FABUTAN
 SUN TAN STUDIOS

437 Main St., Milton
 905-875-4010

TRUST 21 YEARS EXPERIENCE!

Q: Why does Fabutan NOT HAVE FACE TANNERS OR HIGH PRESSURE UNITS?

A: High pressure units & lamps, face tanners (which look like little TV screens) emit all three (3) types of UV light (UVA, B & C) using high pressure equipment. A tanner is exposed to UVA rays with UVB & the very dangerous UVC ray which is being eliminated by the use of a filtering system. Unfortunately, these filters are not reliable & have been known to crack or break (sometime unrecognized by the human eye) & create SEVERE BURNING.

High pressure lamps & face tanners must expose a person to ten (10) times the amount of UVA rays emitted from a low pressure tanning bed. FABUTAN feels that promoting such a tanning environment is irresponsible.

From a business & profit point of view, these units are much more profitable. They charge approximately \$1.00 per minute therefore a larger profit is earned. Fabutan chooses to be a responsible tanning company with 21 years experience in the business and does not use face tanners or high pressure units. We advocate moderate UV exposure, therefore, we elect not to expose our customers to these types of UV units.

Glass Repair - No job is too small!

At Moffatt Autoworks Inc. we offer a complete line of Glass repair. Have you ever experienced driving down the highway and a stone or rock has flown up and hit your windshield? This could leave a crack, bullseye or star in the glass of your windshield.

Most of these repairs can be done quickly and inexpensively, without replacing your windshield, if taken care of right away. If left unattended, further cracking and more extensive damage will occur. This of course equates to a much more expensive repair cost!

Wiper blades can cause scratches to your windshield if they come off. Moffatt Autoworks can buff out these small scratches with our glass buffing system.

For a quote or appointment call
 Moffatt Autoworks at 875-0660.
