

Milton Success Stories

PASSION COMMITMENT LOVING SERVICE

These three words describe why Dr. Marlene Turner has been running such a successful practice for over 23 years.

Practicing on Main Street during her entire career, Dr. Turner, a chiropractor, feels it is important to be on the leading edge of the diagnosing and treatment of patient's conditions. Upgrading and adding new therapies on a regular basis allows her patients to achieve the results they are looking for. Her latest addition to the practice includes *Infrared Thermography*, (also known as thermal imaging), which is a painless, non-invasive "state-of-the-art" clinical test that can help detect areas of concern in the body. Dr. Turner also has a new computerized gait scan which aids in diagnosing the source of foot pain, hip and knee pain and back and neck pain. In addition, Dr

Turner offers homeopathic products and vitamins "to support the body in healing".

The foundation of her practice however, is the rapport she establishes with her patients and the chiropractic adjustment.

Her patients come to know that she is about the whole person, body, mind and spirit. She is about locating the cause of their condition, whether physical, chemical or emotional and then takes the necessary steps to correct it. This can involve releasing any nerve involvement in the body so the body is allowed to heal. As well, it is important for her patients to know that "violent neck cracking" is from the dark ages,

and that gentle, safe approaches are now used. There are alternatives such as the activator, which they use that does not involve turning the neck at all.

Dr. Turner's practice continues to grow and expand in Milton. She continues to accept new patients and hopes to practice in Milton for many more years to come. Dr. Turner has lived in Milton for all of her 23 years of practicing and continues to raise her 4 children here.

Dr. Marlene Turner has been serving Milton for 23 years. She has the latest in technology to serve her patients better and uses very gentle techniques to ensure every client is comfortable.

Right: Dr. Marlene Turner discusses with a patient a variety of techniques that can be used to help with neck pain.
