In a rain-shortened affair in Milton, Etobicoke held Milton to two hits in posting an 8-1 win in the five-inning game. Actually, Etobicoke added another run in the sixth inning but heavy rains washed out play, forcing the score to revert to the last inning.

In Dundas, Mohawk pitcher Ben Thompson and Chief hurler Dave Minor sailed along in a scoreless contest until

the bottom of the fourth inning when Charlie Hyatt blasted a solo home run to put Dundas ahead 1-0.

The Chiefs added two more runs in the fifth before the floodgates opened with four more in

Lesuk offered Dutch spot

The Milton Tridents Intermediate B hockey team may be without one of its regular players when training camp convenes in the last week in September.

Lorne Lesuk, a 28-year-old centreman, has been offered a spot with a Dutch team and the latest word from Trident part-owner Russ Lane, is the player is seriously considering making the move.

A three-year member of the Tridents, Lesuk took part in a Can-Am school for European tryouts last month with several other Milton players and was offered the spot.

Dave Norton will definitely be going back to Holland while Gary Richardson will be staying in Canada.

The Tridents are all set for another year in the league after much debate whether or not they'd compete this season. The squad has installed Barry Elliott as the new coach and will play in the North division alongside seven other teams in the league.

The other members of the North division are perennial nemesis Paris 29ers, Plattsville, Ayr, Watford, Rockton, Dunn Dunnville and Smithville.

Some cold facts about your refrigerator.

Your refrigerator has a tough job, especially in the summer. You can ease its load and save energy by turning the following ideas into cold facts in your kitchen.

If you don't have a frost-free refrigerator, defrost before the ice reaches 1/2" thick. Ice is an unwanted insulator that reduces cooling efficiency.

Check for an airtight seal by closing the door on a sheet of paper. If the paper pulls out easily, you may need a new gasket.

Space food on shelves to insure free air circulation.

Don't let your refrigerator run colder than necessary. Check the control. Perhaps it could be set back a notch or two.

Don't open the door more often than necessary, or for long periods of time.
