ELDESCO

is an innovative electronic design and manufacturing house committed to meeting the needs of clients. Our fast prototype turnaround, responsive client relationships, and creative designs are combined with services ranging from electronic repair to preventative maintenance and engineering.

Web Application Developer

As a key member of our business application team, you will take responsibility for application and database design and implementation and maintenance of our corporate website and intranet web applications. Innovative with details and strategic with the 'big picture', you will optimize knowledge of GUI design, web usability, and user-centred designs to customize interfaces, assist with security, and resolve issues. You have at least one year of web development/programmer experience and strong time and project management skills. Your breadth of knowledge encompasses Access and MS SQL databases, MS SQL Server database, component object model, MS IIS, VB Script, HTML/CSS, Java/JSP Script, XML, ASP, and PHP.

Embedded Software Engineer

You will provide leadership and expertise to our product development team, maintain existing and develop new embedded software systems, and resolve technical issues. You have an engineering degree or the equivalent and at least three years' experience developing embedded software on 80C51, PIC, HOLTEK, ARM, and AVR microprocessors. Your knowledge of embedded hardware architectures and experience with tools such as logic analyzer, oscilloscopes, debuggers, and emulators are supported by strong teamwork and communication skills.

Electrical Engineer/PCB Designer

You will take responsibility for contributing to the full life-cycle development of hardware/firmware and the design, procurement, evaluation, and manufacture of multi-layer printed circuit boards and flexible circuit boards. You will also produce electrical schematics, layouts, and PCB and BOM documentation. You have a degree in electrical engineering or the equivalent, at least two years' relevant experience, and comprehensive knowledge of analog and digital circuitry and design standards. Your experience with CAD tools such as Protel is complemented by a working knowledge of fine pitch devices, micro via technology, high-density BGA and SMT devices, and measuring transmission line performance.

If you are prepared to build upon our great reputation for products and services, we welcome you to apply to:
