

Home Improvement

ARE YOU READY FOR FALL?

PRO SERIES CHAINSAW

- Big power in a lightweight package; designed for use on job site, farm or around the home.
- Progressive torque provides high-speed cutting and unexcelled productivity.

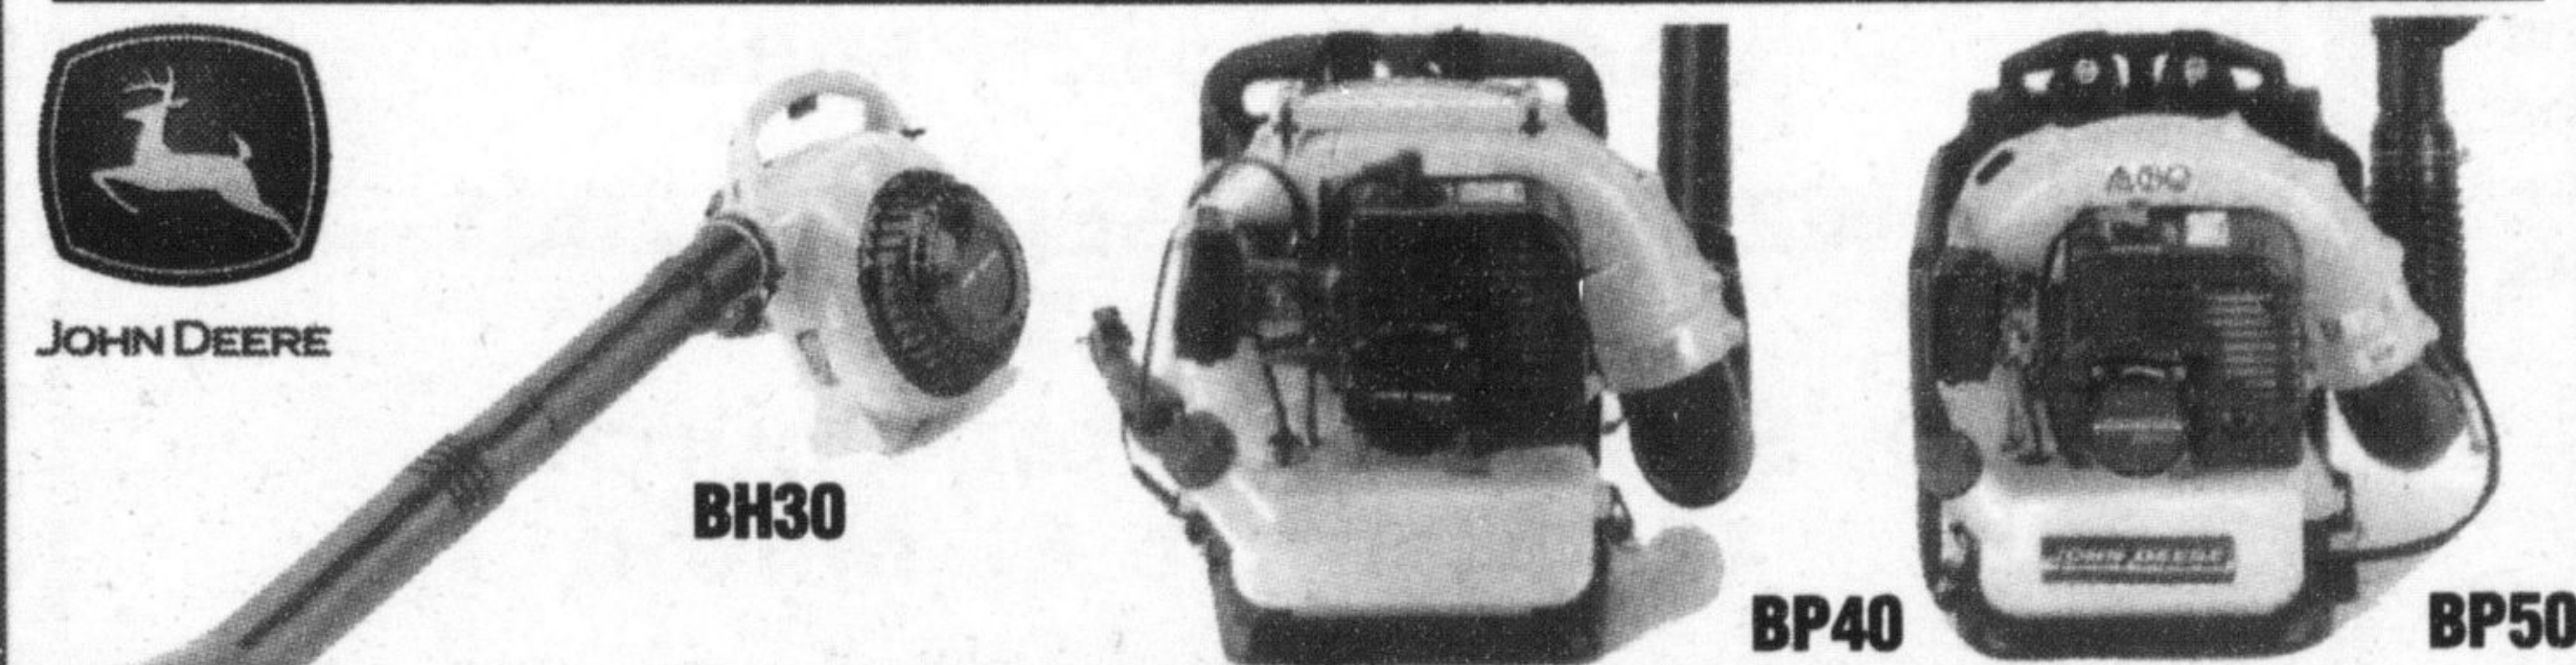

CS-4400 LIMBING SAW

- Slope Advance Ignition System (SAIS2) - automatically senses engine speed and advances ignition timing for optimum performance.
- Diaphragm carburetor for smooth power flow in any approved operating position

POWER BLOWER

- Echo's powerful commercial grade 25.4 cc dual-ring piston engine for outstanding performance.
- 65 dB(A) at 50 ft per ANSI B 175.2-1996 without sacrificing power.

PRO-SERIES POWER BLOWER

- Three models - lightweight BH30 Handheld and the Pro-Series™ BP40 and BP50 Backpacks
- Soft-tone mufflers reduce noise levels to 70 dB(A)

CHIPPERS SHREDDERS

Easy compaction of small branches, leaves & yard debris.

Many models available

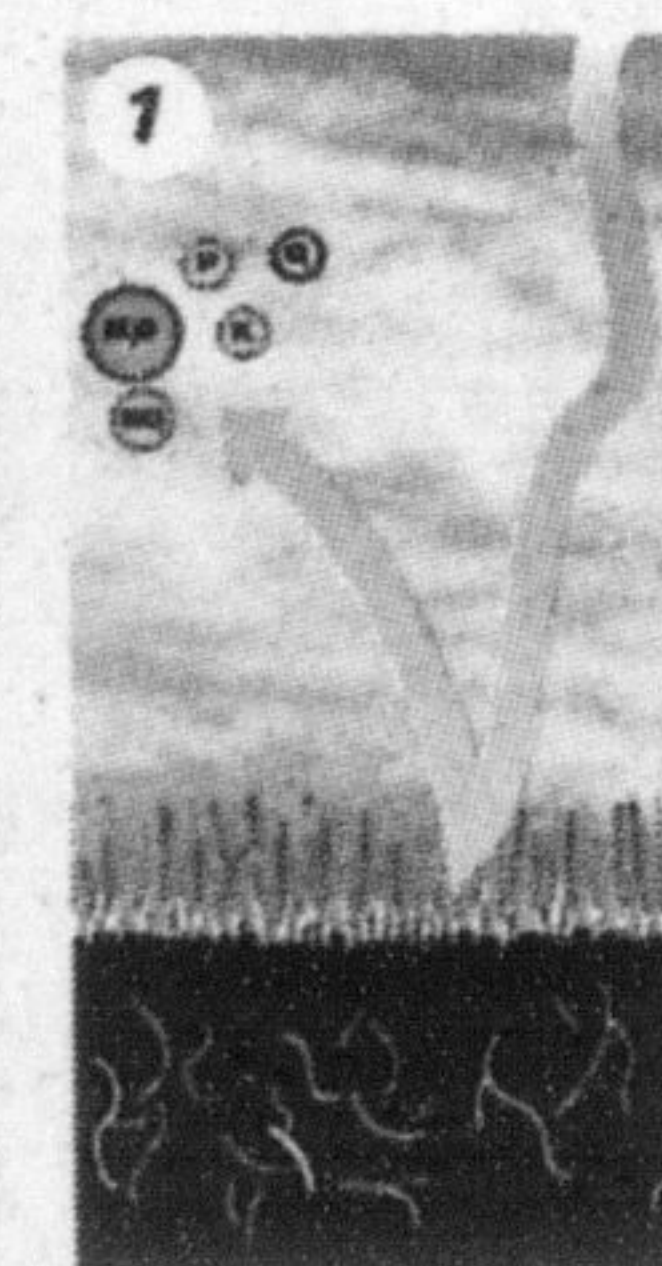

Convenient Location

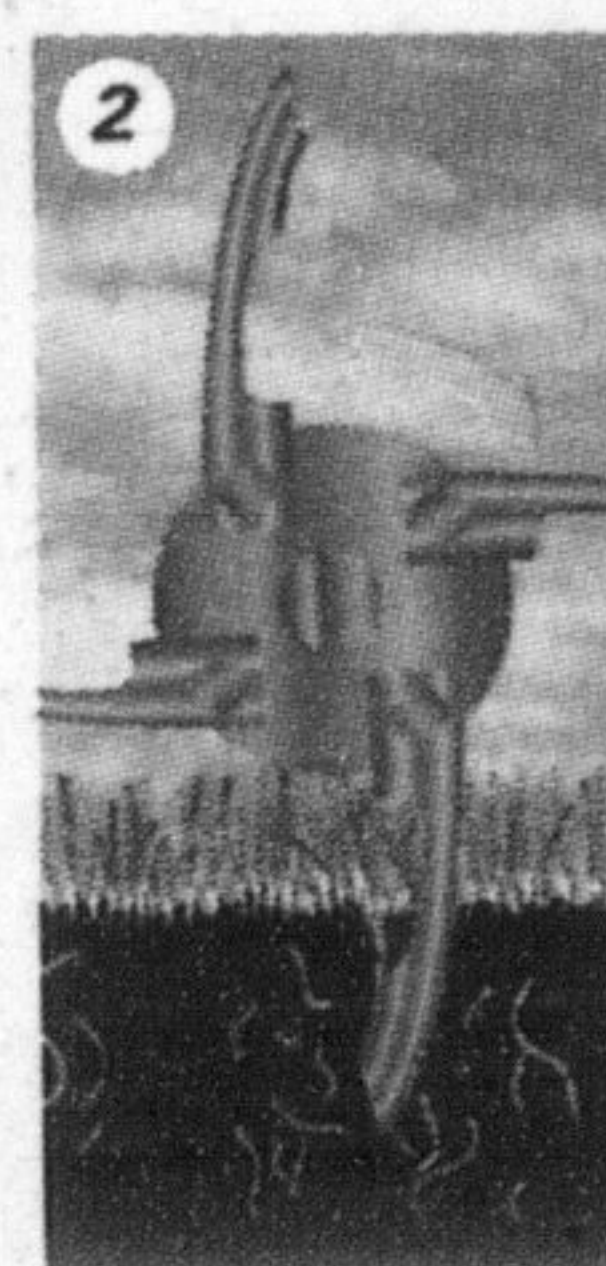

Halton Grounds Care Equipment is conveniently located on the north side of Steeles Ave., between James Snow Parkway and Esquesing Line.

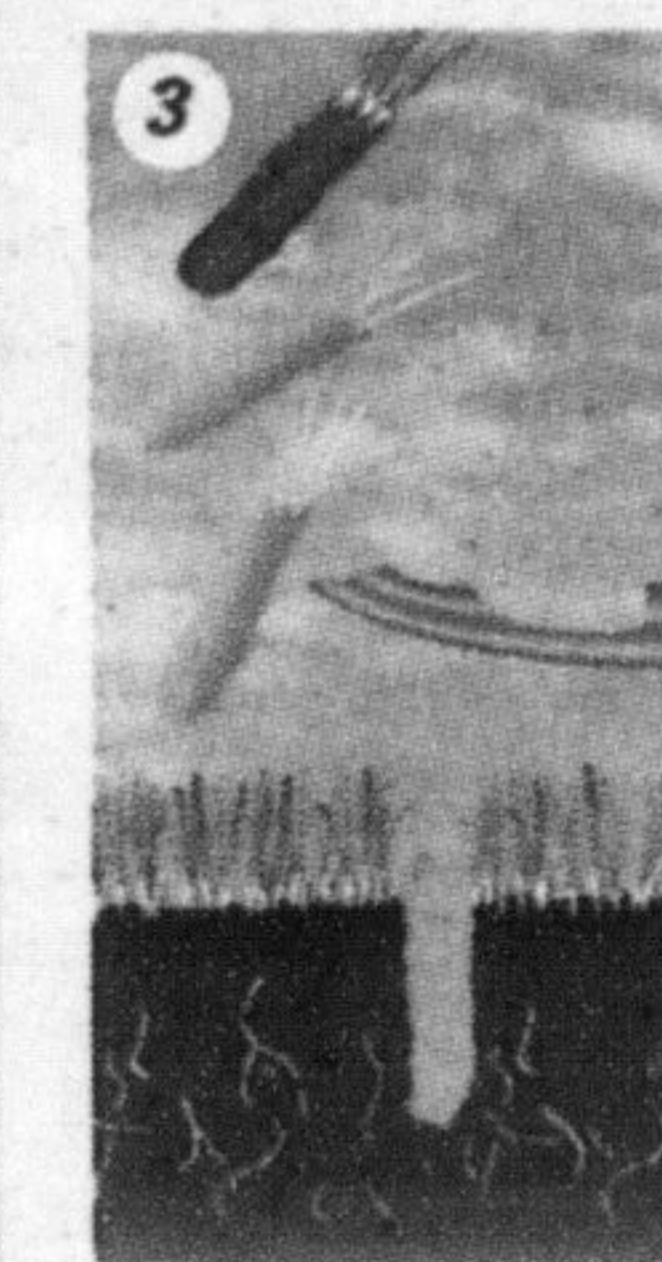

In addition to featuring the complete line of John Deere lawn and garden equipment and tractors, we offer Blue Bird lawn equipment to rent or to own. Fall is an ideal time to aerate your lawn or use the Blue Bird lawn dethatcher. Aeration and dethatching are turf care methods which dramatically increase the health and vigour of your lawn. Core aeration and dethatching (verti-cutting) may be completed with our Blue Bird power equipment. With winter quickly approaching, be sure to phone our service department to set up an appointment to have your winter equipment serviced or your lawn tractor configured for winter use. Remember us for all your sales, service and parts needs.

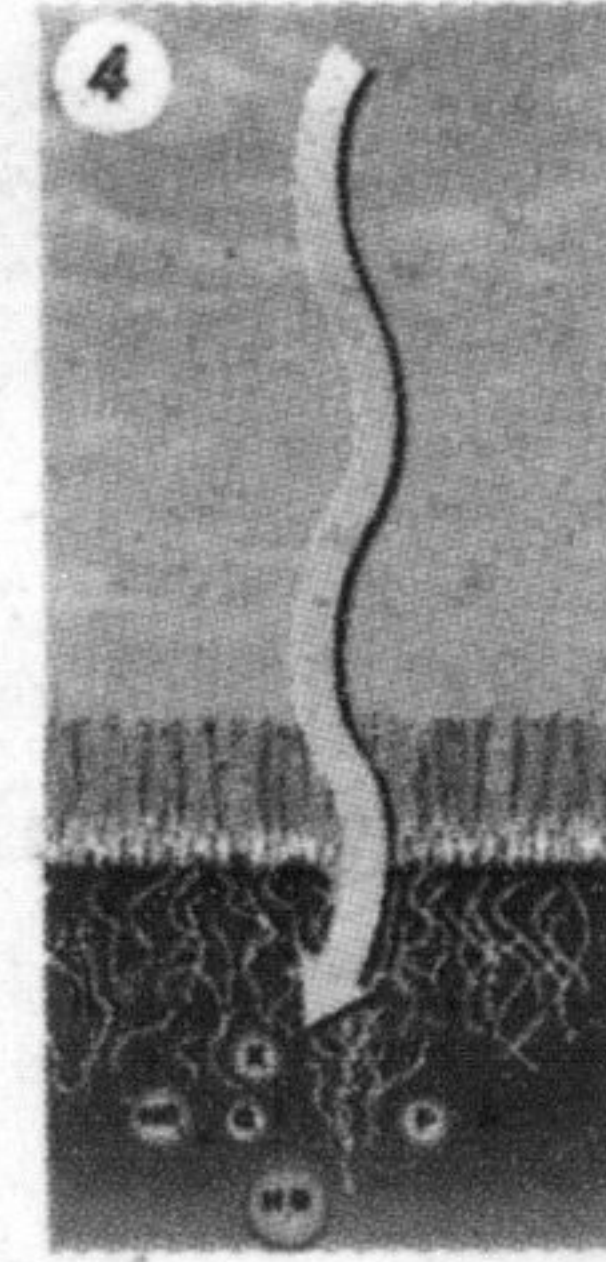

Compact soil prevents the grass from establishing a healthy root system. Adequate amounts of vital turf nutrients including water (H₂O), Oxygen (O₂), nitrates (NO₃), phosphorus (P), and potassium (K) are unable to reach the roots.

BlueBird Aerators relieve soil compaction by removing evenly-spaced cores of turf up to 3" in depth. Standard coring spoons or optional spike and slicing blade reels enable you to tailor aeration to grasses and soil conditions.

Once the soil is aerated air exchange is improved and the soil can easily absorb water, fertilizer and other nutrients.

Aeration promotes deeper root growth for a lawn that is lush, healthy and drought resistant.

NOTHING RUNS LIKE A DEERE®
