Is The Grass Greener?

The grass sometimes seems greener on the other side of the fence. With the proper maintenance and lawn care program you too can have the lush green lawn you've always wanted.

The number of applications of fertilizer applied yearly will make a difference as to how green your lawn becomes. If you want a lush green lawn make four applications per year spring, summer, fall and winter. The lawn care program you use will depend on the state of your lawn. If you have had problems this past year with insects, weeds or are starting a new lawn, your program will vary. This time of year Scotts, Turfbuilder with Halts can help prevent the unwanted return of Crabgrass.

Scotts, has a full line of easy to use lawn care products available. These products can help you create the lush green paradise you've always wanted making the grass greener on your side of the fence.
