

'Big Pipe construction to start in November

• from CITIZENS on page 1
Regional Road 25 at all times.
The official groundbreaking of the long-awaited pipelines will take place Wednesday at Upper Middle and Bronte Roads.

Construction will commence in November with the pipelines expected to be completed by next summer.

One key component of the project is keeping residents and businesses informed and they will be notified when construction approaches their properties. Discussions are underway with the Conservation Halton to ensure construction at all creek crossings minimizes any impact on fish habitat.

Both pipelines will be constructed simultaneously and generally will run up the west side of Regional Road 25.

The watermain will continue along the south side of Derry Road and end about 600 metres north on Thompson Road.

The major project has its origins in the Halton Urban Structure Plan approved by Regional Council in 1994. The plan identified the need for additional servicing of Milton to allow for phased-in growth. Council gave the pipelines the green light last year.

The project is being funded by those developers with an interest in the Milton expansion area and there will be no additional cost to Halton taxpayers.
