Gardening Specialist
What do the soil amendments do for your garden?

• PEAT MOSS retains moisture, helps break up soil by adding air space

and organic matter. Used extensively with clay soil to keep it from binding back together. Contains no nutrients but makes the soil slightly acidic. • CATTLE/SHEEP MANURE natural fertilizer, source of nitrogen, breaks down slowly, improves soil texture. Mix with peat moss for a great gardening combo. • SAND improves drainage and creates air space in heavy compacted soils. • TOP SOIL the soil nearest to the surface generally dark in colour, rich in humus and organic matter. • COMPOST is shredded leaves, twigs and organic matter, rotted together to form a mix that has excellent porosity but at the same time full of nutrients and water retention abilities.

TERRA BURLINGTON

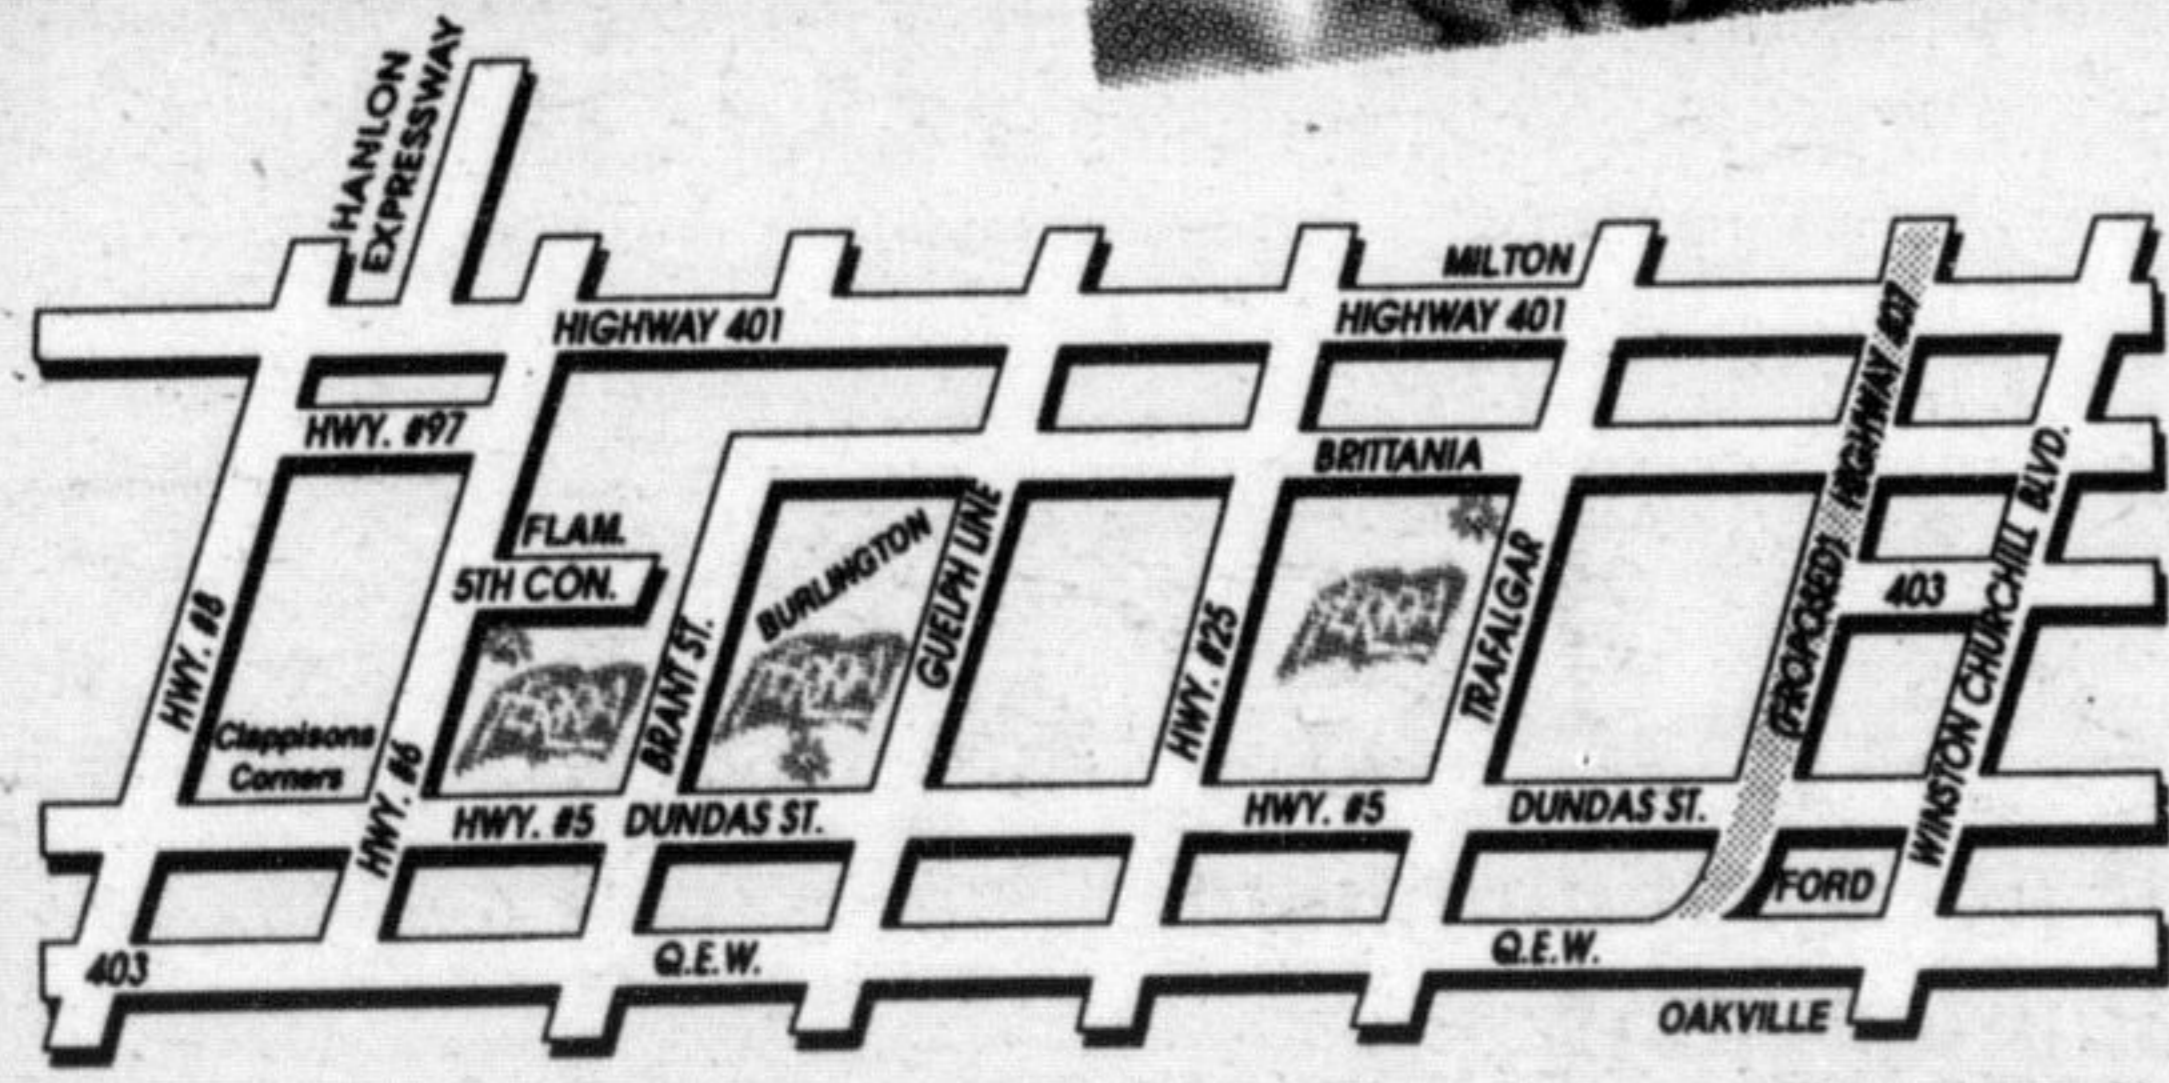

Serving Burlington, Oakville, & surrounding area located on Hwy. #5 between Brant Street and Guelph Line • (905) 332-3222

TERRA WATERDOWN

Serving the Golden Triangle & Greater Bay Area, located on the corner of Hwy. #6 at 5th Concession East • (905) 689-1999
