NOTICE OF CONSTRUCTION ROBERTSON WHITEHOUSE DECOMMISSIONING AND REHABILITATION OF WASTE WATER LAGOONS

The Undertaking
Robertson Whitehouse intends to proceed with the decommissioning and rehabilitation of the area of the former waste water lagoons located on the southwest portion of their property.

The sludge materials contained in the lagoons will be excavated, dewatered and transported to an approved landfill site by a licenced contractor. The extracted pore water will be discharged to the Region of Halton sanitary system for treatment at the Region's sewage treatment plant.

The lagoon area will be rehabilitated and left as a natural wetland area. Ground water will be allowed to fill the area and the existing outlet control structure will be retained to control the water level and discharge to Sixteen Mile Creek.
