## Wedding Festivities With a Theme

Continued on Page B5

to Walt Disney World, consider throwing a Cinderella-themed wedding instead. Ride to the ceremony in a horse-drawn carriage. Wear dainty glass-slipper-inspired shoes with your billowing ball gown. And ensure that your future husband is an enchanting Prince Charming.

### EYE FOR DETAIL

Feel free to get extravagant with the details of your theme wedding. After all, the décor, wardrobe and special touches you include will help solidify the theme. Some items to consider:

- Use coordinating accessories. Repetition of a common element is a simple way to carry out your theme. If you want a butterfly wedding, use pillar candles with butterfly

accents and napkin rings adorned with butterflies, and hang delicate twinkle lights to simulate butterflies in flight.

- Involve your guests. While it's fun for you and the wedding party to be swept up in the theme, don't forget to include your guests in the festivities. A Renaissance wedding may inspire guests to dress in period clothing. Word invitations and seating cards in Old English to keep the tone of the celebration consistent. However, remember that not all guests may want to don a corset or carry a sword to the festivities! Keep participation voluntary and everyone will be smiling.

- Expect naysayers. Some family members or friends may not be recep-

tive to your theme idea. Express that it is your big day and you reserve the right to have the party you desire — especially if you're paying for the event. To keep the peace, try to incorporate some traditional elements where possible.

Your theme wedding is certain to be memorable and will certainly be talked about for a while if done right. While a wedding is the beginning of a serious, life-changing event called marriage, there's no reason it shouldn't be as fun, extravagant or exotic as you'd like. So have fun with themes and get those creative juices flowing!
