Region Stressing Water Conservation

The Region of Halton is continuing efforts to promote more efficient water use. **During the summer months, water use can increase by over 50 per cent.** Most of this water is used for our lawns and gardens. However, by wise water use in the summer, you can waste less water and still maintain a healthy green lawn and garden.

To illustrate the impact of summer use on the water supply system, consider these facts:

1. Average lawn watering for one-half hour a day uses 1.63 m³ (360 gallons) on water.
2. In Milton, there are approximately 11,250 homes.
3. If all these homes watered on the same day, over 18,394 m³ (4 million gallons) of water would be used.

Excessive water demand due to lawn watering can strain the capacity of our water supply and storage systems.

Lawns don't need to be watered every day. Watering every three to five days is sufficient, less often if it rains. The best time to water is during the coolest part of the day. Watering in the early morning or in the evening after the sun has gone down, will reduce the amount of water lost to evaporation.

As part of a water conservation program, Halton Region Planning and Public Works Department is promoting a Region-wide reduction in the use of municipal water during the summer period. This will be accomplished through a program of mandatory lawn watering restrictions.

The lawn watering restrictions involve an "odd/even day" system to reduce peaks in water demand. Properties with odd numbered municipal addresses (e.g. 1, 3, 5, etc.) will be allowed to water the lawns only on odd calendar days. Properties with even numbered municipal addresses will be allowed to water the lawns only on even calendar days. For townhouse units where the unit number is included in the municipal address (e.g. Unit #101, 2 Main Street), the unit number will apply (i.e. the odd #101, and not the even 2 Main Street).

As in previous years, the program is implemented on a Region-wide basis for all properties serviced by municipal water supply. Private wells and surface water from ponds and streams are excluded from this program.

The water restriction program does not include the

following:

- Car washing;
 - Flower, garden and tree watering by hand;
 - Water uses via hand-held spray nozzles;
 - Newly placed sodding during the maintenance period;
 - Lawns treated with herbicides, pesticides, or fertilizer which require water.
- If the last two examples are encountered, please notify the person listed in this communicate.
- The water restriction program does include the following:
- All residential, commercial and industrial properties;
 - All municipally-owned properties such as schools, parks, arenas, community centres, public works facilities, etc.
 - Golf courses using municipal water.

The program will be enforced by Halton's Planning and Public Works staff. Although a maximum fine of \$2,000 may be assessed on violators contravening this provision of Regional Water Works By-law 93-89, the cooperation of all citizens in this important water conservation effort will be the key to its success.

A water conservation program focuses on the sound management of our water resources. Water conservation will reduce the amount of water being used by everyone and, therefore, reduce the amount of water being treated and pumped. This will minimize the strain on the regional water systems and reduce the cost to residents on their water and sewer bill.

In past years, the Region has experienced extremely high peak water demand, which drastically lowered our reservoir levels. The introduction of water conservation initiatives, such as "odd/even day" lawn watering restrictions, will assist greatly in reducing peak demands, thereby delaying the need for water plant expansions and storage reservoir construction.

The active cooperation of Halton residents in this water conservation program will be essential. All Halton residents must work together to ensure the success of this program. Talk to your neighbors about the impact of lawn watering on water conservation. Let us all become involved in water conservation.

For further information, please contact Glenna Phillips, Customer and Administrative Services Division, at 825-6030, ext. 7669.

Let's All Take a Part in Water Conservation!

www.region.halton.on.ca

Halton Region is restricting lawn watering to odd/even days to help conserve our water...

Odd numbered addresses water on odd days
Even numbered addresses water on even days.

This program is enforced by Halton's Planning & Public Works staff. However, the cooperation of all Halton citizens in this important water conservation effort is the key.

Thank you.
