

ADDITIONAL PARKING space is the reason behind the demolition of the old Sunoco gasoline station beside the town hall. Future development

surrounding the area would necessitate more parking space, said Milton council, and the station was torn down this week.

TEARING DOWN an old building is not a simple task. Town works crews and Maplehurst inmates spent several days taking apart doors and

windows of the old Sunoco station, when the order was given for its demolition.

TREMAINE RD. north of Derry Rd. won't look the same again — and hundreds of motorists should be happy about it. Following many complaints from Milton Council, Halton Regional Council has launched a resurfacing program to

improve the condition of the heavily travelled road just west of urban Milton. Crews are ripping it up this week and will soon resurface it.

'Better breathing' clinics

All adults who suffer from any form of respiratory disease are welcome to attend "Better Breathing" clinics provided by the Halton Lung Association. These are held every Monday evening in the Physiotherapy Department of the Joseph Brant Memorial Hospital in Burlington, 6:45 to 7:45 p.m. and will begin Sept. 11.

The program is developed to enable people with bronchitis, asthma, emphysema, etc. to learn more about and cope better with their problems. The program includes proper breathing and relaxation techniques, exercise, fitness and education.

For further details call the Halton Lung Association, Oakville, 845-0858, between 9 and 5 weekdays, or Burlington 527-4688 evenings. The "Better Breathing" program is provided free of charge and is made possible through contributions to the Christmas Seal Campaign.

Environment conference

Water management, recreation policies and a variety of environmental issues will be the topics for discussion at this year's 16th biennial conference of Ontario's 38 Conservation Authorities.

The theme of the three-day session is Conservation Authorities Tomorrow. The session started Monday. Delegates will be reaffirming their present roles with a look into the future, explained Brock Harris, chairman of the Halton Region Conserva-

tion Authority and chairman of the Chairmen's Committee of the Conservation Authorities of Ontario.

Highlighting the program will be the presentation of four workshops—Impact of the Environmental Assessment Act on Authority Programs, The Answer to Abuse in Conservation Areas, An Approach to Formulating Water Management Policy in Ontario, and An Approach to Formulating Outdoor Recreation Policy in Ontario.

In keeping with the conference's theme, Bob Burger, director of the Ministry of Natural Resources' Conservation Authorities Branch, will lead a joint presentation between members of his staff and Authority chairmen, on the role and mandate of conservation authorities.

The conference schedule includes Natural Resources Minister James Auld as guest speaker on Tuesday evening, and Industry and Tourism Minister John Rhodes as principal speaker on Wednesday evening.
