The Joy of Water Gardening

Produced by Water Creations

Use of water in the garden dates back to one of the Seven Wonders of the Ancient World – the Hanging Gardens of Babylon, built in about 600 B.C. Then, as now, people enjoyed the relaxation and serenity that came from enjoying nature's beauty in a natural setting.

If you haven't yet, you'll soon discover some of the reasons why water gardening has attracted so many fans around the world.

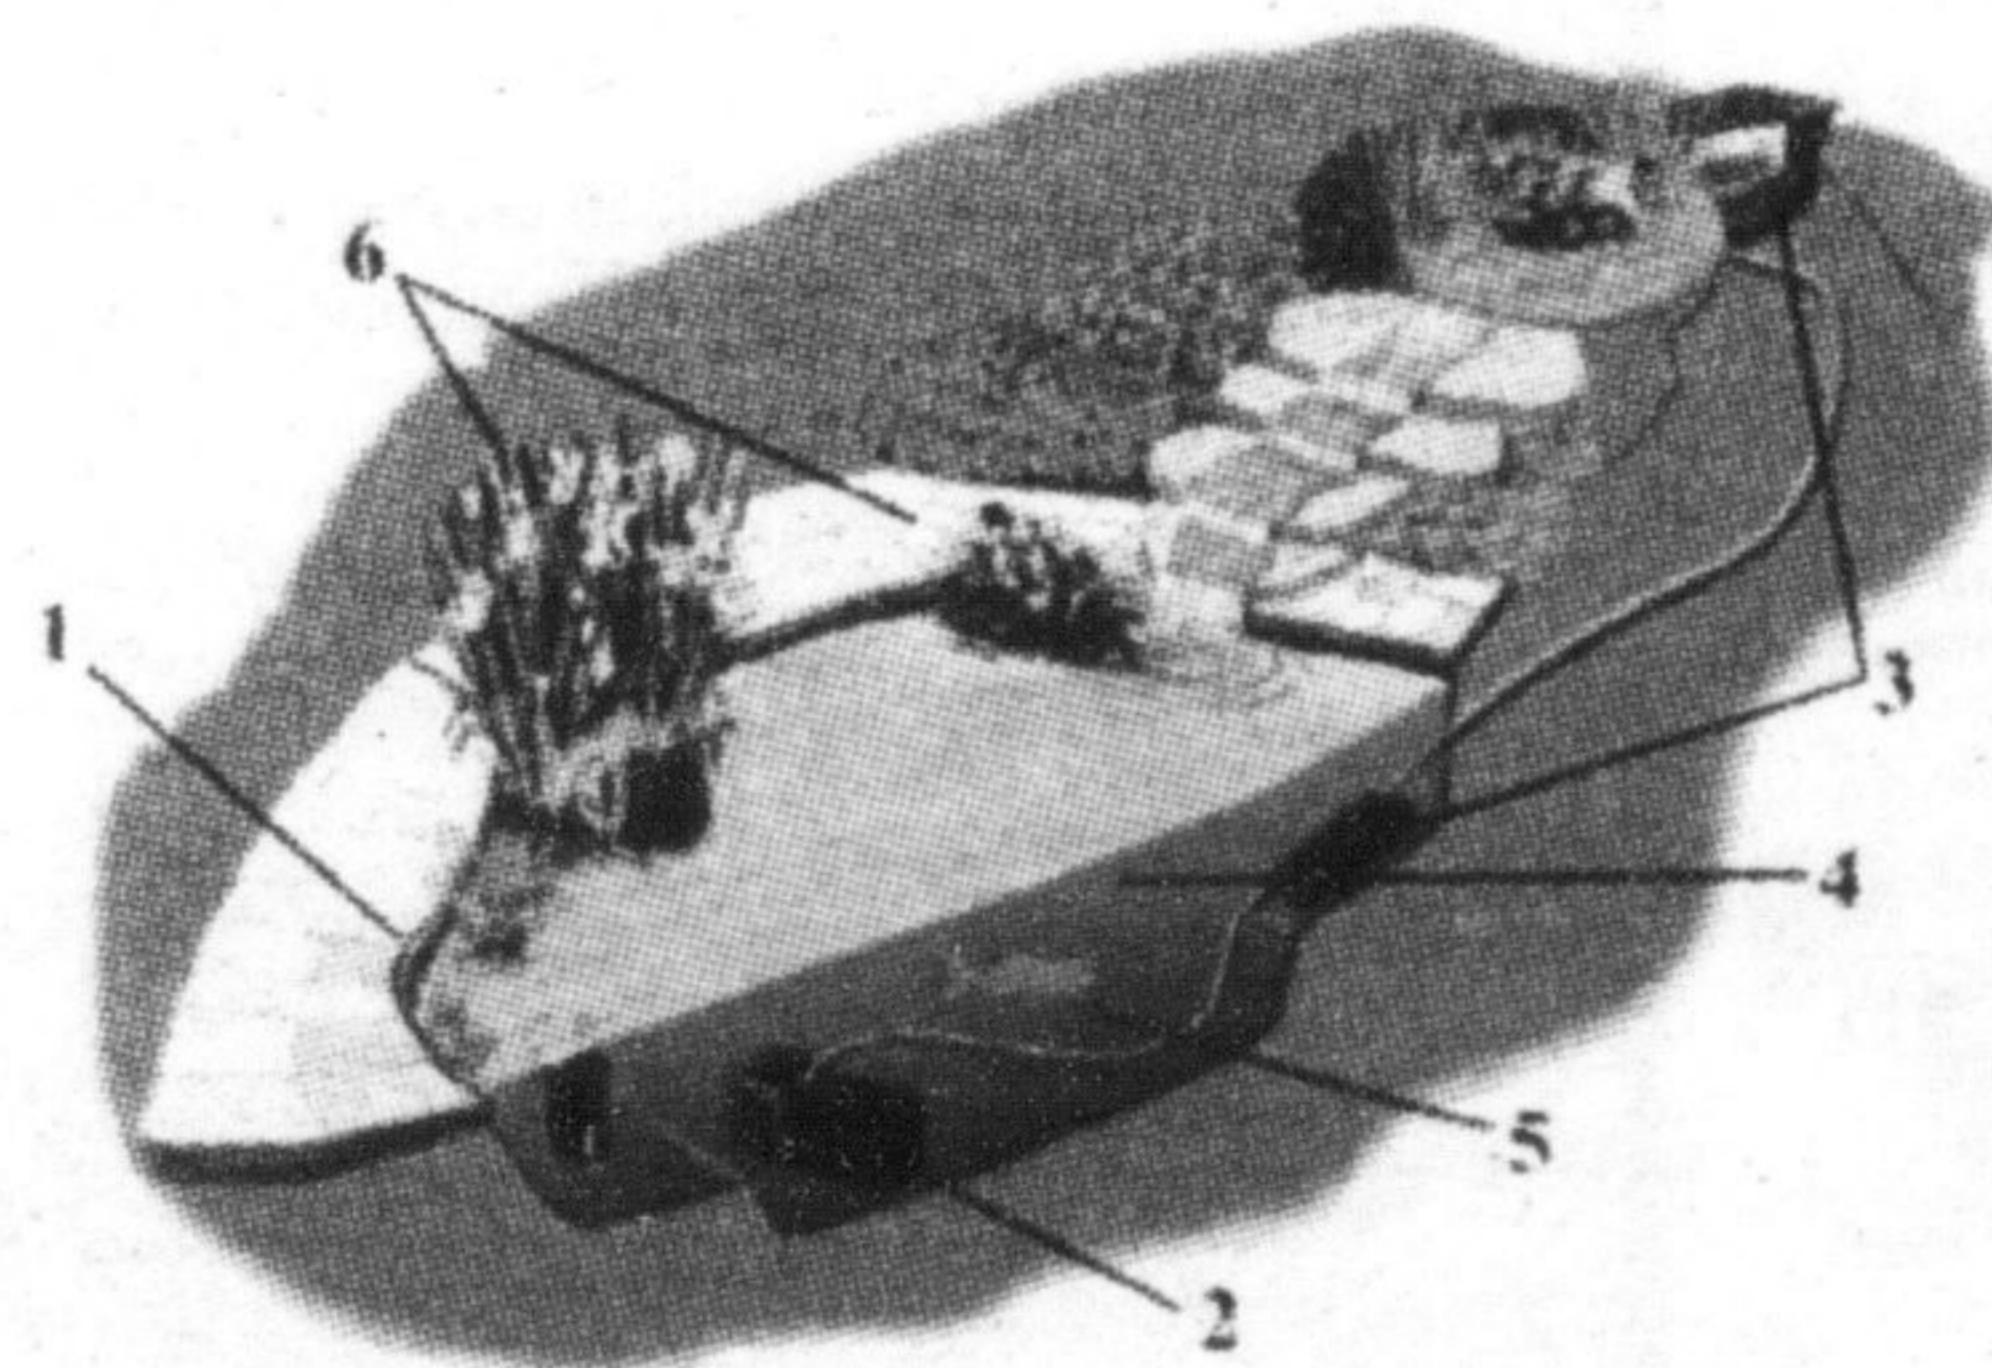

For some, it's the beauty of the plants and the serenity of fish in the slowly moving water. For others, it's the opportunity to add a beautiful natural setting to the back yard – a welcome oasis for birds and wildlife. Yet others want to provide a unique centerpiece for activities with family and friends.

If you are a beginner, the first step is to decide which type of pond you want to install. Some first time users set up a barrel water garden, made from half a whiskey barrel. These can accommodate several plants and goldfish and make an interesting addition to a deck or patio. Installing an in-ground pond can also be

easy and affordable. For additional information on top-quality products for your water garden, consult with the knowledgeable staff at the Country Depot Garden Centre.

Anatomy of a Pond

1. Pond Liner
2. Pumps
3. Filtration
4. Treatments
5. Fish Food
6. Plants
