

The Regional Municipality of Halton

A Partnership That Works!

Notice of Pesticide Use

Beginning the week of May 10th and continuing throughout the summer, the Halton Region Health Department will larvicide standing water on public lands under the direction of the Medical Officer of Health, Dr. Bob Nosal.

Monitoring of standing water has indicated that mosquito larvae are present. Larvicide will be applied by a licensed applicator contracted by the Region.

Larvicide will be used to control mosquito larvae in order to reduce the incidence of West Nile virus in Halton.

A granular formula of the larvicide Bti (*Bacillus thuringiensis israelensis*), Aquabac 200G, registration number 26863, will be placed in affected standing water on public lands in urban areas in Burlington, Oakville, Halton Hills and Milton.

Signs will be posted at each location indicating when the larvicide was applied.

For the locations and dates of treatment, please visit our Web site at www.region.halton.on.ca/health. For more information about West Nile virus, please call the Halton Region Health Department.

Halton Physician Appreciation Week May 17th to 23rd

In Halton, we are fortunate to have first-rate medical care available to us, thanks in large-part to the skilled and dedicated physicians who have chosen to make this community home to their practices. At Halton Region, we believe it is important to recognize these physicians for their contribution to the health and well being our community, which is why we have designated May 17th to 23rd Physician Appreciation Week.

Physician Appreciation Week serves as a reminder of the valuable resource Halton's medical community is, and gives the Region an opportunity to say thank you to our community's physicians for the excellent care they provide. We encourage you to thank your physician for the great care he or she provides you and your family, today!
