

# Milton Success Stories

## EARL THOMAS WELLS IS DRIVEN!

One of the greatest thrills in anyone's life is when they finally receive their drivers license.

No more riding the buses everywhere, or asking people for rides. Wow what freedom, what a sense of pride and accomplishment! The only thing standing in your way is... passing your road test!!

So you take a drivers training course, or your Dad white knuckles through several evenings and weekends and finally away you go... you're ready, you get behind the wheel, the testing officer gets in beside you clipboard and pen at the ready, and you freeze, or you're so nervous you forget everything you've learned, or you have no idea where the steering wheel lock release is and guess what... you fail your road test!

Well, now there is a company that will help you get that treasured piece

of paper the first time out.

Earl Thomas Wells is the owner of a new Milton based company called R.T.P. -Road Test Preparation.

Ears moved to Milton over 4 years ago from Hamilton. With previous experience as a licensed driving instructor earl saw the need for road test preparation, not only for new drivers but for those people who have trouble with parking, have a fear of driving on the QEW or the 401, or who may have been in an accident and have developed a fear of getting back behind the wheel.

With the new licensing guidelines, including graduated licenses and with the much higher costs today of not taking drivers training courses, but paying for each licensing stage it is more important than ever that you pass your road test the first time out.

In order to help you pass a road

test, you need to be out on the road. That's one thing which makes Mr. Wells's course so unique. There is no classroom time. It's all spent in your vehicle or whatever vehicle you'll be taking your road test in. Being in a familiar vehicle makes the student much more comfortable. It also gives Earl a chance to make sure the vehicle is in good running order. This is important because when you go for your road test the tester can cancel your road test if there is a problem - like seat belts not working, cracked windshield, doors not closing or locking properly etc.

Earl states, "I drive the way I teach." "I obey all the traffic laws, and can answer most questions about the traffic laws if someone asks me." "I have a good work ethic and am willing to arrange a schedule to accommodate those who wish my ser-

vices."

In one month every student who has taken Earl's Road Test Preparation course, and he has felt was ready, have passed their road test on the first try.

Now that's a great success rate!

So whether you need some help overcoming a driving problem, or you want to get your license, or you are a parent with a child who's about to start learning how to drive, speak to Mr. Wells and see how, for a very minimal cost the test can be passed on the first try.

now you can feel confident, face the open road safely, and enjoy the freedom and privilage of being a confident, able driver.
