

Milton Success Stories

Bronte Drycleaners provides dry cleaning for all types of house hold items garments and fabrics. Everything is done on the premises whether it's stain removal for clothing, alterations, cleaning of smoke-damaged clothing or standard cleaning. "We clean silks leathers, suedes, wedding dresses, curtains, drapes, comforters and many household items" informed Manjit longtime owner of Bronte Cleaners. **Milton's Only Environmentally Friendly Dry Cleaner.**

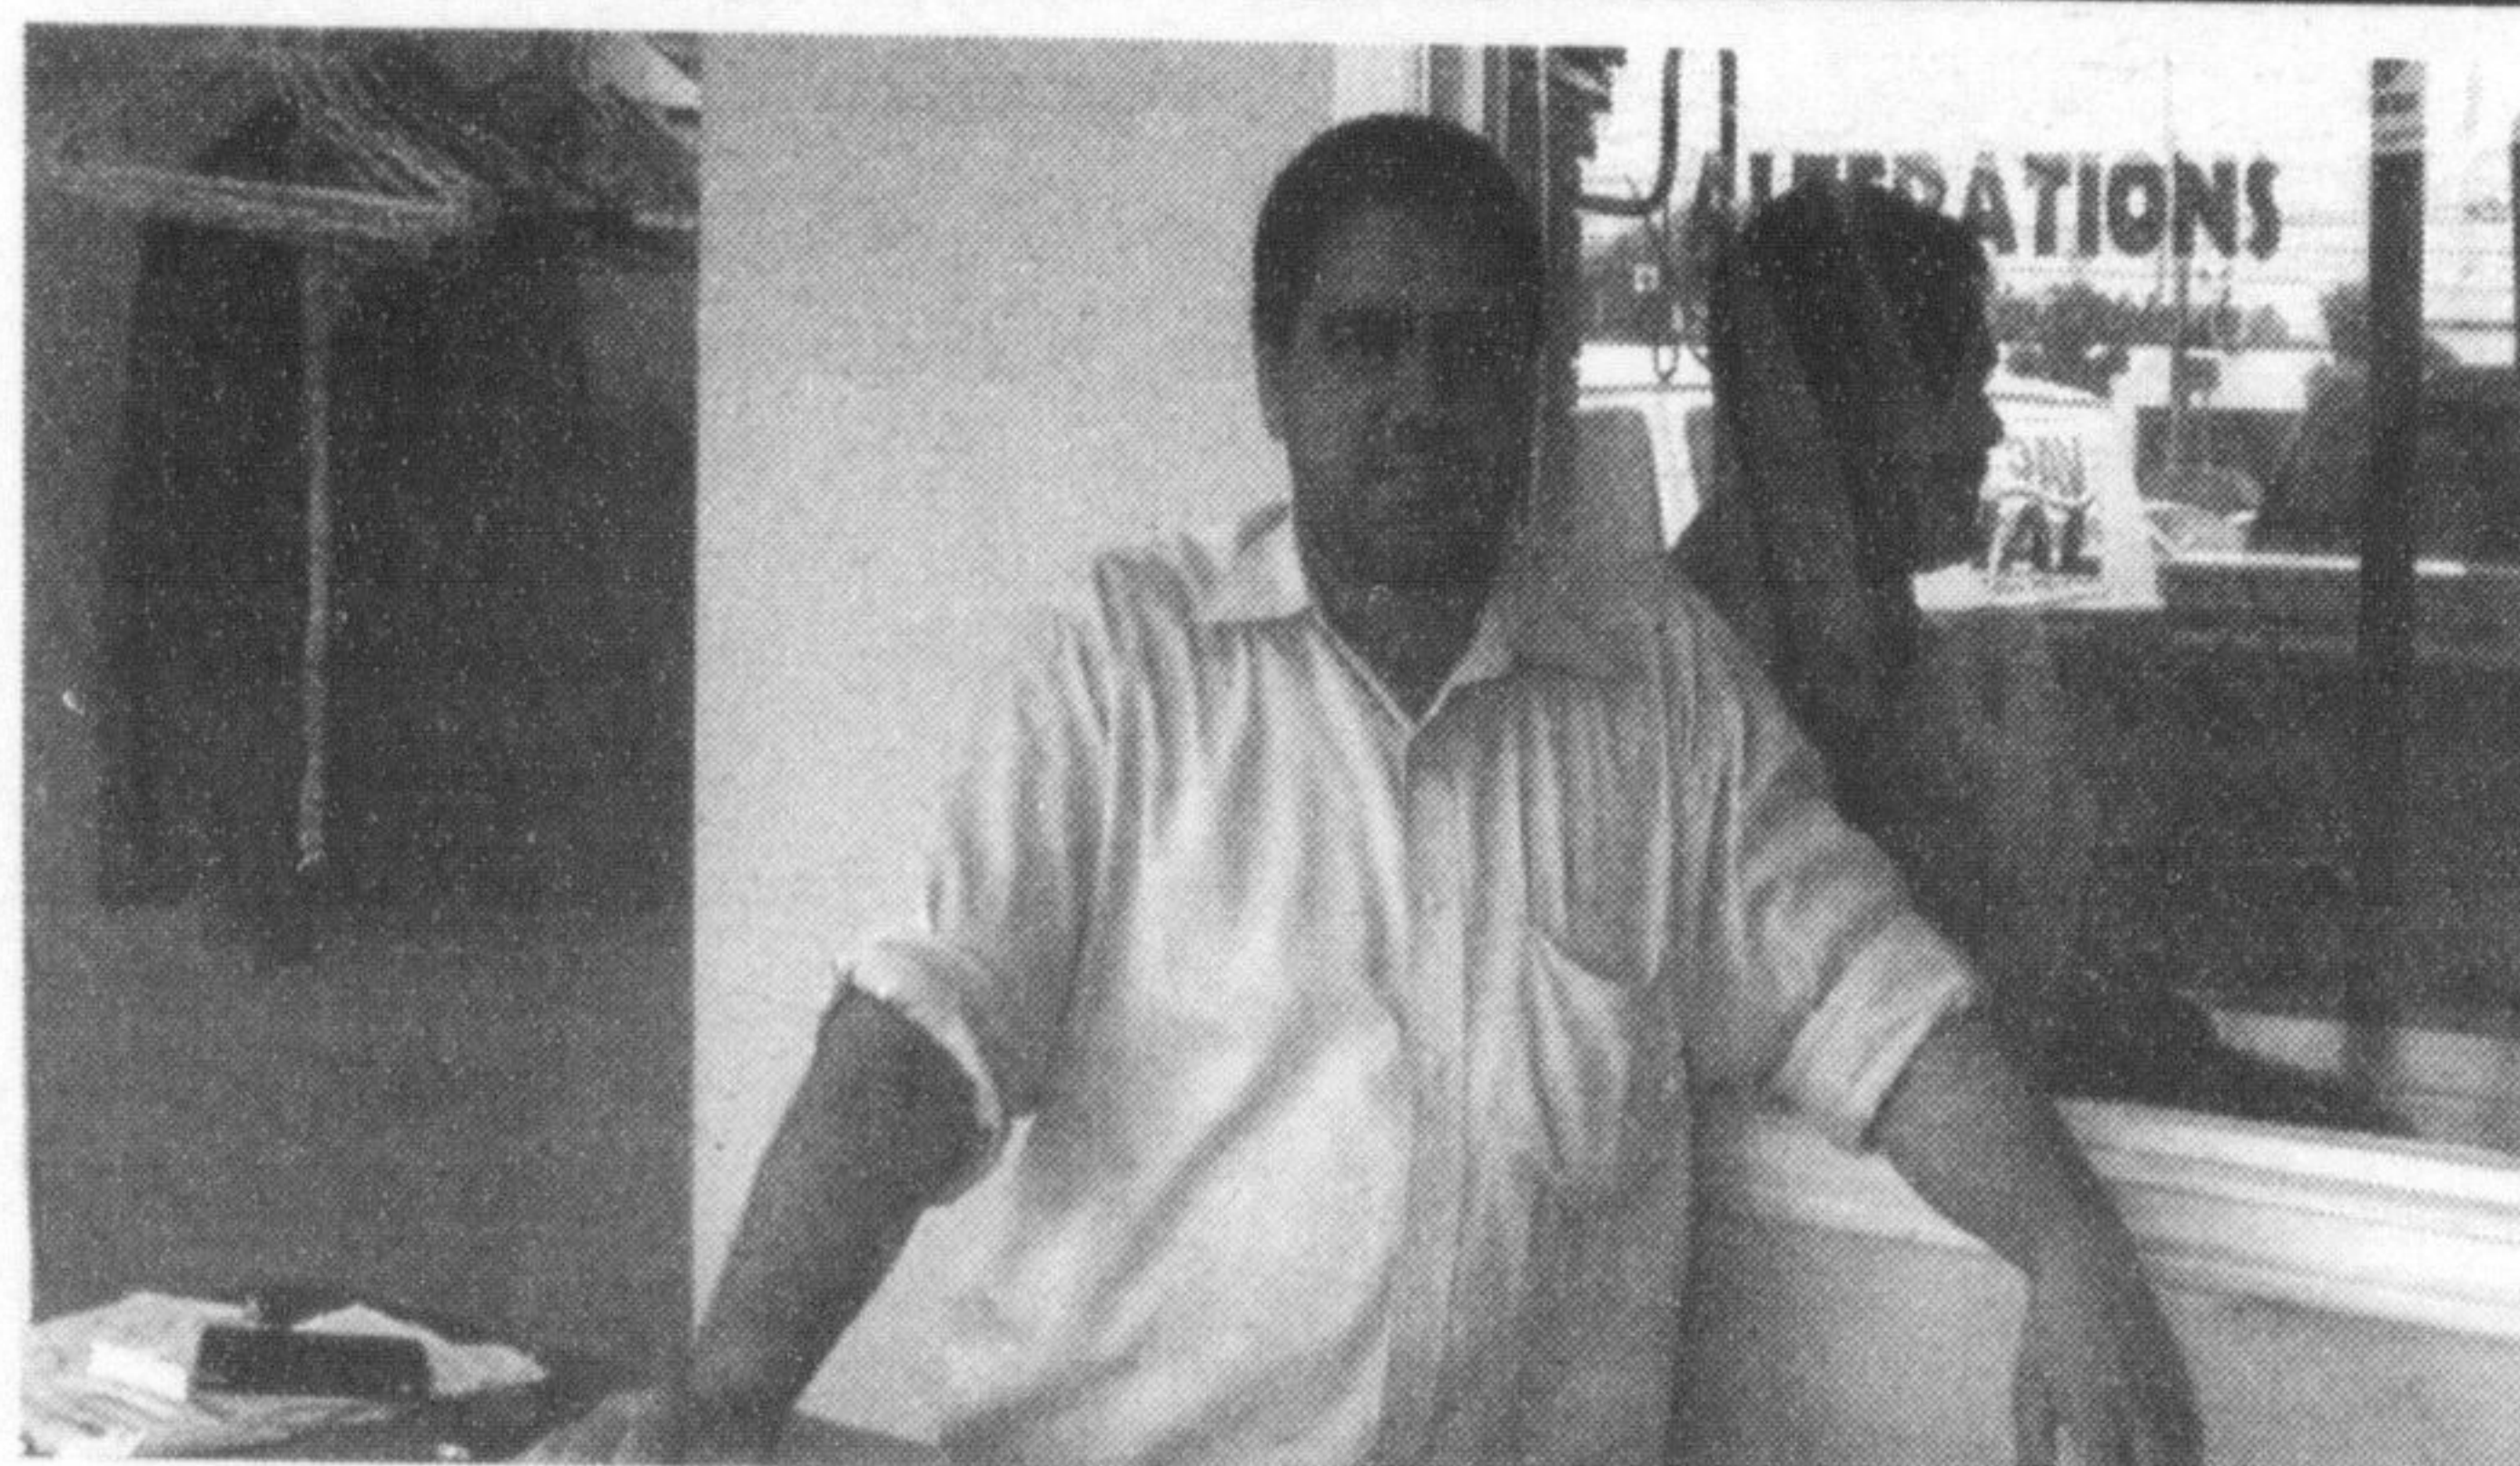

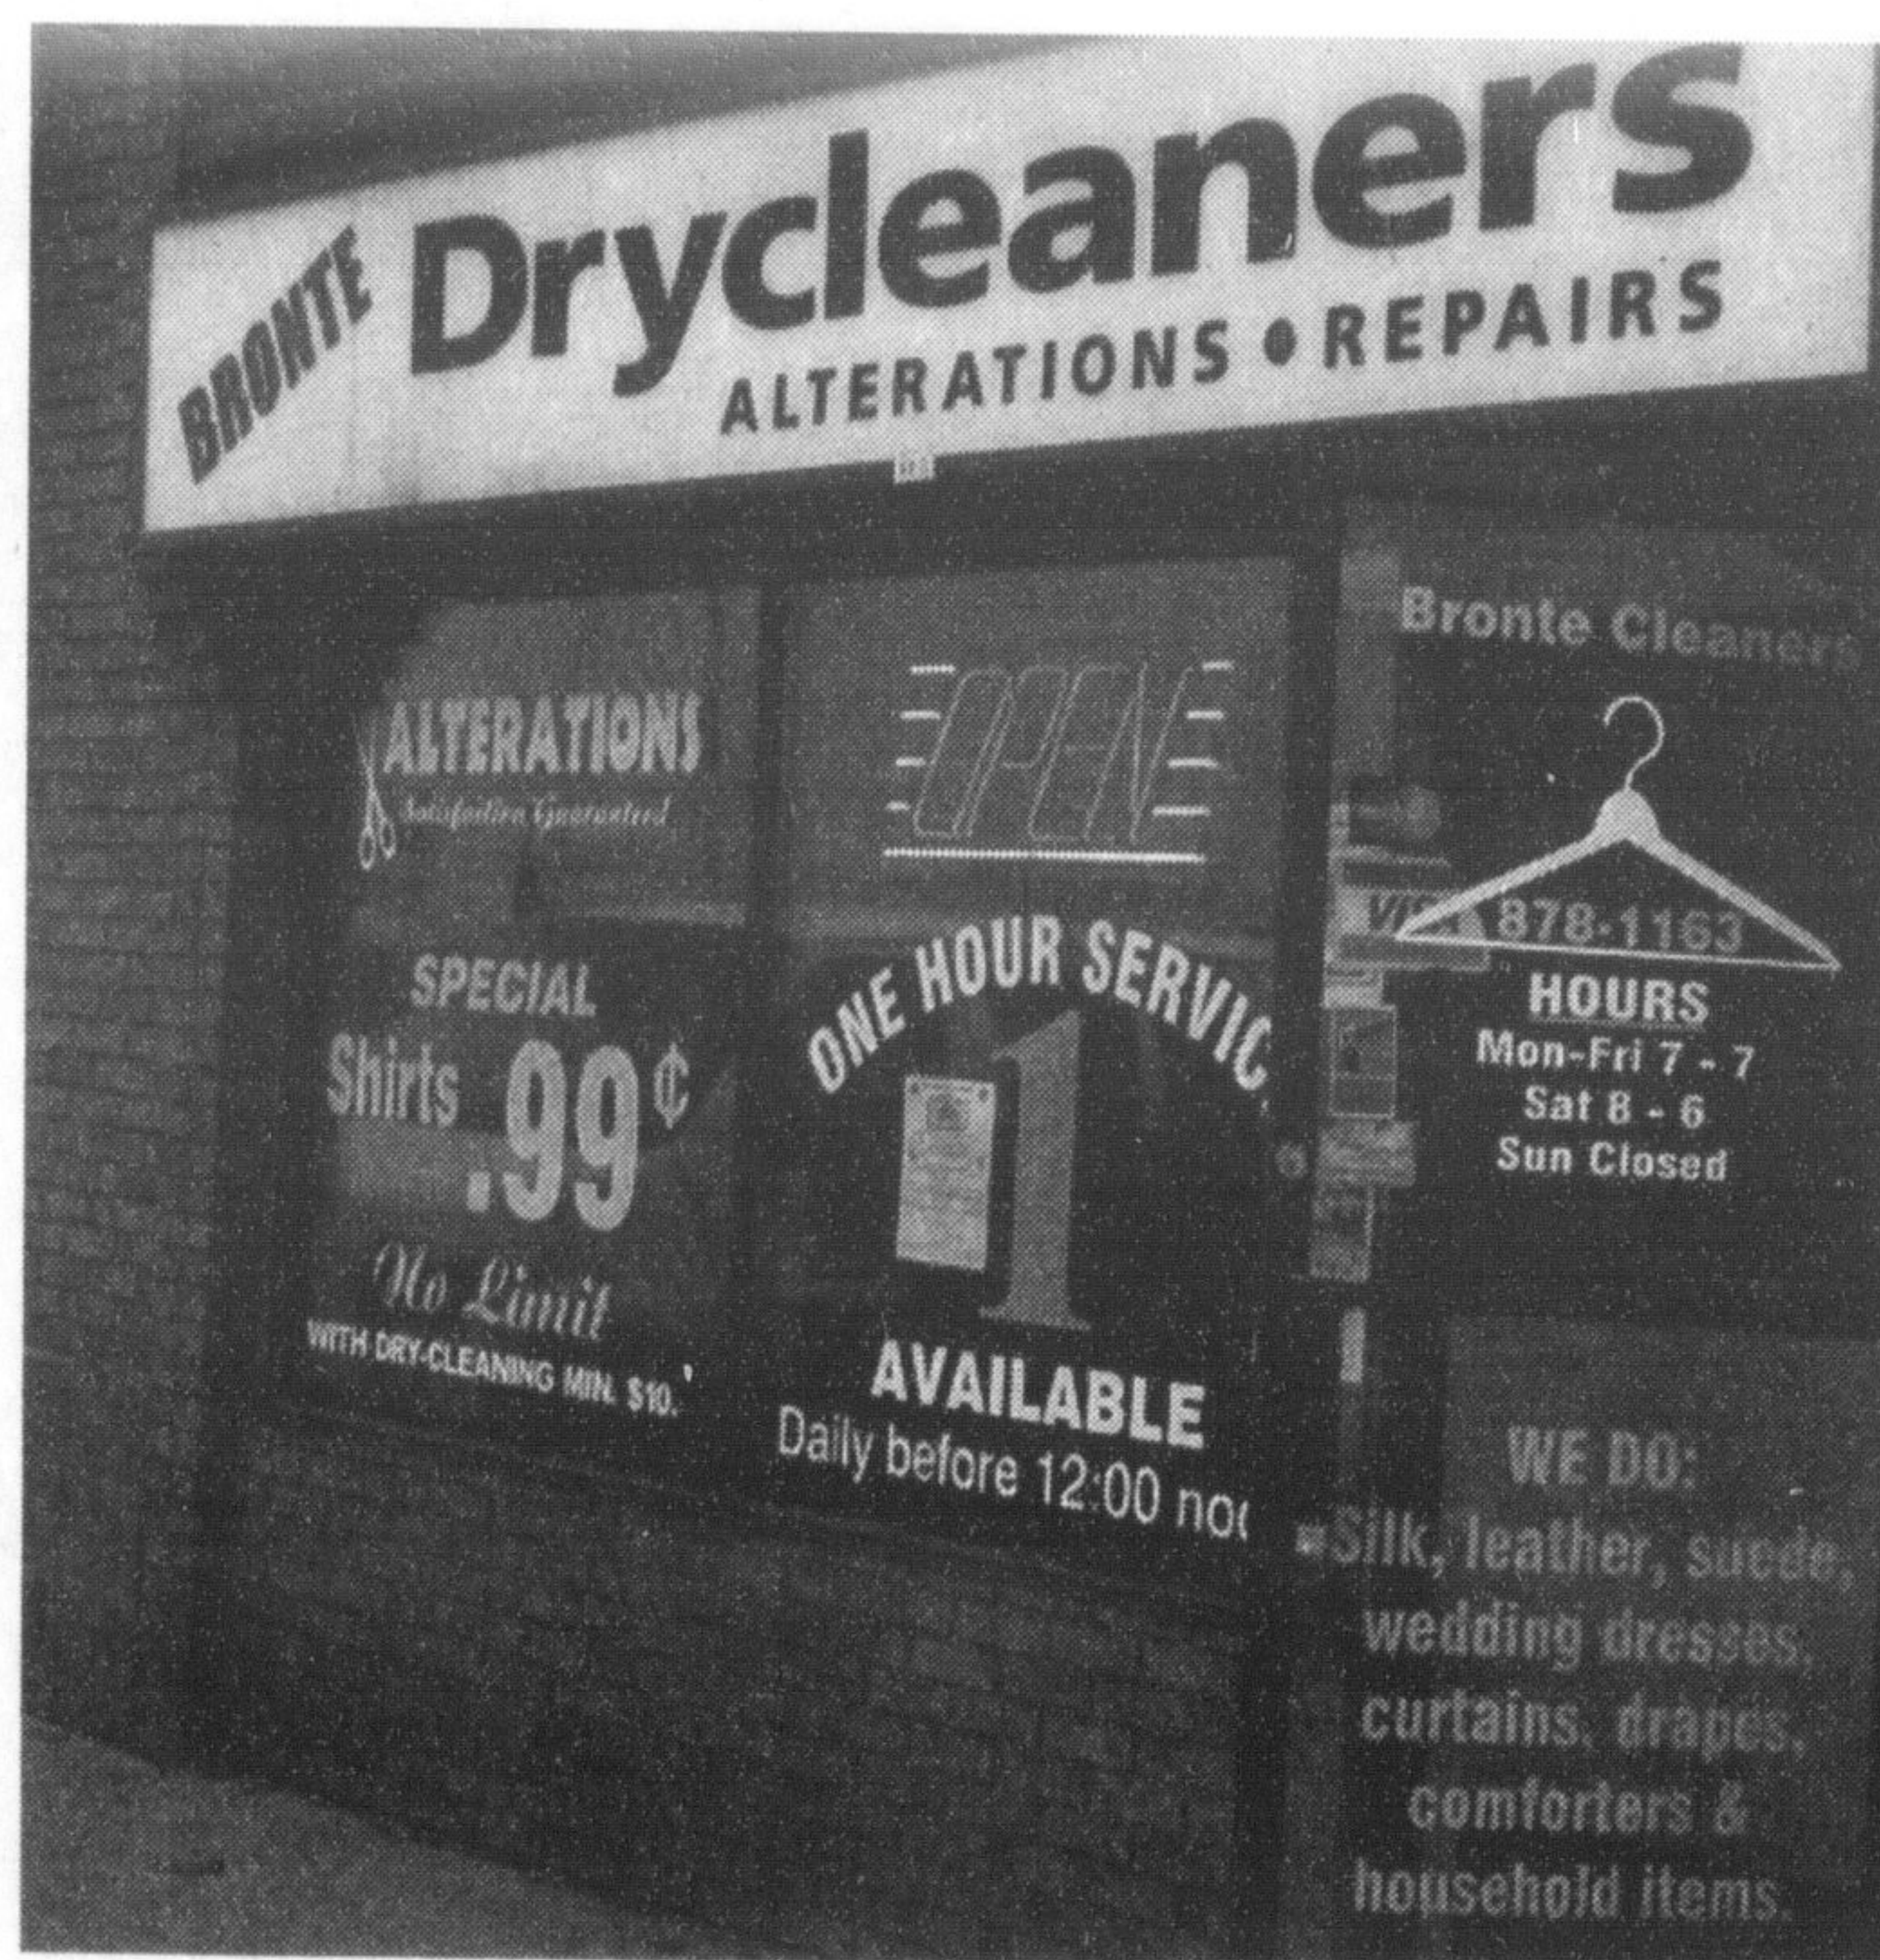

The business also offers a number of services to accommodate the needs of different customers with same-day service as well as a special rush service.

Many of Manjit's clients are residential customers but he also services commercial and industrial clients. In business for over a decade, Bronte Drycleaners has been providing dry cleaning and alterations service to its clients for over 12 years.

Breakthrough technology is emerging as a challenge to the use of perchlorethylene ("perc") Research has shown Canada uses millions of pounds of "perc" each year. Of this, some "perc" is recycled, but much of it is released into the atmosphere or washed down the drain along with process water. Consequently, "perc" can be found almost everywhere in the environment, and in much

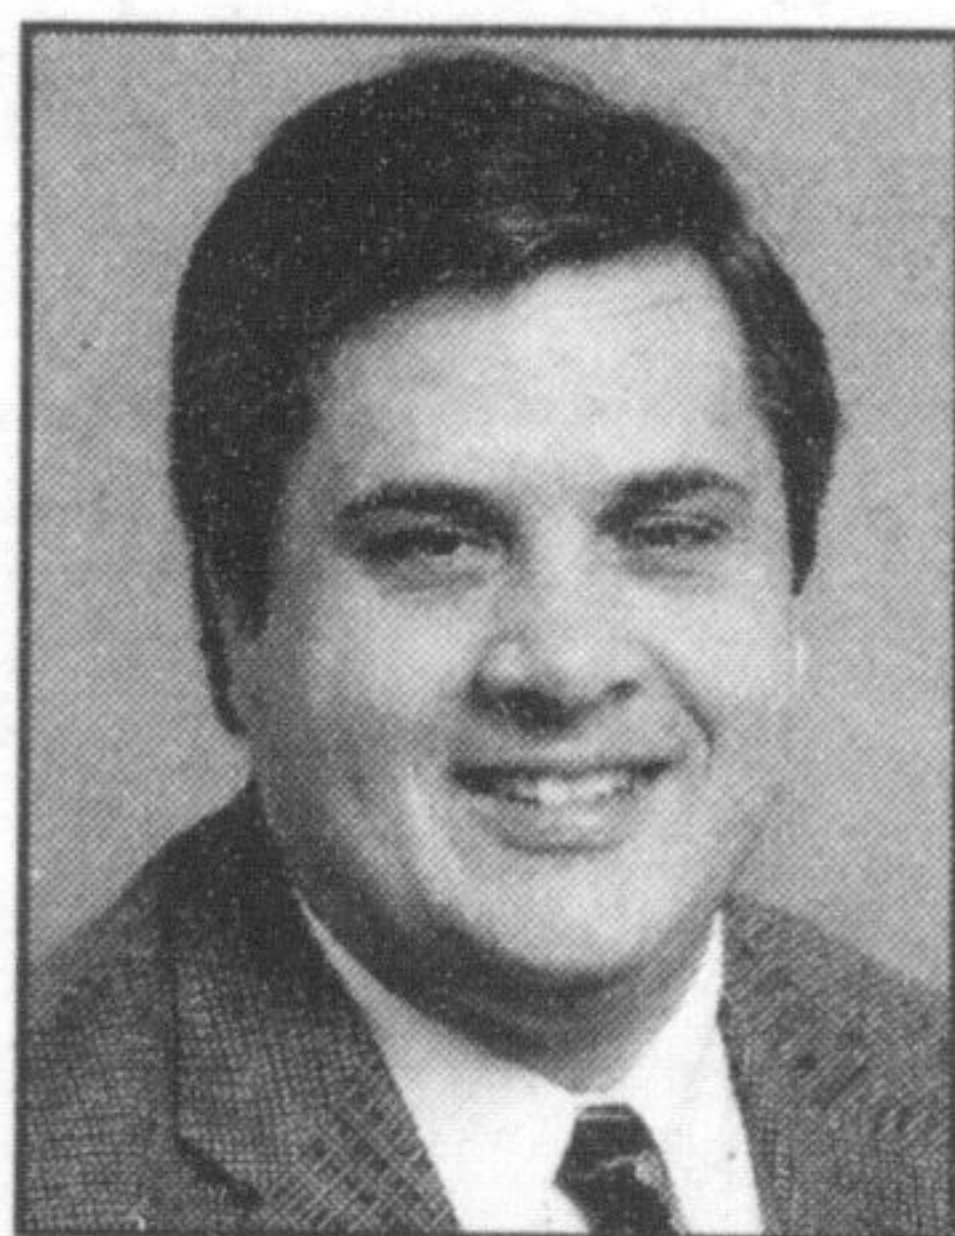

of our food and water. Indirectly, "perc" contributes to destruction of the earth's ozone layer when it degrades in the atmosphere. Recently Bronte Drycleaners installed a new state of the art dry cleaning machine at his business. The machine uses a solvent known as DF2000. A solvent that is less destructive to the environment. There are no odours, just fresh dry cleaning with new technology. DF-2000™ Fluid is a major advance in hydrocarbon solvent dry cleaning. Since its introduction, DF-2000 Fluid has earned a reputation among dry cleaning professionals as the best available alternative dry cleaning solvent. Drycleaners requiring an alternative solvent have come to trust the proven performance and reliability DF-2000 Fluid delivers. It is a highly effective dry cleaning solvent. The quality of dry cleaning is superior to "perc" methods and the end product to the consumer is comparable in price. Stores using DF-2000 are more economical as there are no addition costs for hazardous waste disposal. For your next dry cleaning why not try an environmentally friendly service.

Bronte Drycleaners is open Monday to Friday from 7am-7 pm. And on Saturday from 8 am to 6pm. The business is located at 575 Ontario Street South.
