

'Water Depot' ... get the drop on clean drinking water!

Come join us next weekend - Oct. 3rd, 4th & 5th

When Milton's newest business holds its grand opening next weekend, Water Depot owners Brian and Penny Agnew and Peter Jasica hope the community will stop in to see what their unique store has to offer.

"People who come in and see the store are excited," said Peter of their customers' reactions since the franchise opened their doors in July.

And what are they so excited about?

The bright, welcoming service area offers the convenience of "one-stop" shopping for any residential water needs. And all of the Water Depot's services are backed by a solid knowledge of the industry. Combined with the lowest prices in town, this means that there really is no need to go anywhere else.

"Our motto is 'We beat the competition every time,'" noted Brian, who brings 15 years of experience to the Water Depot. "People can come in and see their water filtered and treated before their eyes. We also have a bottle washer in the store.

"We also provide an analytical service and can recommend the appropriate water treatment system for any problem," he added. "Nobody

has the range that we have. We are a true water store and provide service to all makes and models."

The Water Depot carries a wide array of coolers, bottled water, water softening products, water treatment equipment, hot tubs and disinfection systems that guarantee bacteria free water. Cutting edge technology on site means their customers can enjoy purified reverse-osmosis drinking water.

"There is no chance of bacteria or contamination of any kind," Peter said of the treatment process. "It tastes better too - once people taste purified water, they never go back."

Peter noted that he was attracted to the Water Depot because of the purchasing power and the range of equipment offered to their franchisees. In addition, their pricing philosophy allows the store owners to pass factory-direct pricing on to their customers.

In choosing the location of the store - the Barrie based company also has franchises in Waterdown and 19 other locations throughout Ontario plus offices in the U.S. and the United Kingdom. Peter and Brian say that Milton's positioned for easy

access for both municipal and rural customers.

Because of the repeat nature of the business Brian and Peter will have the opportunity to get to know their customers, something they are looking forward to.

"We offer prepaid packages as a convenience to the customer," Peter explained. "We'll see many people back every week and that's kind of nice. You don't get that in every business."

"It makes for a personal atmosphere," agreed Brian. "And we'll do as much as we can to establish that relationship."

Peter and Brian stress that the Water Depot can even help customers using other systems, as they can bring in their own containers for refills, if they choose. The Water Depot can also service all makes and models of water treatment equipment, and they sell replacement parts such as filters to fit other

WATER SOFTENERS IRON & SULPHUR SOLUTIONS

brands.

The Water Depot, located at 525 Ontario St. South, Milton (Laurier and Hwy. #25) formerly Wimpey's Diner, welcomes the community during their grand opening weekend, October 3-5. The ribbon-cutting ceremony will be held on Saturday, October 4th at 11:00 a.m. Mayor Krantz, Ted Chudley and many local politicians and celebrities will be on hand to celebrate the occasion.

Brian says "Come join us for lunch, refreshments, balloons for the children and other festivities. You won't believe our Grand Opening Specials."

And that's just one more reason to be excited about the Water Depot's new store.
