# WATER HARDNESS TEST DAY

This Saturday, November 8 between 10am and 3pm, we invite you to bring in a sample of your household water for complimentary testing.

Naturally occurring minerals can turn soft rain water into hard water before it reaches your home. Not all minerals and impurities are removed by local water treatment systems. Hard water is hard on clothes, skin and plumbing. It turns simple everyday tasks into hard work by reducing the effectiveness of cleansers and detergents. Bring in a sample and find out how the water at your house rates.
