries and several large industries.

Apportionment of voting rights was established by the Ontario Municipal Board back in 1962 when Oakville and the former Township of Trafalger merged.
