

THE GARDEN WIZARD

LANDSCAPE DESIGN AND INSTALLATION

Stonework • Plantings • Landscape • Water Features

The Garden Wizard is a custom design company devoted to listening to our clients and achieving each homeowner's desires. We work closely with our clients enabling them to have a clear understanding of their landscape plan and what it will develop into.

We believe that your landscape plan is the most important step in realizing your landscape dreams.

Dear Mike and Julien,

What can we say to thank you except WOW!

We are absolutely thrilled with the beautiful landscaping you provided for us in both our front and back yards. From our very first meeting with you, right through to the end of the project, we have enjoyed dealing with you, and we are now enjoying sitting in the beautiful garden you have created for us.

Your creativity, professionalism and friendly service made it a pleasure to deal with you. You really listened to the type of people we are and our lifestyle, and you created a landscaped yard that is perfect for us. You considered that fact that we wanted a beautiful yard that required minimal care, plus the fact that we have two young children that would be running around the yard.

We have received numerous compliments from our family, friends and neighbours, and many are asking for your phone number! We have only good things to say about dealing with you and your staff. We were very impressed with your willingness to sit down and discuss our unique desires as well as the follow up you provided to ensure the continuing care of our yard. Everything from detailing what it was you were going to do and why, to leaving the job site in good order while you were on the job has made us a very happy client.

We would not hesitate to refer you to everyone we know and have already mentioned you work to many.

Once again, thank you for your care and great work.
