

SECURE THE FUTURE FOR YOUR CHILD
...Use Restraint Every Time You Drive!

STOP

There are just a few warnings you all parents should know about the correct way to use child restraints.

Take A Back Seat
 It's the safest place in a car, and if your car has a passenger air bag, it's essential that children under 12 ride in the back.

Do An About Face
 Buckles up to one year (up to 20 lbs) should ride in a car seat facing the rear of the back seat.

Keep a Tight Rein
 When installing a car seat, make sure your car's safety belt stays tight around the safety seat. Harness straps go over the child's shoulder and should be adjusted so that you can slip only one finger underneath the straps at your child's chest.

Don't Stouch On Safety
 Generally, children up to 40 lbs. should remain in a car seat. After that, a booster seat may be used along with the car's safety restraint system. The top belt should lie flat across the upper thighs, the shoulder belt over the shoulder and across the chest.

Dateline
