Crave Systems – Your local Computer source

Crave Systems, located at 153 Main Street East, will be celebrating its 3rd Anniversary this November. Originally started as a home based business, Crave Systems now operates as a flourishing retail storefront in beautiful downtown Milton.

Crave Systems is owned and operated by local resident Chris Derksen, who grew up in Milton and has lived here for more than 25 years. Chris has worked in the IT Industry as a Computer Technician repairing and building computers for almost 8 years. He and his wife Kristina, who was born in Milton, have three children together.

Crave Systems was first established to provide clients with custom built computer systems, tailored to exact needs and specifications. Chris saw a demand for computer systems with unparalleled attention to quality, performance, compatibility and reliability. And it's in those systems that you'll find only the best computer hardware available on the market. Name brands like Asus, Intel, OCZ Technologies, Kingston, Antec, ATI, Lite-On, and Western Digital. "We use Asus motherboards exclusively in all of our systems" explains Chris. "We are very pleased to be an authorized reseller, and to be partnered with such excellent computer hardware manufacturers".

Although Chris keeps a substantial display of inventory, there's even more that happens behind the scenes. Chris is kept busy repairing computer systems, diagnosing and replacing faulty hardware, maintaining or upgrading PC's, performing data recovery and ridding computers of adware, spyware, malware, and viruses. And this is an area which Chris is very proud to excel in. "Computer repair is a very specialized field, and one that a computer owner should take seriously" Chris says. "To the customer it's like finding the right mechanic. One that won't sell you parts you don't need, or charge you to fix something that's not broken. You have to be honest with the customer to establish trust, which I believe we've done very well".

It's not only complete systems you'll find at Crave Systems. They also carry a broad range of internal parts and peripherals including motherboards, video cards, sound cards, hard drives, optical drives, and monitors. "We'll always do our best to get anything you need." pledges Chris.

So if you've got a problem with your current computer system, looking to upgrade it, or if you happen to be out shopping for a new one, stop by Crave Systems. A local choice that will never leave you disappointed. In fact, you'll only be left Craving more!
