

Village fun

Weekend Campbellville Harvest Festival-goers enjoyed everything from face painting, as seen by Jim Wheeler's expression (above), to scarecrow displays enjoyed by four-year-old Emelie Comtois (bottom right). Meanwhile, Janice Martin checked out a vintage spinning wheel (top right) and Blair Wilson bundled up for warmth (left).

ON THE ROAD TO CLEANER AIR

WE'RE MOVING FORWARD

Ontario's *DRIVE CLEAN* program is a proposed mandatory vehicle inspection and repair program to improve our air quality. In parts of the province with smog problems, cars (4 to 19 years old), trucks and buses will have to pass a clean air test before they can be legally driven. The full program is scheduled to be implemented in Southern Ontario in 2001. *DRIVE CLEAN* will be one of the most comprehensive programs in North America.

TAKING THE NEXT STEP

The Ministry of the Environment is calling for Expressions of Interest from vehicle repair shop owners and other interested business people in the Greater Toronto and Hamilton-Wentworth areas who might wish to operate a *DRIVE CLEAN* emission testing facility, beginning in 1999.

GET INTO THE *DRIVE CLEAN* BUSINESS

To obtain an Expression of Interest form to become a light duty vehicle *DRIVE CLEAN* facility contact:

**Public Information Centre
Ministry of the Environment
135 St. Clair Avenue West
Toronto, ON M4V 1P5**

**Telephone: 416-325-4000 or 1-800-565-4923
Fax: 416-325-3159
Website: www.ene.gov.on.ca**

Specify test only or test and repair. Expressions of Interest for heavy duty vehicle facilities will follow in the near future.

NOTE: An Expression of Interest is not an application and does not offer a competitive advantage. It only allows for notification of interested facilities in Fall 1998 when the formal recruitment process begins.

Underestimating Tension

The swing must
be smooth!

Have you ever wondered what the ONE special thing the best Pros do that the amateurs do not? Tension control!

The swing must be smooth to occur in sequence and generate tremendous power. Muscles cannot swing the club with rhythm when they are unrelaxed. First tee jitters, an important shot or uneasiness about the result of your impending swing all cause tension you may not even recognize.

If you sense any tension creeping in, take a deep breath (a lot deeper than your chest) and exhale slowly letting all your muscles relax. If you are confident in your swing mechanics, you will be prepared to actually "let it happen".
