CRUISE DISNEY STYLE!

THE WONDERFUL WORLD OF WALT DISNEY comes to you in yet another way now, as they offer you DISNEY CRUISE LINES! A choice of two unique cruising opportunities — DISNEY MAGIC & DISNEY WONDER, two cruiseships offering the creativity of Disney Productions. You can combine a three or four day visit to WALT DISNEY WORLD with a cruise to the BAHAMAS!

HAWAII, SAN DIEGO, PALM SPRINGS, PHOENIX & FLORIDA are the featured destinations in a 'FOR GOLFERS ONLY' brochure from SUNJET HOLIDAYS. There are 'complete package' offerings — return air via CANADA 3000, golf & cart (with preset tee times!), and car rental. Some packages also include a dinner at PLANET HOLLYWOOD, and JOHN KIRK, Director of Marketing & Sales for SUNJET says they have chosen 'affordable' golf courses in all destinations. from under \$800. Cdn. for a three night, three rounds of golf outing!

AIR CANADA HAS LEARNED from a recent research project (15,000 questionnaires) that the important items for their travellers are its 'network'; personal comforts, its Maple Leaf lounges, and its Frequent Flyer program. Truth is that their Frequent Flyer program dictates to many, their choice of carrier; along with proper pricing — the latter not important when the company is paying, in the case of 'some' business travellers! AC's customer service, both on the aircraft, and in booking/ground service has also 'improved', as they have become more customer-oriented relative to the travel industry standards leading into the year 2000!

???

DID YOU KNOW DEPT.: A recent survey by AMERICAN EXPRESS revealed that so far only seven percent of business travellers use E-Mail to make travel arrangements, while two thirds of business' and travel agencies are equipped to do so.

TRAVEL TIP OF THE WEEK: When travelling on a flight with your children, pack a 'snack' in your carry-on to appease their hungry state — it may be a long wait for on-flight service.

The way to go!

Upgrades on phone service

Milton residents now enjoy better after hours emergency service, thanks to recent upgrades at Town Hall.

Improvements have come in light of a major water-main break around the holidays, when no emergency numbers were available on the Town's after hours voice mail system.

Two numbers are now featured on the system; 878-7141 for road, storm and sewer emergencies and 878-8113 for any sanitary and watermain crises.

The voice mail now holds 64 messages, up from its original capacity of 32. As well, for the next Christmas break the after hours greeting message will be changed to better inform the public about holiday period closures.

Members of the administration and planning committee received a report on the new and improved after hours phone system Monday night.

There is no financial impact related to the upgrade.

Checks to be done locally

One-stop shopping will soon be available to local developers, but at a premium.

As of next month, the Ontario government will shift responsibility for all on-lot septic system inspection from the regional to municipal level.

This, according to Mel Iovio, Milton's planning director, will afford developers "one-window shopping".

"Applicants can now obtain their septic system inspection from the same place they get their building permit," he said.

This convenience won't come without cost however, as the province is set to eliminate its subsidy for septic system inspection.

At Monday's administration and planning committee meeting, councillors voted to retain the Halton

Council Briefs

Regional Health Department for consulting services in connection with certain septic system inspections.

Road renaming

Ward 3 Councillor Lieven Gevaert questions the need for a public meeting related to the renaming of local boundary roads.

While unanimous support has been given to rename certain town lines — bordering Puslinch, Eramosa, Halton Hills and Burlington — Mr. Gevaert indicated a public meeting would simply delay the process.

"Other than a show and tell, what would be the point of a public meeting?" the rural councillor asked Monday.

Mel Iovio, Milton's planning director, said the meeting would allow for public input but that changes wouldn't necessarily be the end result.

The only existing problem related to road renaming lies with the Milton-Burlington border.

Staff have proposed to change the boundary road name from No. 1 Side Road to Burnhamthorpe Road West — which may cause confusion since no Burnhamthorpe Road East currently exists in Burlington.

Other recommended changes are: for Puslinch — Nassagaweya-Puslinch Town Line, for Eramosa — Eramosa-Milton Town Line, for Halton Hills' northern section — Crewson's Line, for Halton Hills' centre section — Nassagaweya-Esquesing Town Line, and for Halton Hills' southern section — Tremaine Road.

The date and location of the public meeting, approved by councillors, has yet to be determined.

Report given on Allendale

• from BUILD on page 16

Health, a provincially funded program which seeks to reduce cancer and heart disease.

The program's goal is to encourage people to make positive changes in their life by eating healthier, not smoking and living an active life.

Halton will receive \$81,850 for each of the next five years from the provincial government for the program. Halton and community partners will provide \$2 of in-kind contributions for every \$1 given by the province.

A communications plan will be developed with a staging of messages. First awareness, then supporting skill development and then behaviour change and maintenance will be targeted.

During the first 15 months the program will focus on women aged 25-44 to raise awareness of disease, risk factors and resources to help reduce risk. It will be accomplished through transit ads, posters, media releases, events and promotional items.

Allendale annual report

More than 300 people are lined up for admission to Allendale, according to Dr. Ivan Hunter, the long-term care facility's medical director.

In 1997 the 300-bed institution admitted 88 new patients and covered 41 cases of respite care. In 1997 there were 78 deaths at Allendale.

In his report Dr. Hunter praised many of the people who help run the facility from nursing, social services, foot care, nutrition, and recreation. He also outlined the medical staff and their duties.
