

Figure skating underway

ADVISING Janice Snelko on proper execution of her figures is senior instructor at the Milton Figure Skating Club, Sandra Wilson of Burlington. Sandra attends the lessons both Tuesdays and Thursdays between four and eight p.m. while other pros Stanlee DuLong and Janet Fell attend Tuesdays and Thursdays respectively. There are 164 students between the ages of two and 19 enrolled in the figure skating club.

(Photo by D. Pink)

A total of 164 students between the ages of two and 19, have become members of the Milton Figure Skating club this year. Lessons began last week and will run until the first week in March.

Members of the club work on a badge system and are rated according to the number of emblems they have earned. The 28 students classed as seniors have had to have earned at least 12 badges in order to graduate from the junior program.

Members of the club will enter a January exhibition and will compete with one another according to skating proficiency. Though all students will compete in the February 'pop concert' those winning the January competition will be awarded solo performances.

Fulltime A veteran of 12 years instructing experience, Sandra Wilson of Burlington has been attained by the club executive to teach full time, both Tuesdays and Thursdays. Sandra has earned seven of eight possible figures and has accomplished the dancing requirements as well.

She will be assisted by Stanlee DuLong of St. Catharines, and an Oakville resident, Janet Fell. This will be Stanlee's first year as a pro and she will teach at the club on Tuesdays only.

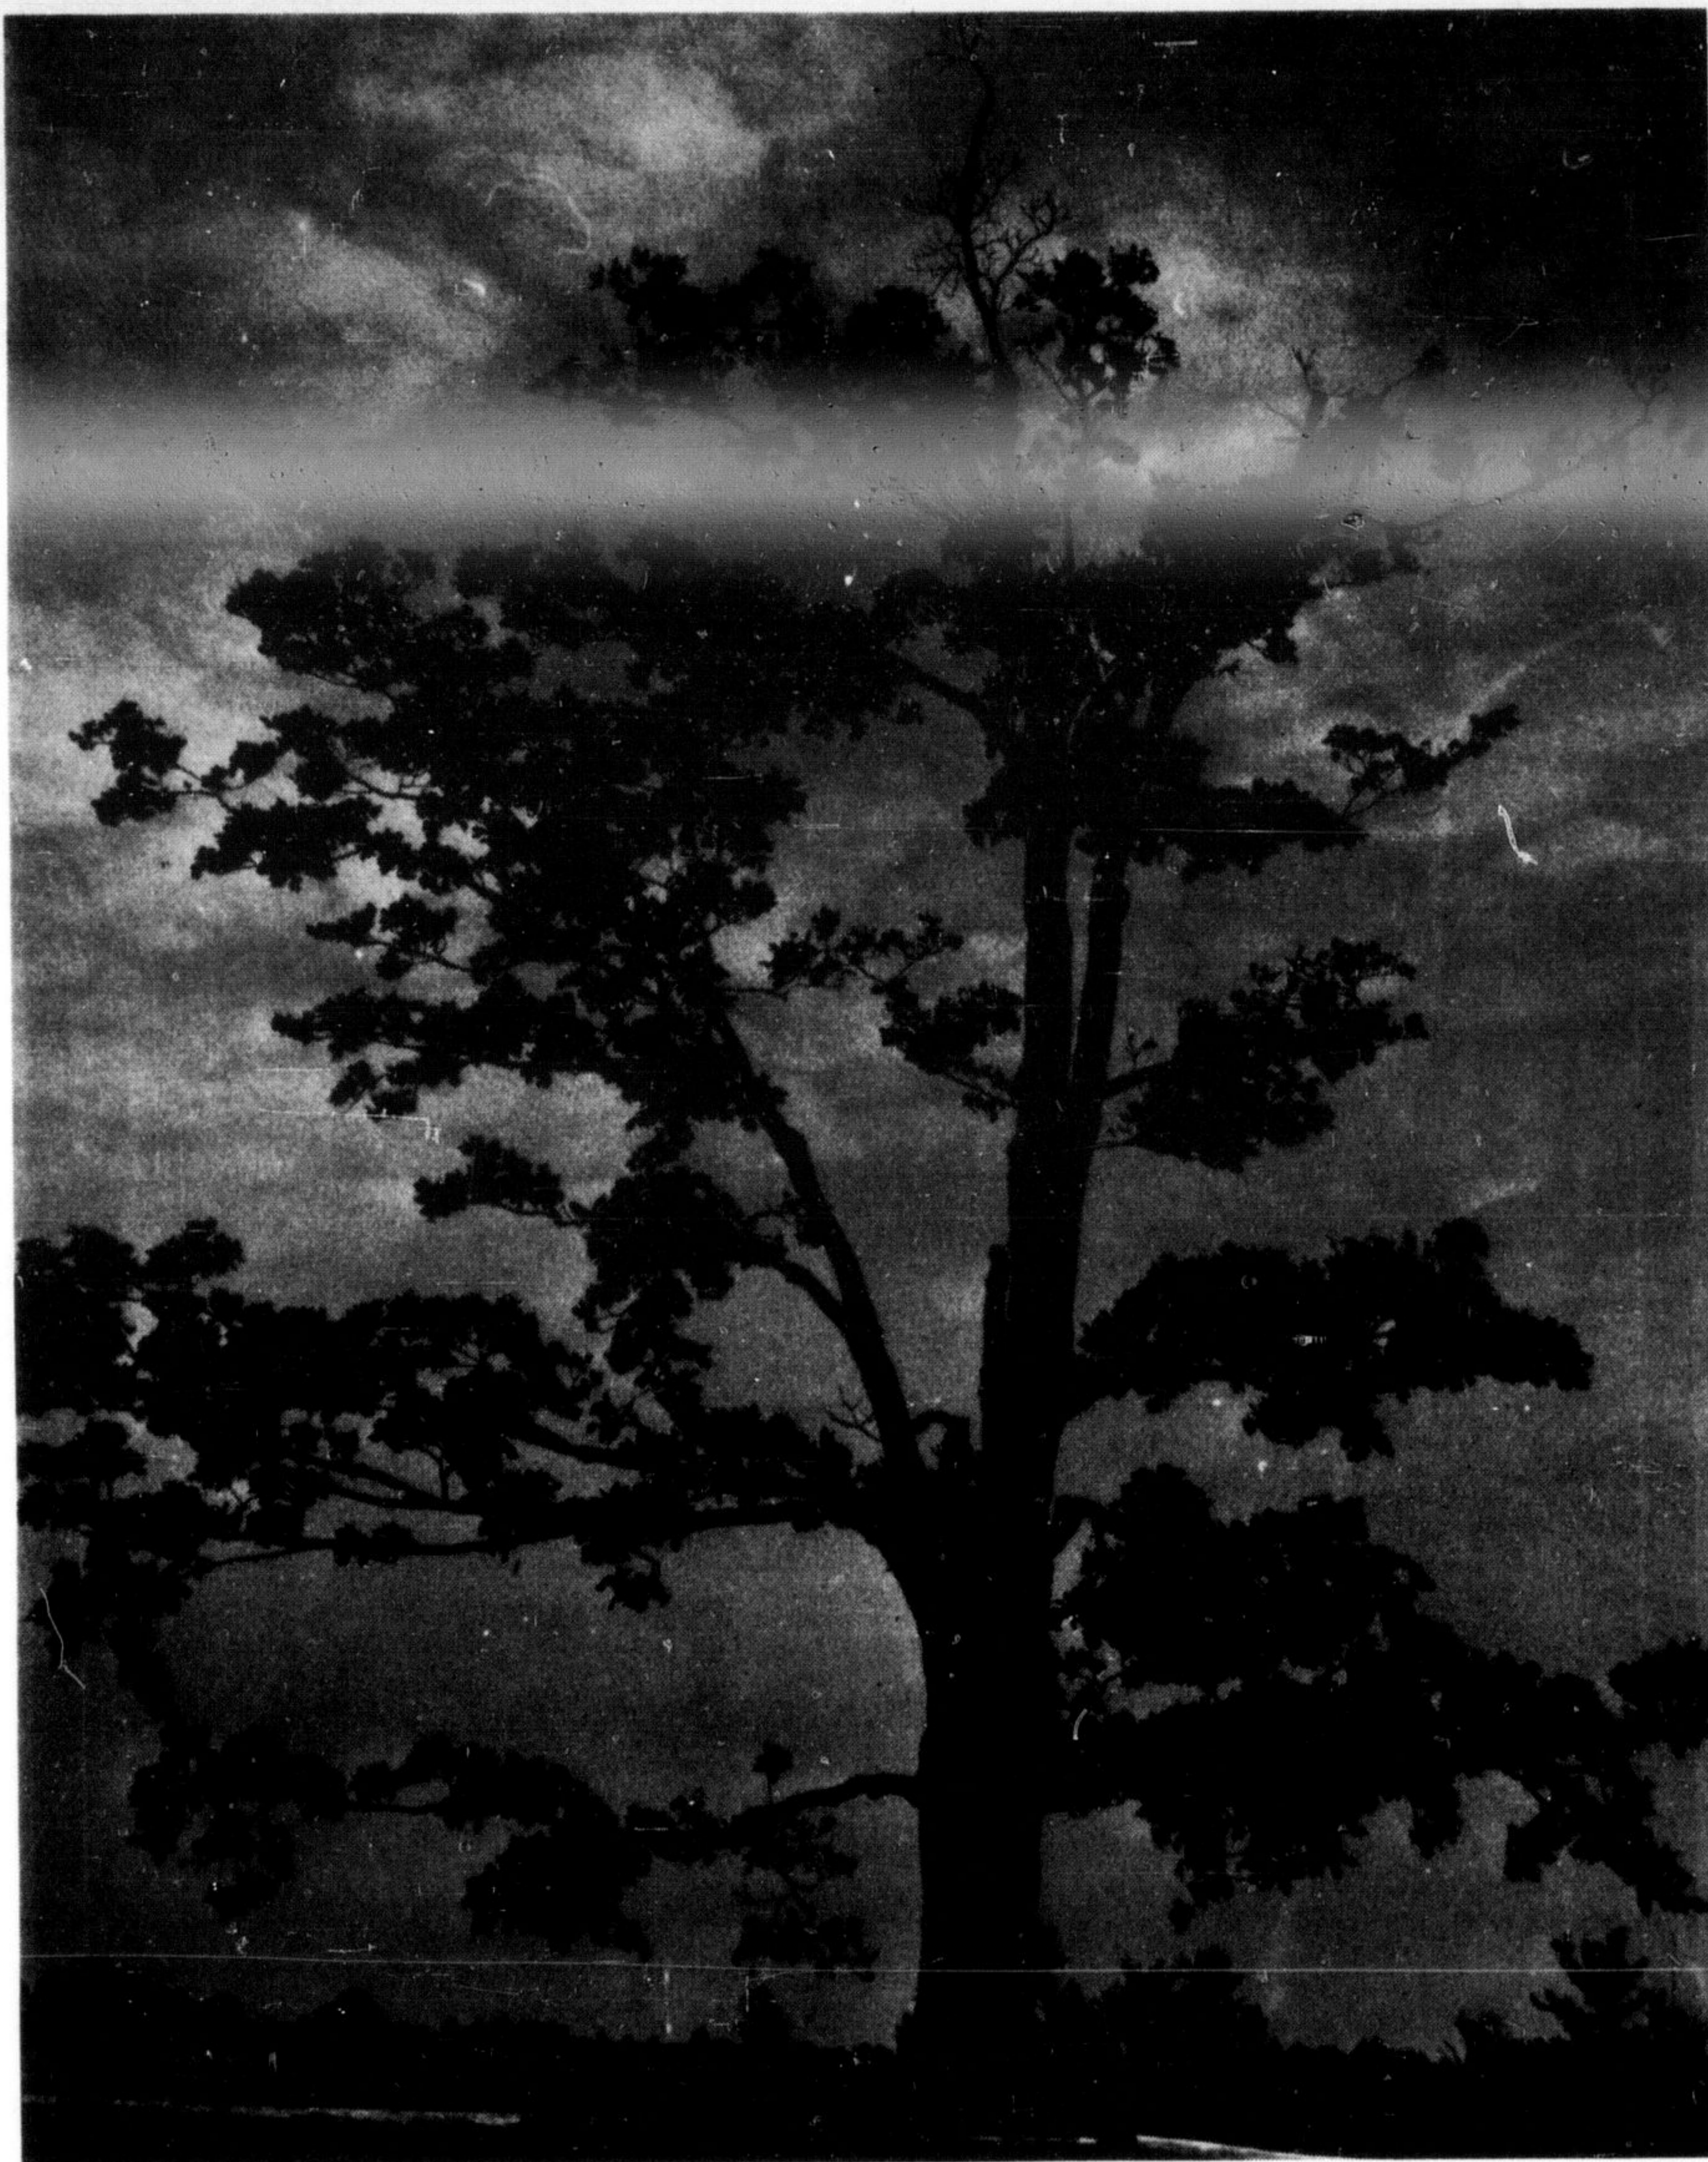

Janet will instruct Milton skaters on Thursdays and is starting her third season of teaching.

Commute All instructors have commitments other than the Milton club and commute from their resident cities.

"I see you're off your diet, Marvin."

This year's executive is formed by president Joanne Hood, secretary Joan Gervais and treasurer Lillian Russell. Mrs. Russell and past-president Faye Stark assist on the ice during the four to eight lessons. Only 16 boys have enrolled in the program.

SILHOUETTED AGAINST a leaden October sky, a tree on Walker's Line accepts the coming of the autumn season. Its leaves, now changing to the colorful hues of fall, begin to drop and the summer life cycle ends. It will stand, stagnant, until spring, when Nature will once again breathe a spark of life into its system and leaves will once again appear.

The Canadian Red Cross Society's Blood Transfusion Service was founded in 1947. Since then many new discoveries have been made. The use of plastic blood packs—much more convenient for storage and shipping than glass bottles—is nearly universal. Long term low-temperature preservation of blood is now possible. Plasmapheresis—

removing plasma from the blood by centrifugation after which the cells are returned to the donor—is common procedure. Automation is being used for certain laboratory tests. Computerization has simplified record keeping procedures. Today Red Cross, a modern pioneer in blood technology, provides Canada with all the blood and blood products it needs.

Drivers are advised never to overtake another car on a back road without first signalling by horn or headlights. If the driver ahead doesn't know you are there, the Ontario Safety League points out, it is possible he will collide with you by swerving suddenly to the left to avoid a bump or chuckhole.

"How would you like to fly 2000 miles alone while I spent three hours in the piano bar?"
