42 Help Wanted
CAREER OPPORTUNITIES IN A NEW MANUFACTURING PLANT

The most modern mineral fibre insulation production plant of its type in North America, located in the attractive Niagara Escarpment town of Milton, Ontario, is now being prepared for a planned mid-1981 startup.

This multi-million dollar facility will provide several exciting employment opportunities for qualified applicants who will enjoy a "hands on" involvement through pre-production and product development phases and which will meet the market demand for top quality insulations.

ROXUL COMPANY provides comprehensive benefits and competitive remuneration for its employees, and is currently inviting applicants to fill the following positions:

QUALITY CONTROL MANAGER
Candidates for this position should be qualified in chemical or process engineering chemical technology together with three or more years experience on the practical side of manufacturing to include involvement with production, quality control, testing and operating standards. This is a key position which requires consultation with sales, marketing, and plant operations personnel. Previous experience in "fibre" insulation process is desirable, but not mandatory as the basic skills combined with a high degree of self motivation and the available technology will ensure ultimate success.

FOREPERSON- PRODUCTION
This position requires an individual who possesses top leadership skills together with a minimum of three years supervisory experience in a production plant environment. The applicant will be a good communicator who will organize and maintain operational crews to include "lead hand" operating supervisors. An awareness of "on the job" training and competent safety practices a must!

SUPERVISOR- MATERIALS & PLANNING
Never a dull moment in this job! With two years minimum background in production planning, traffic, inventory control, warehouse, shipping, sales service, record keeping; the successful applicant will have the communications skills necessary to deal effectively with people inside and outside the company. Previous experience in insulation products would be helpful, however, the desire to accommodate people demands and the company's policy to provide prompt and courteous service is the key for this position.

Please forward a brief resume of your employment history together with references and salary expectations indicating the position which interests you, in complete confidence to:
