**4. WHAT ARE THE MAIN BENEFITS OF SOFT WATER?**

SOFT WATER PERMITS YOU TO USE MILD SOAPS. When washing in hard water, detergent is necessary to overcome hardness. With soft water, all the power of mild soap is directed to the task of cleaning. You will soon see the difference.

SOFT WATER RINSES THOROUGHLY. This means softer towels and linen, woolsens that keep their fluffiness and shape. Because abrasive deposits are rinsed out, clothes last longer.

SOFT WATER IS A VALUABLE AID TO BEAUTY. Cleanliness is always the first step in beauty care. Only soft water can ensure complete cleanliness with gentle soaps. Skin troubles are often traced to washing in hard water. If soap residue is not properly removed, it blocks the pores and harbours bacteria. Hard water also leaves the skin rough and vulnerable to winter winds.
