## Repel summer insects and enjoy the best of the outdoors

(NC)—After battling the harsh winter, the change in season is sure to provide a welcome relief for Canadian outdoor enthusiasts. Unfortunately, the warmer weather also brings a pesky problem – insects. Mosquitoes, black flies and other irritating insects can turn a fun outdoor adventure into an annoying weekend. With the presence of West Nile Virus, these bugs are causing more concern than ever before.

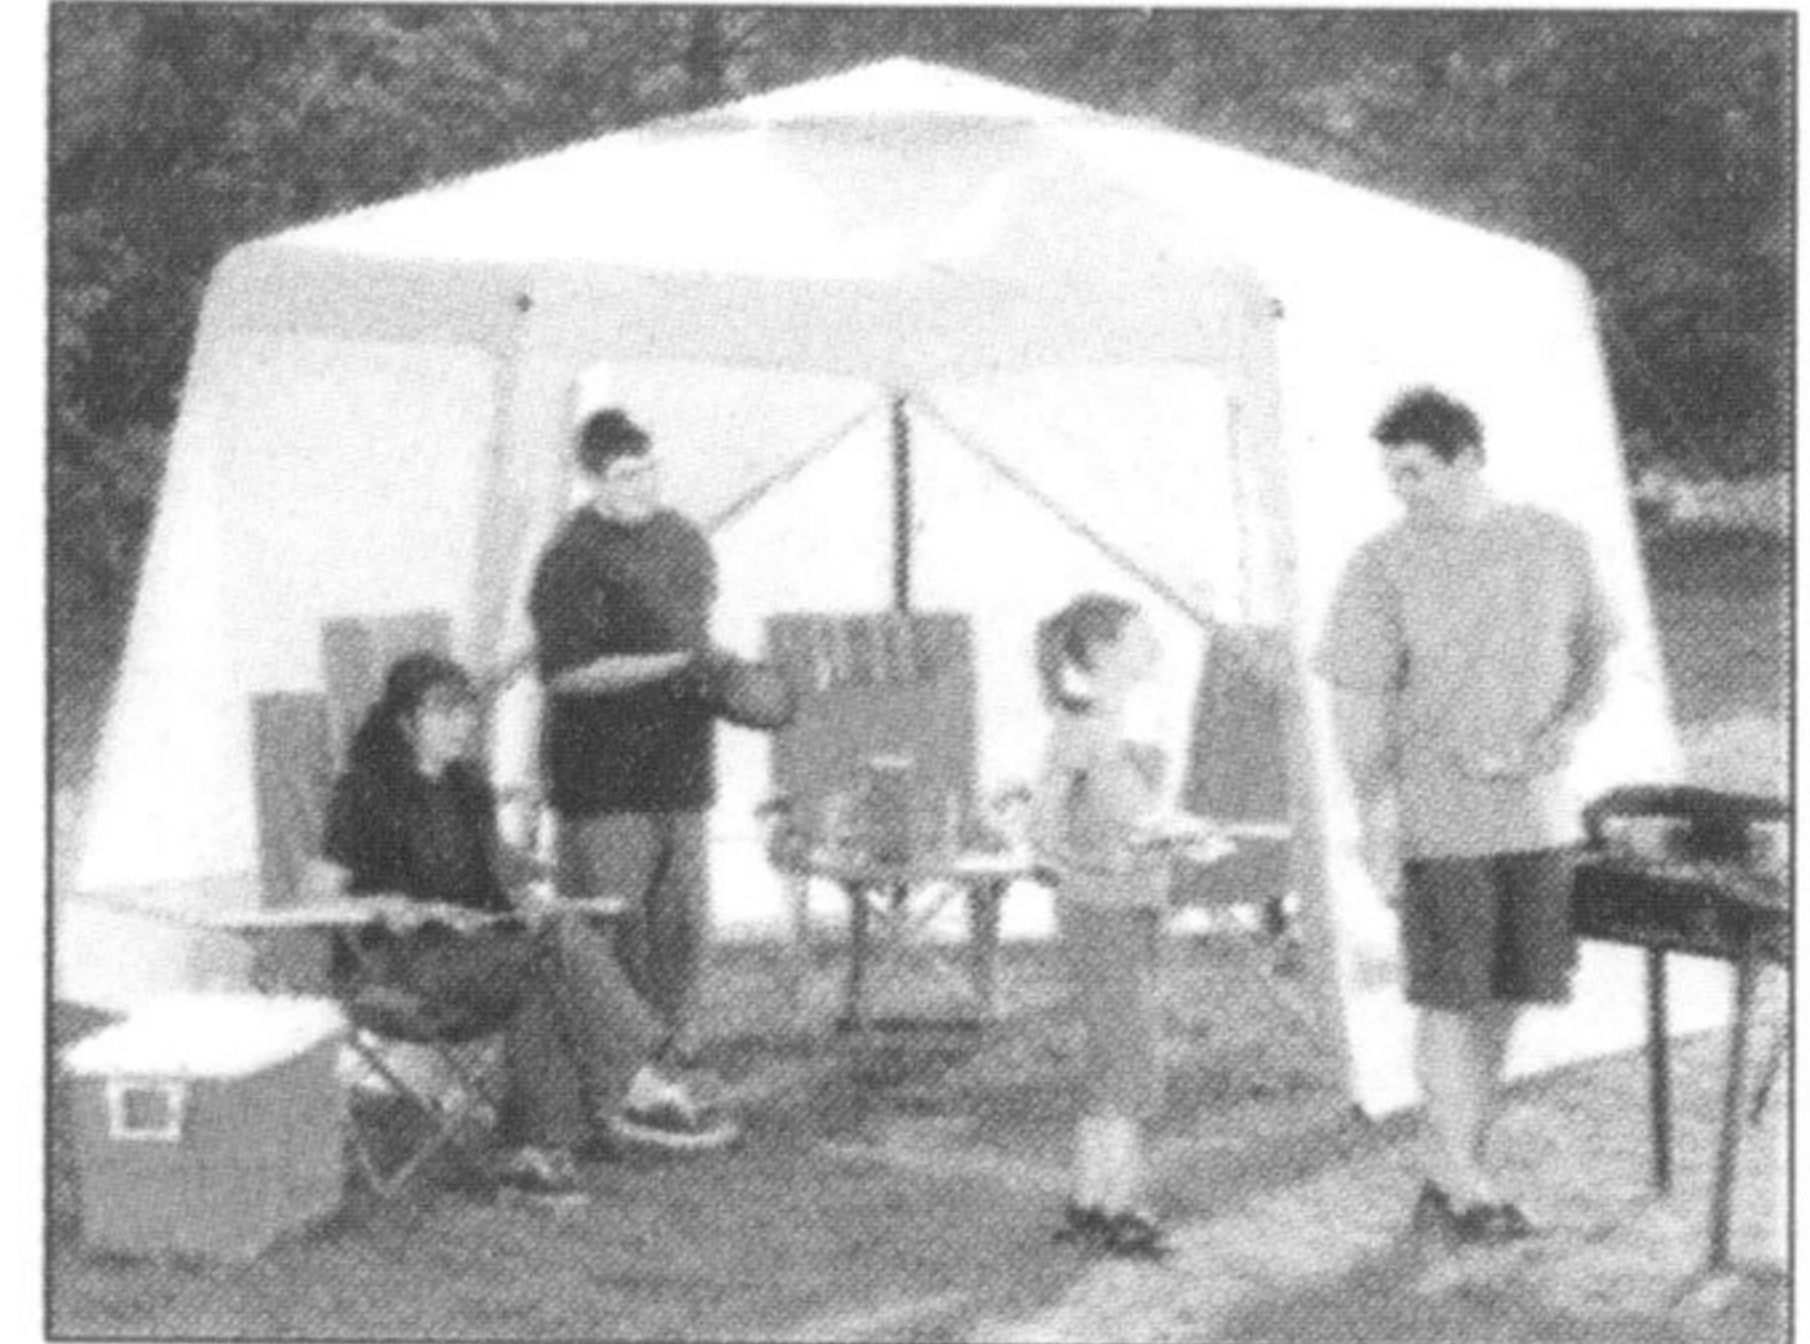

Canadian Tire is one of the stores that carries a full line of protective products to help stop these pests from ruining the summer. Here are some ideas to try:

- Protect yourself with a new non-DEET personal bug repellent. Made from the lemon eucalyptus plant, this repellent is non-toxic and as effective as DEET-based products.

- One of the hottest items this summer is sure to be a new product called the Mosquito Magnet. It attracts and kills mosquitoes and all other biting insects by mimicking the signals that attract them to humans and animals. Units

range in size with some designed to cover an area of up to one acre.

- Create a safe outdoor environment for family inside a sturdy screen house. Large screen houses, made from "no-see-em" mesh, are designed to allow a cool breeze to pass through but are woven together so tightly, even the smallest of insects cannot penetrate. Screen houses are also great for dining al fresco.

- If you're planning to go walking or hiking, consider bug jackets and hats that help keep you cool and protected from insect bites.

- Illuminate outdoor spaces with aromatic citronella candles or post wicker and bamboo citronella torches around the area where your family and friends will be during the evening. Citronella helps keep the bugs away and the lighting will accent your garden, patio or deck.

Exploring the great outdoors is a summer tradition for Canadians of all ages. Be sure to visit Canadian Tire along your way for everything you and your family need to get started on enjoying the warm weather.
