

HOME & GARDEN

Planting Instructions

You have purchased a healthy living plant. Keep it that way by taking the following steps:

1. Upon your arrival at home, place the plant in the shade and keep moist until planted.
2. Dig a hole, minimum 30-40 cm larger than the pot, ball or root spread.
3. Rough the sides and bottom of the hole to help drainage and root penetration.
4. Clay soil: Plant minimum 10-15 cm above the surrounding soil. Backfill with a mixture of topsoil, manure and peat moss.
5. Sandy soil: Backfill with a good gardening mix.

6. Before backfilling: All restraints must be cut away from the trunk, (wire, burlap, plastic containers). Fibre pots should be cut off. Unless plant is rooted, then remove rim and severely cut pot. Root bound plants should have the root-ball cut lengthwise.
7. Trees should be staked and tied.
8. Spread mulch or compost around the base to keep plants moist. Feed twice yearly at the surface.
9. Roses should be planted with the bud (bump on stem), 2" below the surface.
10. Water as needed 2-3 times weekly during 1st year.
